## Directors' Report

For the year ended 31 December, 2023

The Directors have the pleasure in presenting their report on the affairs of Access Holdings Plc ("the Company") and its subsidiaries (together referred to as "the Group" and separately referred to as "Group entities"), the Company and the Group's Consolidated Financial Statements with Auditor's Report for the year ended 31 December 2023.

### Legal form and principal activities

Access Holdings Plc trading as Access Corporation ("Access Holdings") was incorporated as a public limited liability company on 10 February 2021. The Company is a Nigerian Exchange listed parent non-operating financial holding company for Access Bank ("the Bank") and the related group companies that emerged from the court-sanctioned Scheme of Arrangement between the Bank and holders of its fully paid ordinary shares of 50 Kobo each.

Access Holdings' business segments include lending, consumer lending, payment services, insurance brokerage and pension funds administration. The banking business, payment services, insurance brokerage and pension fund administration are currently in operation while the consumer lending is at advanced stage of licencing and operational readiness as at the end of the reporting year.

The financial results of all operating subsidiaries and entities have been consolidated in these consolidated and separate financial statements.

## Property and equipment

Information relating to changes in property and equipment is given in Note 28 to the consolidated and separate financial statements. In the Directors' opinion, the fair value of the Group's property and equipment is not less than the carrying value in the financial statements.

## Human resources

### (i) Report on diversity in employment

The Company as at December 31, 2023 operates a non-discriminatory policy in the consideration of applications for employment. The Company's policy is that the most qualified and experienced persons are recruited for appropriate job levels, irrespective of an applicant's state of origin, ethnicity, religion, gender or physical condition.

We believe diversity and inclusiveness are powerful drivers of competitive advantage in developing and understanding of our customers' needs and creatively addressing them.

#### (a) Composition of employees by gender

Total number of female employees	23
Total number of male employees	25

#### (b) Board Composition By Gender

Total number of female on the Board	3
Total number of men on the Board	6

#### (c) Top Management (Executive Director To GCEO) Composition By Gender

Total number of female in Executive Management position	1
Total number of men in Executive Management position	2

#### (d) Top Management (AGM To GM) Composition By Gender

Total number of female in Top Management position	2
Total number of men in Top Management position	3

#### (ii) Employment of disabled persons

The Company has a non-discriminatory policy on the consideration of applications for employment, including those received from disabled persons. All employees are given equal opportunities to develop themselves. The Company's policy is that the highest qualified and most experienced persons are recruited for appropriate job levels irrespective of an applicant's state of origin, ethnicity, religion or physical condition.

As at December 31, 2023, the Company had no person with physical disability on the staff list.

#### (iii) Health, safety and welfare of employees

The Company maintains business premises designed with a view to guaranteeing the safety and healthy living conditions of its employees and customers alike. Employees are adequately insured against occupational and other hazards. In addition, the Company retains top-class hospitals where medical facilities are provided for its employees and their immediate families at its expense.

Fire prevention and fire-fighting equipment are installed in strategic locations within the Company's premises.

The Company operates Group Personal Accident and the Workmen's Compensation Insurance covers for the benefit of its employees. It also operates a contributory pension plan in line with the Pension Reform Act 2014 as Amended and other benefit schemes for its employees.

#### (iv) Employee involvement and training

The Company encourages participation of employees in arriving at decisions in respect of matters affecting their wellbeing. Towards this end, the Company provides opportunities where employees deliberate on issues affecting the Company and its employees' interests, with a view to making inputs to decisions thereon. The Company places a high premium on the development of its manpower. Consequently, the Company sponsors its employees for various training courses, both locally and overseas.

#### (v) Statement of commitment to maintain positive work environment

The Company shall strive to maintain a positive work environment that is consistent with best practice to ensure that business is conducted in a positive and professional manner and to ensure that equal opportunity is given to all qualified members of the Group's operating environment.

#### (vi) Events after reporting period

##### Transition of Dr Herbert Wigwe

Access Holdings announces the passing of Dr. Herbert Wigwe, CFR, the Company's founding Group Chief Executive Officer. Dr. Wigwe died on Friday, 9 February 2024 in a helicopter accident in the United States of America.

## CUSTOMER COMPLAINTS AND FEEDBACK

Access Holdings is fully committed to its core value of 'passion for customers. The bank prides itself on providing exceptional services to customers at all times. At the same time, given the number and complexity of financial transactions that take place every day, the Bank recognizes that there will inevitably be occasions when mistakes and misunderstandings occur. In these situations, Access bank encourages customers to bring their concerns to the attention of the Bank for prompt resolution. In addition, deliberate efforts are made to solicit customers' feedback on its products and services.

### Complaints Channels

In order to facilitate seamless complaint and feedback process, the bank has provided various channels for customers. These include:

- 24 hour contact centre with feedback through emails, telephone, SMS, Livechat, Social Media etc.
- Feedback portal on the Bank's website
- Customer service desks in over 300 branches and toll-free telephone lines to the office of the Group Managing Director in the banking halls of key branches.
- Correspondence from customers
- The Voice of Customer Solution
- The Ombudsman desk

### Complaints Handling

We handle customer complaints with sensitivity and in due regard for the needs and understanding of each complainant. Efforts are made to resolve customer's complaints at first level. Where this cannot be done, they are immediately referred to the appropriate persons for resolution. All complaints are logged and tracked for resolution and feedback is provided to the customer.

### Resolve or Refer command Centre

The 'Resolve or Refer' command centre serves to encourage timely service delivery and First Time Resolution (FTR) of customer issues. The 'Resolve or Refer Command Centre' which is being run by a senior management staff has the mandate to ensure that most customer issues are resolved same day. The command centre provides support to all our departments and branches on issue resolution.

### Complaints Tracking and Reporting

We diligently track complaint information for continuous improvement of our processes and services. An independent review of the root cause of complaints made is carried out and lessons learnt are fed back to the relevant business units to avoid future repetition. Customer complaint metrics are analysed and reports presented to Executive Management and the Operational Risk Management committee. Reports on customer complaints are also sent to the Central bank as required.

#### Solicited Customer Feedback

Deliberate efforts are made to solicit feedback from customers and staff on the services and products of the bank through the following:

- Questionnaires
- Customer interviews
- Customers forum
- Quest for Excellence Sessions (for staff)
- Voice of Customer Surveys

The various feedback efforts are coordinated by our Service and innovation Group

The feedback obtained from customers are reviewed and lessons learnt are used for staff training and service improvement across the bank.

This report represents the fraud and forgery incidents that occurred during the year. It is a summation of attempted and successful fraud incidents. We have nil report on this.

## CORPORATE GOVERNANCE REPORT FOR FINANCIAL YEAR ENDED DECEMBER 31, 2023.

The Board of Access Holdings Plc ('the Company'), is pleased to present the Corporate Governance report for Financial Year ended December 31, 2023. The report provides insight into the operations of the Company's governance framework and key Board activities during the reporting period.

The core considerations for the establishment of the Company were enhanced regulatory compliance, diversification into permissible financial services, enhanced risk management, preservation of shareholder value, and effective capital allocation.

The Company is committed to Access Group's core governance principles of integrity, diversity, accountability, responsibility, transparency, independence, fairness, and discipline. Our governance framework is designed to align management's actions with the interest of shareholders and achieve appropriate balance with the interest of other stakeholders.

Our governance structures and processes are designed to ensure compliance with global best practices, the Company's governance charters, relevant codes of corporate governance, as well as the post listing requirements of Nigerian Exchange Limited.

The Board is focused on enhancing shareholders' value through the provision of best-in-class governance oversight.

### The Board

The Chairman leads the Board in setting the Group strategy and risk appetite. It also approves capital and operating plans for the attainment of the Group's strategic objectives on the recommendation of Management. The Board composition as of December 31, 2023, is detailed below:

S/N	NAME	DESIGNATION

4	Mrs. Ojinika Nkechinyelu Olaghere	Non-Executive Director
5	Mr. Olusegun Babalola Ogbonnewo	Non-Executive Director
6	Mr. Roosevelt Michael Ogbonna	Non-Executive Director
7	Mr. Oluseyi Kolawole Kumapayi	Non-Executive Director
8	Dr. Herbert Onyewumbu Wigwe	Group Chief Executive Officer
9	Ms. Bolaji Olaitan Agbede	Executive Director
10	Mr. Lanre Bamisebi	Executive Director

\*Passed away on November 21, 2023.

\*\*Appointed as the Chairman of the Board on December 19, 2023, to replace the deceased Mr. Osunkoya.

### Composition and Role

As of December 31, 2023, the Board was made up of 9 members comprising 6 Non-Executive and 3 Executive Directors. Three of the Board members are female.

### Board Members Profile

#### Mr. Abubakar Aribidesi Jimoh, CFA Chairman/Independent Non-Executive Director

Mr. Jimoh is a versatile professional with over thirty (30) years' experience in the financial services sector covering client relationship management, treasury, market risk, credit risk management, operational risk management, project, and portfolio management. He is the Group Managing Director of Trustbanc Group, a leading investment management firm. Prior to his current role, Mr. Jimoh led the transformation of Associated Discount House (ADH) from a failing Discount House to a Merchant Bank (Coronation Merchant Bank Ltd).

Before joining ADH, he was a General Manager and Divisional Head at the UBA Group with responsibility for Balance Sheet Management, Market Risk, and Investors Relations. He was also the Chief Risk Officer for various business segments including UBA Africa and UBA Capital.

Mr. Jimoh worked with the Royal Bank of Canada Financial Group between 1999 and 2005 in various capacities. He worked as the Chief Internal Control Officer and the Divisional Chief in charge of Private Sector Portfolio Management with the African Development Bank between 2005 and 2008. Mr. Jimoh also served as an Independent Non-Executive Director on the Board of Shelter Afrique between 2012 and 2013. He currently sits on the boards of Coronation Insurance Plc and Impact Credit Guarantee Limited.

He has a robust professional cum academic pedigree with a Bachelor of Science and a Master of Science in Finance from University of Lagos, Nigeria. He is a Chartered Financial Analyst and an Associate of the Institute of Chartered Accounts of Nigeria and Chartered Institute of Bankers of Nigeria. Mr. Jimoh is a Chartered Internal Auditor and Certified General Accountant of Ontario and Canada. He has attended several Executive Management Development Programmes in leading institutions including London Business School, Canadian Securities Institute and Lagos Business School.

Prior to his appointment as the Chairman of the Board, he was the Chairman of the Board Audit Committee and the Board Finance and Investment Committee, and the Vice-Chairman of the Board Risk Management Committee, Board Human Resources and Sustainability Committee, and Board Governance, Nomination and Remuneration Committee.

He is 57 years old as at the date of this report and resides in Nigeria.

**Mrs. Fatimah Bintah Bello-Ismail**  
**Independent Non-Executive Director**

Mrs. Bello-Ismail is a lawyer with more than thirty-six (36) years' experience in the legal and financial services fields. She commenced her legal career at the Department of Public Prosecution in the Federal Ministry of Justice, Lagos State before working as a counsel in the firm of Kehinde Sofola & Co.

She also worked at the Nigerian Social Insurance Trust Fund (NSITF) and Continental Merchant Bank (formerly Chase Merchant Bank) before becoming the Managing Partner at Universal Chambers, a full-service commercial law firm.

Mrs. Bello-Ismail obtained her Bachelor's Degree (in Law) from Ahmadu Bello University Zaria, Nigeria in 1984 and was called to the Nigerian Bar in 1985.

She sits on the boards of several organisations including Katsina State Development Board and VTT LNG. She is a member of the Nigerian Bar Association, International Bar Association, and Co-Founder and Trustee of the Home of Hospitality Development Initiative (HOHDI).

She is the Chairman of the Board Audit Committee and the Board Governance, Nomination and Remuneration Committee.

Mrs. Bello-Ismail is 61 years old as at the date of this report and resides in Nigeria.

**Mrs. Ojinika Nkechinyelu Olaghere, FCA**  
**Non-Executive Director**

Mrs. Olaghere is a seasoned professional with over thirty-three (33) years' experience in banking, administration, and consulting. She is currently the Managing Director of Rickela Consulting Limited, a management consultancy firm which provides training, capacity building, coaching and advisory services to companies in the financial services sector.

She joined Access Bank Plc in 2007 as a General Manager in the Enterprise Resource Support Group where she spearheaded the smooth rationalisation of the Bank's assets following the acquisition of Intercontinental Bank. She retired from Access Bank Plc in June 2018 as Executive Director, Operations and Information Technology. As Executive Director, Mrs Olaghere ensured the seamless upgrade of the Bank's major IT infrastructure and executed the Operations Transformation Programme which resulted in the Bank being ranked amongst the top 5 in KPMG's 2018 Banking Industry Customer Service Satisfaction Survey.

Prior to joining Access Bank Plc, she spent sixteen (16) years with Ecobank Nigeria, where she worked in the Operations and Consumer Banking Groups. As a multi-skilled and valuable resource, she was involved in the implementation of several critical projects. She has played key roles in the shaping and development of strategies that have led to the successes of multiple businesses across different industries. She sits on the boards of several organisations such as Nigerian Exchange Group Plc, Coronation Life Assurance Limited, and Pelijini Ltd.

Mrs. Olaghere holds a Bachelor of Arts in French Language from the University of Nigeria, Nsukka and is a Fellow of the Institute of Chartered Accountants of Nigeria (ICAN). She has attended several Executive Management Development programmes in leading institutions including INSEAD, London Business School, Lagos Business School and Massachusetts Institute of Technology.

She is the Chairman of the Board Human Resources and Sustainability Committee and Board Digital and Information Technology Committee.

She is 60 years old as at the date of this report and is resident in Nigeria.

**Mr. Olusegun Ogbonnewo**  
**Non- Executive Director**

Mr. Ogbonnewo has over 30 years' experience spanning banking, human capital development, operations and technology, payment systems and fintech. He is currently the Operating Director, Tengen Family Office. Prior to this, he occupied several roles in Access Bank Plc between 2006 and 2017 including Group Head, Channels Services; Head, Transaction Services Division; Group Head, Domestic Payments; Group Head, Central Processing Centre Group; and Group Head, Settlements and Payments.

He served in various capacities in Guaranty Trust Bank between 1993 and 2006 including Head, International Settlements, and Divisional Head, Banking Operations and Information Technology. He served as Branch Manager and Programme Officer in Peoples Bank Nigeria Limited between 1990 and 1992.

He sits on the board of several organisations including Coronation Insurance Plc, Coronation Registrars Limited, Trium Limited, and Fiducia Data Services Limited.

He holds a Bachelor of Arts in Education and a Master's in Public Administration from University of Ilorin. He also holds a Master's in Business Administration from IESE, University of Navarra Barcelona Spain/Lagos Business School. He is also an Honorary Senior Member of the Chartered Institute of Bankers of Nigeria.

He has attended several renowned leadership and professional development programmes including the High-Performance Leadership Programme organised by Institute of Management and Development ('IMD'); Corporate Restructuring Programme organised by Harvard Business School; Achieving Outstanding Performance by INSEAD and several global payments and systems processing courses organized by VISA, MasterCard, Verve and Entrust amongst others.

He is the Chairman of the Board Risk Management Committee and the Board Finance and Investment Committee and Board Digital and Information Technology Committee.

He is 62 years old as at the date of this report and resides in Nigeria.

**Mr. Roosevelt Michael Ogbonna FCA, CFA, HCIB  
Non-Executive Director**

Mr. Ogbonna was appointed Executive Director, Commercial Banking Division, of Access Bank Plc in October 2013, Deputy Managing Director in 2017 and Managing Director in May 2022.

He is a through-bred and consummate finance professional with over two (2) decades of banking experience who joined Access Bank in 2002 from Guaranty Trust Bank.

Mr. Ogbonna has a rich professional cum academic background. He is a Fellow of the Institute of Chartered Accountants of Nigeria (FCA), an Honorary Member of the Chartered Institute of Bankers (HCIB). He attended the Harvard Kennedy School of Government's Senior Executive Fellow programme and is a Chartered Financial Analyst. He holds a Master's degree in Business Administration from IMD Business School, Switzerland; a Master of Laws degree (LL.M) in International Corporate & Commercial Law from King's College, London; an Executive Master's degree in Business Administration from Cheung Kong Graduate School of Business; and a Bachelor's degree in Banking and Finance from the University of Nigeria, Nsukka. In 2015, he was selected as one of the Institute of International Finance (IIF) Future Global Leaders.

He has robust corporate board experience and currently serves as a Non-Executive Director of the Bank's subsidiaries in UK and South Africa. He also represents the Bank on the Boards of its investee companies - African Finance Corporation, Central Securities Clearing System Plc, and Shared Agent Network Expansion Facilities Limited.

He is 49 years old as at the date of this report and resides in Nigeria.

**Mr. Oluseyi Kolawole Kumapayi, FCA  
Non-Executive Director**

Mr. Kumapayi is a highly accomplished and result-driven professional with over twenty (20) years of progressive banking experience spanning across Finance, Strategy, Risk Management, and Treasury. He joined Access Bank in 2002 as the Head of Financial Control and Credit Risk Management. Prior to joining Access Bank, he held controller and analyst positions in First City Monument Bank Limited and Guaranty Trust Bank Plc, respectively.

He was the Group Chief Financial Officer of Access Bank Plc between 2008 and 2020 and was appointed as Executive Director, African Subsidiaries in Access Bank Plc.

Mr. Kumapayi holds a Master's degree in Mechanical Engineering from the University of Lagos, and a Bachelor of Science degree in Agricultural Engineering from the University of Ibadan, Nigeria. He has also attended several Executive Management Development programmes in leading institutions including INSEAD, IMD and London Business School.

He currently serves as a Non-Executive Director of Access Bank's subsidiaries in Botswana, Ghana, and Kenya.

He is a Fellow of the Institute of Chartered Accountants of Nigeria (ICAN) and a member of the Global Association of Risk Professionals (GARP), the Chartered Institute of Taxation of Nigeria (CITN) and the Chartered Institute of Bankers of Nigeria (CIBN).

He is 52 years old as at the date of this report and resides in Nigeria.

**Dr. Herbert Onyewumbu Wigwe, FCA  
Group Chief Executive Officer**

Dr. Wigwe is a transformational leader, seasoned banker, and financial expert with over three (3) decades of professional experience. He joined Access Bank in March 2002 as Deputy Managing Director to co-lead its transformation to a world class financial services provider and became its Group Managing Director/Chief Executive Officer in 2014. He resigned as the Bank's Group Managing Director/Chief Executive Officer in May 2022 and currently serves as a Non-Executive Director.

He commenced his career at Coopers & Lybrand, Lagos as a management consultant later qualifying as a Chartered Accountant. After a stint at defunct Capital Bank, he joined Guaranty Trust Bank where he spent over a decade working in the Corporate and Institutional Banking Division, rising to become the Executive Director in charge of Institutional Banking.

As one of Nigeria's foremost corporate bankers, he helped develop some of Africa's biggest companies in the construction, telecommunications, energy and oil and gas sectors through a unique model, which involves understanding and providing financial support and expertise.

Dr. Wigwe is the Chairman of Access Bank (UK) Limited and Access Pension Limited. He was also a board member of Nigerian Mortgage Refinance Company Plc, NG Clearing Limited, amongst several others.

He holds a Bachelor of Science degree in Accountancy from the University of Nigeria, Nsukka; a Master's degree in Banking and Finance from the University College of North Wales (now Bangor); a Master of Science degree in Financial Economics from the University of London and is an alumnus of the Harvard Business School Executive Management Programme.

Dr. Wigwe is a Fellow of the Institute of Chartered Accountants of Nigeria, and Institute of Credit Administration, and an Honorary member of the Chartered Institute of Bankers of Nigeria.

He is 57 years old as at the date of this report and resides in Nigeria.

**Ms. Bolaji Olaitan Agbede**  
**Executive Director**

Ms. Agbede is a versatile professional with over twenty-seven years' experience in human resources management, customer relationship management and banking operations. She has a proven record of successful people integration during mergers and acquisitions, culture transformation and execution of corporate strategies.

She commenced her professional career in Guaranty Trust Bank and served in various capacities within the Commercial Banking and Operations functions. She diligently distinguished herself and swiftly rose from the grade of Executive Trainee in 1992 to Manager in 2001. Ms. Agbede subsequently served as the Chief Executive Officer of JKG Limited in 2003, a business consulting outfit.

Ms. Agbede joined Access Bank in 2003 as an Assistant General Manager and was responsible for managing the Bank's portfolio of chemical trading companies. She was the Group Head, Human Resources of Access Bank between 2010 and 2022.

Ms. Agbede holds a bachelor's degree in Mathematics and Statistics from the University of Lagos (1990) and subsequently obtained a Master of Business Administration degree from Cranfield University in 2002. She is a member of the Chartered Institute of Management UK and Chartered Institute of Personnel Management of Nigeria.

She has attended several renowned leadership and professional development programmes including the High-Performance Leadership Programme, organised by the IMD and the Strategic Talent Management Programme, organised by the London Business School.

She is 54 years old as at the date of this report and resides in Nigeria.

**Mr. Olanrewaju Babatunde Bamisebi**  
**Executive Director**

Mr. Bamisebi is a seasoned professional with over 2 decades experience spanning across information technology, consultancy, project management, talent management and development, application development as well as strategy and automation. He has a robust Pan-African experience having managed IT across 22 African countries in consulting, telecom, oil and gas, banking and fintech sectors.

Prior to his appointment as Executive Director of the Company, he was Managing Director of Finserve Africa (Fintech arm of Equity Bank). He was also the Group Director for IT & Operations for Equity Group Holding Limited (EGHL), Kenya. Before joining EGHL in April 2019, he was the Group Chief Information Officer at the defunct Diamond Bank Plc.

Mr. Bamisebi holds a Higher National Diploma in Computer Science from The Polytechnic Ibadan and two bachelor's degrees: one in Accounting from Olabisi Onabanjo University and the other in Computing and Information Technology from the University of Derby, UK. He also obtained a master's degree in Business Administration from Durham Business School, UK and is currently undertaking a doctorate degree in in Global Strategy.

He is 51 years old as at the date of this report and resides in Nigeria.

**Sunday Ekwochi, HCIB**  
**Company Secretary**

Mr. Ekwochi was appointed the Company Secretary of the Company in May 2022.

He graduated as a top student in Law from the University of Jos with a second-class upper division degree in 1996 and from the Nigerian Law School in February 1998 with a second-class upper division degree. He has over 2 decades of banking experience from the then African Express Bank, Fidelity Bank and Access Bank Plc.

Mr. Ekwochi qualified as a Chartered Secretary with the Institute of Chartered Secretaries and Administrators, London in 2003. He has attended Management Development Programmes at London Business School, Euromoney, Wharton Business School and IMD. He is an Honorary Senior Member of the Chartered Institute of Bankers of Nigeria.

Mr. Ekwochi served as the Vice-Chair of the Association of Banks Legal Advisers and Company Secretaries and Chairman of its Capacity Development Committee.

### **Performance Monitoring and Evaluation**

The Board, in the discharge of its oversight function, engages management on the planning, definition and execution of the Company's strategy. Management's report on the execution of defined strategic objectives is a regular feature of the Board's agenda, thus providing the Board with the opportunity to evaluate and constructively challenge Management in the execution of strategy.

Management provides the Board with quarterly updates on implementation of the strategy, affording the Board the opportunity to critique Management's performance and assess significant risk issues as well as mitigating controls implemented. Management's report on the Group's actual financial performance is presented relative to the planned budget to enable the Board assess performance. Peer comparison is also a regular feature of Management reporting to the Board to benchmark performance against that of our competitors.

The Company's performance on Corporate Governance is monitored and reported. The Company equally carries out extensive reviews of its compliance with the CBN, SEC and FRC Codes of Corporate Governance and with appropriate reports rendered to the regulators.

Board assessment, when done effectively provides the Board the opportunity to identify and remove obstacles to better performance and to strengthen what works well. The Board has established a policy on its performance evaluation which provides for the independent annual evaluation of its performance, that of its committees and individual Directors. The evaluation is done by an independent consultant approved by the Board.

The Board believes that the use of an independent consultant promotes the objectivity and transparency of the evaluation process. Our Board and corporate governance assessment transcends box ticking and involves a rigorous process of on-line self-evaluation and 360° feedback with a heavy focus on qualitative considerations. It includes the assessment of our corporate governance frameworks and polices, evaluation of the Board and the Committees as well as the effectiveness of the Independent Directors.

In compliance with the CBN Code of Corporate Governance, the 2023 Annual Board Performance Evaluation Report was presented at the Board meeting held on January 30, 2024 by a representative of Ernst and Young, the Company's Board Evaluation Consultants.

### **Board Composition – Guiding Principles**

The Fit and Proper Person Policy is designed to ensure that the Company and its subsidiaries are managed and overseen by capable and trustworthy individuals. The Board Governance, Nomination and Remuneration Committee is responsible for Executive Directors' succession planning and recommends new appointments to the Board. The Committee takes cognisance of the existing range of skills, experience, background, and diversity on the Board in the context of our strategic direction before articulating the specifications for the candidate sought. The Committee also considers the need for appropriate demographic and gender balance in recommending candidates for Board appointments. Candidates who meet the criteria set by the Committee are subjected to enhanced due diligence enquiries. We are comfortable that the Board is sufficiently diversified to optimise its performance and deliver sustainable value to stakeholders.

The Board's composition subscribes to global best practice on the need for Non-Executive Directors to exceed Executive Directors. As at December 31, 2023, the Board had more Non-Executive Directors than Executive Directors, with 2 of the Non-Executive Directors being independent. Non-Executive Directors are appointed to the Board to bring independent, specialist knowledge and impartiality to strategy development and execution monitoring. The Board is committed to improving gender diversity in its composition in line with its diversity policy. The Board had 33% female membership as of December 31, 2023.

### **Retirement and Re-election of Directors**

In accordance with the Company's Articles of Association, all Directors retired from office at the Company's first AGM held on May 24, 2023, and being eligible for election, were duly elected. The appointment of the Directors was earlier approved by the Central Bank of Nigeria.

### **Board Effectiveness**

Today's boards are required to be more engaged, knowledgeable, and effective than in the past as they contend with myriads of new pressures, challenges, and risks. As stakeholders' expectations from the Board continue to grow, the Board must set its strategic priorities often across diverse business segments and markets and monitor the firm's risk profile. The Board must demonstrate that good corporate governance is not a box-ticking exercise by setting the right ethical tone from the top. The effectiveness of the Board is achieved through composition, induction, training, and a rigorous evaluation process. The effectiveness of the Board derives from the diverse range of skills and competences of the Executive and Non-Executive Directors who have exceptional degrees in banking, financial and broader professional and entrepreneurial experiences.

### **Training and Induction**

We recognise that being a director is becoming increasingly more challenging. The Company has a Directors' Orientation and Continuous Education Policy which provides that Directors should be exposed to domestic and international trainings to improve their decision-making capacity, thereby contributing to the overall effectiveness of the Board.

New Directors are exposed to a personalised induction programme which includes one-on-one meetings with Executive Directors and Senior Executives responsible for our key business areas. Such sessions focus on the challenges, opportunities and risks facing the business areas. The induction programme covers an overview of the Strategic Business Units as well as Board processes and policies. A new Director is provided with an induction pack containing charters of the various Board Committees, significant reports,

important statutes and policies, minutes of previous Board meetings and a calendar of Board activities. Based on the recommendation of the Governance, Nomination and Remuneration Committee, the Board approves the annual training plan and budget for Directors while the Company Secretary ensures the implementation of the plan with regular reports to the Board.

During the period under review, the Directors attended the training programmes detailed below:

S/N	NAME OF DIRECTOR	TRAINING	FACILITATOR	DATE
1	Ojinika Olaghere	Driving Digital Strategy	Harvard Business School	March 12 – 17, 2023

### Shareholders and Regulatory Engagement

The Board recognizes the importance of free flow of complete, adequate, and timely information to shareholders to enable them to make informed decisions and is committed to maintaining high standards of corporate disclosure. The implementation of our Investor Communication and Disclosure Policy helps the Board to understand shareholders views. The Company’s website [www.theaccesscorporation.com](http://www.theaccesscorporation.com) is regularly updated with both financial and non-financial information.

Shareholder’s meetings are convened and held in an open manner in line with our Articles of Association and existing statutory and regulatory regimes, for the purpose of deliberating on issues affecting our strategic direction. The AGM is a medium for promoting interaction between the Board, management, and shareholders. Attendance at the Annual General Meeting is open to shareholders or their proxies, while proceedings at such meetings would be monitored by members of the press, representatives of the Nigerian Exchange Limited, the Central Bank of Nigeria, and the Securities and Exchange Commission.

We have a dedicated Investors Relations Unit that facilitates communication with shareholders and analysts on a regular basis and addresses their queries and concerns. Investors and stakeholders are frequently provided with information about the Company through various channels, including Quarterly Investors Conference Calls, the General Meeting, our website, the Annual Report and Accounts, Non-Deal Road Shows, and Investors Forum at Nigerian Exchange Limited.

The Board ensures that communication with the investing public about the Company and its subsidiaries is timely, factual, broadly disseminated, and accurate in accordance with all applicable legal and regulatory requirements. Our reports and communication to shareholders and other stakeholders are in plain, readable, and understandable format. The Board ensures that shareholders’ statutory and general rights are always protected, particularly their right to vote at general meetings. The Board also ensures that all shareholders are treated equally regardless of the size of their shareholding and social conditions. Our shareholders are encouraged to share in the responsibility of sustaining our corporate values by exercising their rights as protected by law.

### Access to Information and Resources

Management recognises the importance of ensuring the flow of complete, adequate and timely information to the Directors on an ongoing basis to enable them to make informed decisions in discharge of their responsibilities. There is ongoing engagement between Executive Management and the Board, and the Heads of Strategic Business Units attend Board meetings to make presentations. The Company’s External Auditors attend the meetings of the Group Board Audit Committee and the Group Statutory Audit Committee to make presentation on the audit of the Company’s Financial Statements. Directors have unrestricted access to Management and company information in addition to the necessary resources to carry out their responsibilities including access to external professional advice at the Company’s expense in line with policy.

### Board Responsibilities

The primary function of the Board is to provide effective leadership and direction to enhance the long-term value of the Company to its shareholders and other stakeholders. It has the overall responsibility for reviewing the strategic plans and performance objective, financial plans and annual budget, key operational initiatives, major funding and investment proposals, financial performance review and corporate governance practices.

## **Term of Office**

The Company's Non-Executive Directors are appointed for an initial term of four years, and they can be re-elected for a maximum of two subsequent terms of four years each, subject to satisfactory performance and shareholders' approval. The Independent Non-Executive Directors are subject to a maximum tenure of eight years, while Executive Directors are appointed for an initial term of four years subject to a maximum cumulative tenure of twelve years in line with CBN's Corporate Governance Guidelines. Executive Directors are prohibited from holding other directorships outside the Group or investee companies.

## **Separation of Roles**

In line with best practice, the Chairman and Group Chief Executive Officer's roles are assumed by different individuals; this ensures the balance of power and authority. The Board can reach impartial decisions as its Non-Executive Directors are a blend of Independent and Non-Independent Directors with no shadow or Alternate Directors, thus ensuring that their independence is brought to bear on decisions of the Board.

## **The Role of the Board**

The principal responsibility of the Board is to promote the long-term success of the Company by creating and delivering sustainable shareholder value. The Board leads and provides direction for the Management by setting policy directions and strategy, and by overseeing their implementation. The Board seeks to ensure that Management delivers on both its long-term growth and short-term objectives, striking the right balance between both goals. In setting and monitoring the execution of our strategy, consideration is given to the impact that those decisions will have on the Company's obligations to various stakeholders, such as shareholders, employees, suppliers and the community in which we operate.

The Board is responsible for ensuring that robust systems of internal controls are maintained, and that Management maintains an effective risk management and oversight process across the Company so that growth is delivered in a controlled and sustainable way. In addition, the Board is responsible for determining and promoting the collective vision of the Company's purpose, values, culture and behaviours.

In carrying out its oversight functions, matters reserved for the Board include but are not limited to:

- Defining the business strategy and objectives.
- Formulating risk policies.
- Approval of quarterly, half yearly and full year financial statements.
- Approval of significant changes in accounting policies and practices.
- Appointment or removal of Directors and the Company Secretary.
- Approval of major acquisitions, divestments of operating companies, disposal of capital assets or capital expenditure.
- Approval of charter and membership of Board Committees.
- Setting of annual Board objectives and goals.
- Approval of allotment of shares.
- Approval of the framework for determining the policy and specific remuneration of Executive Directors.
- Monitoring delivery of the strategy and performance against plan.
- Reviewing and monitoring the performance of the GCEO and the Executive team.
- Ensuring the maintenance of ethical standard and compliance with relevant laws.
- Performance appraisal and compensation of Board members and Senior Executives.
- Ensuring effective communication with shareholders.
- Ensuring the integrity of financial reports by promoting disclosure and transparency.
- Succession planning for key positions.

## **The Role of the Chairman**

The principal role of the Chairman is to provide leadership and direction to the Board. The Chairman is accountable to the Board and shareholders and liaises directly with the Board and the Management of the Company, through the Group Chief Executive Officer ('GCEO'). The positions of the Chairman and the GCEO are held by separate individuals.

More specifically, the duties and responsibilities of the Chairman are as follows:

- Primarily responsible for the effective operation of the Board and ensures that the Board works towards achieving the Company's strategic objectives.
- Setting the agenda for Board meetings in conjunction with the GCEO and the Company Secretary.
- Approval of the Annual Board Activities Calendar.
- Playing a leading role in ensuring that the Board and its Committees have the relevant skills, competencies for their job roles.
- Ensuring that Board meetings are properly conducted and that the Board is effective and functions in a cohesive manner.
- Ensuring that the Directors receive accurate and clear information about the affairs of the Company in a timely manner to enable them to take sound decisions.
- Acting as the main link between the Board and the GCEO as well as advising the GCEO on the effective discharge of his duties.
- Ensuring that all Directors focus on their key responsibilities and play constructive roles in the affairs of the Company.
- Ensuring that induction programmes are conducted for new Directors and continuing education programmes are in place for all Directors.
- Ensuring effective communication with the Company's institutional shareholders and strategic stakeholders.
- Taking a leading role in the assessment, improvement, and development of the Board.
- Presiding over General Meetings of shareholders.

## **The Role of Group Chief Executive Officer ('GCEO')**

The GCEO has the overall responsibility for leading the development and execution of the Company's long-term strategy, with a view to creating sustainable shareholder value. He manages the day-to-day operations and ensures that operations are consistent with the policies approved by the Board.

Specifically, the duties and responsibilities of the GCEO include the following:

- Acts as head of the Management team and is answerable to the Board.
- Responsible for ensuring that a culture of integrity and legal compliance is imbibed by personnel at all levels of the Company.
- Responsible for the Company's consistent achievement of its financial objectives and goals.
- Ensures that the Company's philosophy, vision, mission, and values are disseminated and practised throughout the Company.
- Ensures that the allocation of capital reflects the Company's risk management philosophy.
- Ensures that the Company's risks are controlled and managed effectively, optimally and in line with the Company's strategies and objectives.
- Supervision of the Executive Directors and all subsidiaries and affiliate companies.
- Serves as the Company's Chief Spokesman and ensures that it is properly presented to its various publics.
- Ensures that the Directors are provided with enough information to support their decision making.

### **The Role of the Company Secretary**

Directors have separate and independent access to the Company Secretary. The Company Secretary is responsible for, amongst other things, ensuring that Board procedures are observed and that the Company's Memorandum and Articles of Association, plus relevant rules and regulations, are complied with. He also assists the Chairman and the Board in implementing and strengthening corporate governance practices and processes, with a view to enhancing long-term shareholder value. The Company Secretary assists the Chairman in ensuring good information flow within the Board and its Committees and between Management and Non-Executive Directors.

The Company Secretary also facilitates the orientation of new Directors and coordinates their professional development. As primary compliance officer for the Company's compliance with the listing rules of the Nigerian Exchange Limited, the Company Secretary is responsible for designing and implementing a framework for the Company's compliance with the listing rules, including advising Management on prompt disclosure of material information. The Company Secretary attends and prepares the minutes for all Board meetings. As secretary for all Board Committees, the Company Secretary assists in ensuring coordination and liaison between the Board, the Board Committees and Management. The Company Secretary also assists in the development of the agenda for the various Board and Board Committee meetings. The appointment and the removal of the Company Secretary are the exclusive preserve of the Board.

### **Delegation of Authority**

The ultimate responsibility for the Company's operations rests with the Board. The Board retains effective control through a well-developed Committee structure that provides in-depth focus on the Board's responsibilities. Each Board Committee has a written term of reference and presents regular reports to the Board on its activities. The Board delegates authority to the Group Managing Director/Chief Executive Officer to manage the affairs of the Company within the parameters established by the Board from time to time.

### **Board Meetings**

The Board meets quarterly, and emergency meetings are convened as may be required. The Annual Calendar of Board and Committee meetings is approved by the Board in advance during the last quarter of the preceding year. Material decisions may be taken between meetings through written resolutions in accordance with the Company's Articles of Association.

All Directors are provided with notices, agenda, and meeting papers in advance of each meeting to enable Directors adequately prepare for the meeting. Where a Director is unable to attend a meeting, he/she is still provided with the relevant papers for the meeting. Such a Director also reserves the right to discuss with the Chairman any matter he/she may wish to raise at the meeting. Directors are also provided with regular updates on developments in the regulatory and business environment.

The Board in demonstration of its commitment to environmental sustainability operates a secure electronic portal: Diligent Board book, for the circulation of board documentation to members.

The Board met 6 times during the period under review.

The Board devoted considerable time and efforts on the following issues in 2023:

- Approval of the 2022 Financial Year Audited Financial Statements
- Approval of the 2023 Interim Audited Financial Statements
- Approval of subsidiary Board appointments
- Approval of subsidiary expansion activities
- Review and approval of policies
- Approval of Notice of the 1st Annual General Meeting.
- Approval of Amendments to the Company's Memorandum and Articles of Association
- Approval of the revised Board Calendar
- Approval of the 2023 – 2027 Strategy
- Approval of the Company's 2024 Budget
- Approval of the subsidiaries' risk appetite levels
- Approval of the Company's 2023 Result Release Calendar
- Approval of the 2024 Board Activities Calendar

#### Board Committees

The Board exercises oversight responsibility through its standing committees, each of which has a charter that clearly defines its purpose, composition, structure, frequency of meetings, duties, tenure, and reporting lines to the Board. In line with best practice, the Chairman of the Board is not a member of any Committee.

The Board had six standing committees as of December 31, 2023 namely: the Board Audit Committee, the Board Digital and Information Technology Committee, the Board Finance and Investment Committee, the Board Governance, Nomination and Remuneration Committee, the Board Human Resources and Sustainability Committee, and the Board Risk Management Committee,

While the various Board committees have the authority to examine issues within their remit and report their decisions and/or recommendations to the Board, the ultimate responsibility for all matters lies with the Board.

#### Reports of Board Committees

This section highlights the activities of the Board Committees in 2023.

##### 1. Board Audit Committee

The membership of the Committee and attendance at the meetings as at December 31, 2023 are as set out below.

Name	Designation	11/1/2023	27/1/2023	13/4/2023	13/7/2023	25/7/2023	11/10/2023
Abubakar Jimoh*	Chairman	P	P	P	P	P	P
Fatimah Bello-Ismail**	Chairman	P	P	P	P	P	P
Olusegun Ogbonnewo***	Vice-Chairman	NM	NM	NM	NM	NM	NM
Ojini Olaghere	Member	P	P	P	P	P	P

\*Stopped being the Chairman of the Board Audit Committee following his appointment as the Chairman of the Board on December 19, 2023.

\*\*Appointed as the Chairman of the Board Audit Committee on December 19, 2023.

\*\*\*Appointed to the Board Audit Committee on December 19, 2023.

The Committee supports the Board in performing its oversight responsibility relating to the integrity of the Group's Financial Statements and the financial reporting process, as well as the independence and performance of the Group's Internal and External Auditors. It oversees the Group's system of internal control and the mechanism for receiving complaints regarding the Group's accounting and operating procedures.

During the review period, the Committee considered the Group's financial performance and recommended the revised Internal Audit Group Charter, Internal Audit Reports, and Chief Financial Officers Reports to the Board for approval.

The Committee met 6 times during the reporting period.

Mrs. Fatimah Bintah Bello-Ismail is the current Chairman of the Committee, replacing Mr. Abubakar Jimoh after the latter's appointment as the Chairman of the Board of Directors.

## 2. Board Digital & Information Technology Committee

The membership of the Committee and attendance at the meetings as of December 31, 2023 are as set out below.

Name	Designation	12/1/2023	12/4/2023	10/7/2023	12/10/2023
Ojini Olaghere	Chairman	P	P	P	P
Olusegun Ogbonnewo	Vice-Chairman	P	P	P	P
Fatimah Bello-Ismail	Member	P	P	P	P

Roosevelt Ogbonna	Member	P	P	P	A
Oluseyi Kumapayi*	Member	NM	NM	NM	NM
Lanre Bamisebi	Member	P	P	P	P

\*Appointed to the Board Digital and Information Technology Committee on December 19, 2023.

The Committee was established to oversee the end-to-end digital delivery of the Group's products and services. The Committee receives regular reports on the Group's digital ecosystem and customer experience and oversees the Group's IT strategy. The Committee monitors investments in the Group's IT infrastructure and support systems to ensure the safe and effective delivery of products and services.

The key issues considered by the Committee during the period included the reports on Information Technology, Information and Cyber Security, customer feedback as well as internal audit report on the Company's information technology and digital systems.

The Committee met 4 times during the reporting period.

Mrs. Ojini Olaghere is the Chairman of the Committee.

## 3. Board Finance and Investment Committee

The membership of the Committee and attendance at the meetings as of December 31, 2023 are as set out below.

Name	Designation	5/1/2023	12/1/2023	11/4/2023	10/7/2023

#### DIRECTORS' INTEREST IN CONTRACTS

Disclosure on Directors' interest in contracts is contained in this report.

#### Management Committee

The Management Committee (MANCO) is made up of the Group Managing Director as Chairman, Executive Directors, and all Group Heads. The Committee is primarily responsible for the implementation of strategies approved by the Board and ensuring the efficient deployment of the Company's resources.

#### Group Committee of CEOs of Subsidiaries

The Group Committee of CEOs of Subsidiaries of the Company supports the GCE to guide and control the overall direction and success of the businesses of its subsidiaries. The responsibilities are highlighted below:

- i. Ensuring the effective implementation and alignment with the Group strategy by its subsidiaries.
- ii. Ensuring overall alignment of the business performance of the subsidiaries with the Company's overarching strategy and plans.
- iii. Reviewing strategic and business performance of the subsidiaries against the approved plan and budgets and agree recommendations for corrective actions.
- iv. Promoting the identification of synergies and ensuring the implementation of initiatives designed to deliver the synergies.
- v. Discussing and monitoring major reputation and brand management risk issues as they impact the Company and/or any of the subsidiaries.

#### Statutory Audit Committee

In compliance with Section 404 of the Companies and Allied Matters Act 2020, the Company has a Statutory Audit Committee. The Committee is constituted to ensure its independence, which is fundamental to upholding stakeholders' confidence in the reliability of the Committee's report and the Group's Financial Statements. There is no Executive Director sitting on the Committee. The Chairman of the Committee is an ordinary shareholder, while the shareholders' representatives are independent and answerable to the shareholders.

The duties of the Committee are as enshrined in Section 404 (3) and (4) of CAMA 2020. The Committee is responsible for ensuring that the Company's financials comply with applicable financial reporting standards.

#### Composition

The composition of the Company's Statutory Audit Committee follows the Companies and Allied Matters Act 2020 and comprises 3 shareholders and 2 Non-Executives, one of whom is an Independent Non-Executive Director while the other is independent of the management of the Company.

The profiles of the shareholders' representatives in the Committee in 2023 are as follows:

**Henry Omatsola Aragho, FCA**  
**Chairman, Statutory Audit Committee**

Mr. Aragho obtained his Higher National Diploma (Accounting) from Federal Polytechnic Auchi in 1981 and a master's degree in Business Administration from Ogun State University (1999). He qualified as a Chartered Accountant with the Institute of Chartered Accountants of Nigeria (ICAN) in 1985. He was admitted as an Associate Member of Institute of Chartered Accountants of Nigeria in March 1986 and subsequently qualified as a fellow of the Institute. He joined the Nigerian Ports Authority in 1982 and retired as General Manager Audit in 2005. He is presently the Managing Consultant of Henrose Consulting Limited and Managing Director Henrose Global Resources Limited.

He was appointed the Chairman of the Committee on July 27, 2016.

**Idaere Gogo-Ogan**  
**Member, Statutory Audit Committee**

Mr. Ogan is a 1987 graduate of Economics from the University of Port Harcourt and holds a master's degree in International Finance from Middlesex University, London. He joined the Corporate Banking Department of Guaranty Trust Bank Plc in 1996. He left Guaranty Trust Bank to found D' Group, incorporating Becca Petroleum Limited and Valuestream and Cordero Engineering Ltd.

He is a Non-Executive Director of Coronation Merchant Bank Limited and Chairman of United Securities Limited.

**Mr. Akindele Gbogboade**  
**Member, Statutory Audit Committee**

Mr. Gbogboade holds a Bachelor of Science degree in Microbiology from Obafemi Awolowo University. He is also a member of the Chartered Institute of Taxation of Nigeria, and a Fellow of both the Institute of Chartered Accountants of Nigeria and Chartered Institute of Procurement and Supply (CIPS) UK.

He is currently a Partner at Gbogboade Akindele and Co Chartered Accountants, and the Managing Director of Diversified Procurement Solutions Limited.

**Record of Attendance at Statutory Audit Committee Meetings as of 2023**

<b>Name</b>	<b>27/1/2023</b>	<b>25/4/2023</b>	<b>25/7/2023</b>	<b>24/10/2023</b>
Henry Omatsola Aragho Chairman Shareholder representative	P	P	P	P
Idaere Gogo Ogan Member Shareholder representative	P	P	P	P
Akindele Gbogboade* Member Shareholder representative	NM	NM	P	P
Abubakar Aribidesi Jimoh Member Board representative	P	P	P	P
Ojinika Nkechinyelu Olaghere Member Board representative	P	P	P	P

\*Mr. Akindele Gbogboade was appointed as a Member of the Statutory Audit Committee at the Company's Annual General Meeting held on May 24, 2023.

**Tenure of the Statutory Audit Committee**

The tenure of each Committee member lasts from the date of election at an Annual General Meeting till the next. The membership may, however, be renewed through re-election at the next Annual General Meeting.

**Role and Focus of the Statutory Audit Committee**

The duties of the Statutory Audit Committee are as enshrined in Section 404 (3) and (4) of CAMA. The statutory provisions are supplemented by the provision for the Codes of Corporate Governance issued by the CBN and SEC and are highlighted as follows:

- Ascertaining whether the accounting and reporting policies of the Company are in accordance with legal requirements and agreed ethical practices.
- Reviewing the scope and planning of audit requirements.
- Reviewing the findings on management matters in conjunction with the external auditor and management's responses thereon.
- Keeping under review the effectiveness of the Company's system of accounting and internal control.
- Making recommendations to the Board on the appointment, removal and remuneration of the external auditors of the Company, ensuring the independence and objectivity of the external auditors and that there is no conflict of interest which could impair their independent judgement.

- Authorising the internal auditor to carry out investigations into any activity of the Company which may be of interest or concern to the Committee.
- Assisting in the oversight of the integrity of the Company's financial statements and establish and develop the internal audit function.

### **2023 Audit Fees**

The audit fees paid by the Group to KPMG, external auditors for the 2023 financial year statutory audit was N495 million while fees for non-audit services rendered to the Group during the year amounted to N353.9 million.

### **Going Concern**

The Directors confirm that after making appropriate enquiries, they have reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the financial statements.

### **External Auditors**

Messrs KPMG acted as our external auditors for the 2023 financial year. The Board confirms that the Company has complied with the regulatory requirement as enshrined in the CBN and SEC Codes of Corporate Governance on the rotation of audit firm and audit partners. KPMG was appointed the Company's sole external auditors effective January 1, 2023.

### **Succession Planning**

The Board has a robust policy which is aligned to the Company's performance management process. The policy identifies key positions in respect of which there will be formal succession planning. The policy provides that potential candidates for positions shall be identified at the beginning of each financial year.

### **Code of Ethics**

The Company's Codes of Conduct specify expected behaviours for its employees and Directors. The Codes are designed to empower employees and Directors and enable effective decision making at all levels of the business according to defined ethical principles.

### **Dealing in Company Securities**

The Company implements a Securities Trading Policy that prohibits Directors, members of the Audit Committee, employees and all other insiders from abusing, or placing themselves under the suspicion of abusing price sensitive information in relation to its securities. In line with the policy, affected persons are prohibited from trading on the Company's security during a closed period which is usually announced by the Company Secretary. The Company has put in place a mechanism for monitoring compliance with the policy.

### **Remuneration Policy**

The Company has established a remuneration policy that seeks to attract and retain the best talent in countries that it operates. To achieve this, the Company seeks to position itself among the best performing and best employee rewarding companies in its industry in every market that it operates. This principle will act as a general guide for the determination of compensation in each country. The objective of the policy is to ensure that salary structures, including short- and long-term incentives, motivate sustained high performance and are linked to corporate performance. It is also designed to ensure that stakeholders can make reasonable assessment of our reward practices. The Company ensures that all local tax policies are complied with in its countries of operation.

Operating within the guidelines set by the principles above, compensation for country staff is based on the conditions in the local economic environment as well as the requirements of local labour laws. The Group Office usually commissions independent annual compensation surveys in the subsidiaries to obtain independent statistics the local markets pay to arrive at specific compensation structures for each country. Compensation will be determined annually at the end of the financial year.

Total compensation provided to employees will typically include guaranteed and variable portions. The specific proportion of each will be defined at the country level. Guaranteed pay will include base pay and other guaranteed portions while variable pay may be both performance-based and discretionary.

The Company has put in place a performance bonus scheme which seeks to attract and retain high-performing employees. Awards to individuals are based on the job level, business unit performance and individual performance. Other determinants of the size of individual award amounts include pay levels for each skill set which may be influenced by the relative dearth of skills in an area.

The Company complies with the Pension Reform Act on the provision of retirement benefit to employees at all levels. The Company also operates an Employee Performance Share Plan for the award of units of its shares to its employees, subject to terms and conditions determined by the Board of Directors.

### **Whistle-Blowing Procedure**

The Company expects all its employees and Directors to observe the highest level of probity in their dealings with the Company and its stakeholders. Our Whistle-Blowing structure covers internal and external whistle-blowers and extends to the conduct of the stakeholders including employees, vendors, and customers. It provides the framework for reporting suspected breaches of the Company's internal policies and laws and regulations.

The Company has engaged Deloitte to provide consulting assistance in the implementation of the policy. The policy provides that suspected wrongdoing by an employee, vendor, supplier or consultant may be reported through the Company's or Deloitte's Ethics lines or emails, details of which are provided below.

**Internal Channels:**

Email: [Whistleblower@theaccesscorporation.com](mailto:Whistleblower@theaccesscorporation.com)

**External Channels:**

Toll-free Hotline: 0800TIP-OFFS (0800 847 6337)

Email: [tip-offs@deloitte.com.ng](mailto:tip-offs@deloitte.com.ng)

Web Portal Link: <https://tip-offs.deloittemanagedsolutions.com.ng/>

Mobile App: Deloitte Tip-Offs Anonymous App

Available on Google Play Store for Android and App Store for Apple

In addition to the foregoing, stakeholders may also report unethical practices to the Central Bank of Nigeria via [anticorruptionunit@cbn.gov.ng](mailto:anticorruptionunit@cbn.gov.ng).

**Customer Complaints and Resolution**

The Company in line with the rules of the Securities and Exchange Commissions has implemented Investors Enquiries and Complaints Management Policy.

**Highlights of The Company's Clawback Policy**

The objective of the Clawback policy is to recover excess and undeserved rewards such as bonuses, incentives, profit sharing and other performance-based compensation from current and former Executives and applicable Senior Management employees.

The policy would be triggered if the Company's financial performance on which the reward was based is discovered to be materially false, misstated, erroneous or in instances of misdemeanour, fraud, material violation of the Company's policy or regulatory infractions.

The Executives, Chief Financial Officer and applicable senior management employee must have served the Company during the 'look back period and incentives paid to them must have been tied to a financial parameter. The policy applies to any incentive-based compensation paid during any of the three fiscal completed years immediately preceding the date the Company is required to restate its financial results (look back period), meaning the earlier of:

- i. The date that the Audit Committee concludes that the Company's previously issued financial statement contains a material error or
- ii. The date on which a court, regulator or other similarly authorized body causes the Company to restate its financial information to correct a material error.

**Highlights of Sustainability Policies**

The Company's sustainability vision and strategy are underpinned by international principles, frameworks and standards that support the design of best-in-class local policies that enable effective mainstreaming of sustainability in the Company for strategic growth and long-term success. The Company's policies and frameworks facilitate the achievement of its vision. The strict adherence to these policies is one of the ways to ensure the Company remains a responsible corporate citizen.

**Statement of Compliance**

We hereby confirm to the best of our knowledge that the Company has complied with the following Codes of Corporate Governance and Listing Standards

1. The Code of Corporate Governance for Public Companies in Nigeria as issued by the Securities and Exchange Commission
2. The Central Bank of Nigeria's Corporate Governance Guidelines for Financial Holding Companies in Nigeria
3. The Financial Reporting Council's Nigerian Code of Corporate Governance
4. The Nigerian Exchange Rules for Listing on the Premium Board
5. The Post-Listing Rules of the Nigerian Exchange Limited

Save that in the event of any conflict regarding the provisions of the respective Codes and Rules, the Company will defer to the provisions of the CBN Corporate Governance Guidelines as the CBN is its primary regulator.

**Statement of Directors' Responsibilities in relation to the Consolidated and separate Financial Statements for the year ended 31 December 2023**

The Directors accept responsibility for the preparation of the consolidated and separate financial statements that give a true and fair view of the financial position of the Company and Group as at 31 December 2023 and the results of its operations, cash flows and changes in equity for the year ended, in compliance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards) and in the manner required by the Companies and Allied Matters Act, 2020 and the Financial Reporting Council of Nigeria (Amendment) Act, 2023.

The Directors further accept responsibility for maintaining adequate accounting records as required by the Companies and Allied Matters Act, 2020 and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

The Directors have made an assessment of the Group and Company's ability to continue as a going concern and have no reason to believe the Group and Company will not remain a going concern in the year ahead.

SIGNED ON BEHALF OF THE BOARD OF DIRECTORS BY:

## Report of the statutory audit committee

### To the members of Access Holdings Plc:

In accordance with the provisions of Section 404(1) of the Companies and Allied Matters Act of Nigeria, the members of the Audit Committee of Access Holdings Plc hereby report on the financial statements for the year ended 31 December 2023 as follows:

We have exercised our statutory functions under section 404(7) of the Companies and Allied Matters Act of Nigeria and acknowledge the co-operation of management and staff in the conduct of these responsibilities.

We are of the opinion that the accounting and reporting policies of the Company and Group are in agreement with legal requirements and agreed ethical practices and that the scope and planning of both the external and internal audits for the year ended 31 December 2023 were satisfactory and reinforce the Group's internal control systems.

We are satisfied that the Company has complied with the provisions of Central Bank of Nigeria Circular BSD/1/2004 dated 18 February 2004 on "Disclosure of insider related credits in the financial statements of banks". We hereby confirm that an aggregate amount of N646million was outstanding as at 31 December 2023 and was performing as at 31 December 2023 (see note 45)

We have deliberated on the findings of the external auditors who have confirmed that necessary cooperation was received from management in the course of their audit and we are satisfied with management's responses thereon and with the effectiveness of the Company's system of accounting and internal control.

FRC/2017/PRO/ICAN/002/00000016270  
Mr. Henry Omatsola Aragho  
Chairman, Audit Committee  
January 30, 2024

Members of the Audit Committee are:

1	Mr. Henry Omatsola Aragho	Shareholder	Chairman
3	Mr. Idaere Gogo Ogan	Shareholder	Member
4	Mr. Akindele Gbogboade	Shareholder	Member
4	Mr. Abubakar Aribidesi Jimoh	Director	Member
5	Mrs. Ojinika Nkechinyelu Olaghere	Director	Member

Sunday Ekwochi – Company Secretary

## **Statement of Corporate Responsibility for the Consolidated and Separate Financial Statements for the year ended 31 December 2023**

Further to the provisions of section 405 of the Companies and Allied Matters Act (CAMA), 2020, we, the Group Managing Director and Chief Financial Officer, hereby certify the consolidated and separate financial statements of the Group for the year ended 31 December 2023 as follows:

- (a) That we have reviewed the audited financial statements of the Group for the year ended 31 December 2023.
- (b) That the audited financial statements do not contain any untrue statement of material fact or omit to state a material fact which would make the statements misleading, in the light of the circumstances under which such statement was made.
- (c) That the audited financial statements and all other financial information included in the statements fairly present, in all material respects, the financial condition and results of operation of the Group as of and for, the year ended 31 December 2023.
- (d) That we are responsible for establishing and maintaining internal controls and have designed such internal controls to ensure that material information relating to the Group is made known to the officer by other officers of the companies, during the year ended 31 December 2023.
- (e) That we have evaluated the effectiveness of the Group's internal controls prior to the date of the audited financial statements, and certify that the Group's internal controls are effective as of that date.
- (f) That there were no significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our evaluation, including any corrective action with regard to significant deficiencies and material weaknesses.
- (g) That we have disclosed the following information to the Group's Auditors:
  - there are no significant deficiencies in the design or operation of internal controls which could adversely affect the Group's ability to record, process, summarise and report financial data, and have identified for the Group's auditors any material weaknesses in internal controls, and
  - there is no fraud that involves management or other employees who have a significant role in the Group's internal control.

**Herbert Wigwe**  
Group Chief Executive Officer  
FRC/2012/ICAN/00000001998  
30 January 2024

The year 2023 presented significant challenges marked by unprecedented occurrences, including geopolitical upheavals and the collapse of major international banking institutions. The global economy has experienced enduring repercussions of the overlapping crises of the past four years: the COVID-19 pandemic, the incursion of the Russian Federation into Ukraine, and the escalation of inflation followed by a significant tightening of global monetary policies. Moreover, a substantial crisis erupted in the Middle East, exacerbating geopolitical tensions, fostering uncertainty in commodity markets, and adversely affecting worldwide trade and economic growth.

Amidst these threats of upheavals, the global economy demonstrated remarkable resilience. Global output is projected to grow by 3.1% in 2023 by the International Monetary Fund – the same level recorded in the previous year. Inflation fell faster than expected from its 2022 peak as major economies weathered the swiftest surge in interest rates witnessed in the past four decades, notably devoid of the typical consequences such as steep unemployment rates or financial collapses. Furthermore, global inflation is being curbed but some major countries are slipping into recession e.g., UK - an uncommon feat, given that countries seldom manage to reduce inflation rates without triggering an economic downturn.

A supply-side expansion also took hold, with a broad-based increase in labour force participation, resolution of pandemic-era supply chain problems, and declining delivery times. However, the rising momentum was only felt in some places, as weak consumer sentiment, the lingering effects of high energy prices, and weakness in interest-rate-sensitive manufacturing and business investment weighed on the output in some economies. Global trade in goods and services was virtually flat in 2023, growing by an estimated 0.2 percent - the slowest expansion outside global recessions in the past 50 years. Goods trade contracted, reflecting declines in key advanced economies and deceleration in Emerging Market and Developing Economies (EMDEs) and mirroring the sharp slowdown in global industrial production growth.

Low-income economies experienced significant output losses amid elevated borrowing costs compared to their pre-pandemic paths. Financial conditions in Emerging Markets and Developing Economies (EMDEs) were tight, especially for sovereigns with weaker creditworthiness, resulting in increased financial strains evidenced by substantial currency depreciations and capital outflows. Growth in sub-Saharan Africa decelerated to 2.9 percent in 2023, influenced by heightened living expenses, which dampened consumption growth, alongside an escalation of political instability in certain areas of the region. The region also faced high debt and interest rates, which constrained fiscal flexibility and amplified financing requirements.

On the domestic front, 2023 was a notable year in Nigeria marked by elections and a salvo of new policy shifts with significant impacts on livelihood and economic activities. As a result, the country's growth is estimated to be 2.9 percent in 2023, according to the World Bank estimate. There was a significant weakening in services growth in 2023, partially attributed to a disruptive currency demonetization policy implemented in the first quarter of the year, and inflationary pressure. Annual oil production experienced a notable increase following a decline in previous years.

Recognizing the need to put the country on a sustainable growth path, the new administration implemented reforms to revitalize the economic fundamentals and foster inclusive growth. The Nigerian government abolished the gasoline subsidy, consolidated multiple foreign exchange (FX) windows that had distorted relative prices, deregulated the exchange rate to reflect market dynamics more accurately and removed restrictions on purchasing FX in the official market for importing product lines.

Global growth in 2024 will likely remain steady at 3.1 percent (according to the International Monetary Fund) due to greater-than-expected resilience in the United States and several large Emerging Markets and Developing Economies. With disinflation and steady growth, the likelihood of a hard landing has receded, and risks to global growth are broadly balanced. On the upside, faster disinflation could further ease financial conditions. On the downside, new commodity price spikes from geopolitical shocks - including continued attacks in the Red Sea - and supply disruptions or more persistent underlying inflation could prolong tight monetary conditions.

In sub-Saharan Africa, growth is projected to rise from an estimated 3.3 percent in 2023 to 3.8 percent in 2024 as the negative effects of earlier weather shocks subside and supply issues gradually improve. As macro-fiscal reforms gradually bear fruits, Nigeria is expected to post improved growth in 2024, projected at 3.3 percent. The country's inflation is expected to gradually ease as the effects of last year's exchange rate adjustments and elimination of fuel subsidies diminish. Also, the structural reforms are expected to bolster Nigeria's fiscal revenue this year.

We proactively assess the risk in the macroeconomic space using different tools scenario planning, stress testing etc. This enhances the ability to digest every unfolding scenario and trigger actions to detect and optimize opportunities whilst identifying and managing threats effectively.

We are fully committed to navigating emerging and evolving risks within this demanding landscape. Our confidence for 2024 is rooted in the robust foundation we have diligently established over the years. Substantial investments in digital and technological capabilities have been made to capitalize on opportunities and maintain competitiveness amidst heightened competition and disruptions.

We take pride in our extensive talent pool and have implemented an integrated framework to assess risk across the entire holding

company.

Whilst we recognize the forthcoming challenges, we are well-equipped and resolute in our pledge to serve our customers, shareholders, and communities. Together, we will continue to advance Access Holdings Plc's vision of creating a globally connected community and ecosystem inspired by Africa for the world.

## **ENTERPRISE-WIDE RISK MANAGEMENT**

With our promise of striving to create a globally connected community and ecosystem inspired by Africa for the world, our Enterprise-wide Risk Management (ERM) Policy is hinged on establishing risk oversight, monitoring, and reporting that fosters enterprise-wide risk integration. The ERM policy ensures that Access Holdings Plc (The Company) strives for sustainable financial success while strengthening its relationship with diverse stakeholders.

We apply a bespoke risk management framework in identifying, assessing, monitoring, controlling, and reporting the inherent and residual risks associated with the pursuit of these ambitions and ensuring they are achieved optimally.

Risk strategies and policies are set by the Board of Directors of the Company. These policies, which define acceptable levels of risk for day-to-day operations as well as the willingness of the Company to assume risk, weighed against the expected rewards, are detailed in the Enterprise-Wide Risk Management (ERM) Policy. ERM is a structured approach to identifying opportunities, assessing the risk inherent in these opportunities, and actively cost-effectively managing these risks. Specific policies are also in place for managing risks in the different core risk areas including credit, compliance, market, operational, liquidity, strategic, reputational risks, Information and Cyber Security, payment system risks, and investment risks.

The Company's overall risk tolerance is established in the context of our earning power, capital, and diversified business model. On the other hand, the organisational structure and business strategy are aligned with our risk management philosophy.

The Company regularly reviews risk exposure limits risk control and self-assessment to position itself against adverse scenarios. This is an invaluable tool that it uses to predict and successfully manage both local and global shocks with impacts from the macroeconomy. To contain market volatility and economic uncertainties, the company regularly subjects its exposures to stress tests across various products, currencies, portfolios, and customer segments.

The Risk Management Division is part of the second line of defense. It supports the Company's risk policy through oversight of the verticals by constantly monitoring risk to identify and quantify significant risk exposures and acting upon such exposures as necessary.

Our Risk Management practices are also cascaded across the verticals in the Company. Each vertical has unique risks and an overall governance framework to manage these risks.

Access Holdings Plc approaches to risk, capital, and value management in a comprehensive and integrated manner, and we believe that our initiatives and practices have positioned us at the leading edge of risk management.

## **RISK MANAGEMENT PHILOSOPHY, CULTURE, APPETITE, AND OBJECTIVES**

Access Holdings Risk Management's philosophy and culture remain fundamental to delivering our strategic objectives and are at the core of the Company's operating structure. We seek to limit adverse variations in earnings and capital by managing risk exposures within our moderate risk appetite. Our risk management approach includes minimizing undue exposure concentrations, limiting potential losses from stress events, and prudent liquidity management.

The Company's risk-conscious management process across all the verticals will continue to achieve desired results as evidenced by improved risk ratios and independent risk ratings. Also, in line with its core value of excellence, the Risk Management groups are continuously evolving and improving, given the context that all market developments, including those of extreme nature, need to be anticipated and planned for.

Executive Management has remained closely involved with significant risk management initiatives, which have focused on preserving appropriate levels of asset quality, liquidity, and capital while optimizing the risk portfolios.

Risk management is fundamental to the Company's decision-making and management process. It is embedded in the role of all employees via the organizational culture, thus enhancing the quality of strategic, capital allocation, and day-to-day business decisions.

Access Holdings Plc considers risk management philosophy and culture as the set of shared beliefs, values, attitudes and practices that characterise how it considers risk in everything it does, from strategy development and implementation to its day-to-day activities. In this regard, the Company's risk management philosophy is that a moderate and guarded risk attitude ensures sustainable growth in shareholder value and reputation.

The Company believes that enterprise-wide risk management provides superior capabilities to identify and assess the full spectrum of risks and enables staff at all levels to understand better and manage risks. Enterprise-wide risk management ensures that:

- Risk acceptance is done in a responsible manner
- The Executives and the Board of the Bank have adequate risk management support
- Uncertain outcomes are better anticipated
- Accountability is strengthened
- Stewardship is enhanced

The Company identifies the following attributes as guiding principles for its risk culture.

- a) Management and staff:
  - Consider all forms of risks in decision-making
  - Work with the verticals to create and evaluate the vertical's risk profiles to consider what is best for each business and what is optimal for the Company.
  - Adopt a portfolio view of risk in addition to understanding individual risk elements.
  - Retain ownership and accountability for risk and risk management at the business unit or other points of influence.
  - Accept that enterprise-wide risk management is mandatory and not optional.
  - Document and report all significant risks and enterprise-wide risk management deficiencies
  - Adopt a holistic and integrated approach to risk management and bring all risk reporting together under a simple point of truth.
  - Empower risk officers to perform their duties professionally and independently without undue interference.
  - Ensure a clearly defined risk management governance structure
  - Strive to maintain a conservative balance between risk and profit considerations
  - Continue to demonstrate appropriate standards of behaviour in the development of strategy and pursuit of objectives.
- b) Risk officers' partner with other stakeholders within and outside the company in each entity and are guided in exercising their powers by a deep sense of responsibility, professionalism, and respect for other parties.
- c) The Company ensures the entities partner with their customers to improve their attitude to risk management and encourage them to build corporate governance culture into their business management.
- d) Risk management is governed by well-defined policies, which are communicated across the Company.
- e) Equal attention is paid to both quantifiable and non-quantifiable risks.
- f) The Company avoids products and businesses it does not understand.

## **GROUP RISK OVERSIGHT APPROACH**

Managing risk is a fundamental part of all businesses. Access Holdings Plc operates risk as part of a long-term resilience strategy. Risk management is embedded in all levels of the Company and is part of the daily business activities and strategic planning to have a sustainable competitive advantage.

To achieve its risk management objectives, the Company relies on a risk management framework comprising risk policies and procedures formulated for assessing, measuring, monitoring, and reporting risks, including limits set to manage the exposure to quantifiable risks. The Company recognizes that effective risk management is based on a sound risk culture, which is characterized, amongst others, by a high level of awareness concerning the organization's risk management.

Our risk governance framework, of which the risk appetite framework is a significant element, ensures the appropriate oversight and accountability for effectively managing risk. Our oversight starts with the strategy setting and business planning process. These plans help us articulate our risk appetite, which is set as risk appetite limits for each subsidiary.

We actively promote a strong risk culture where employees are encouraged to be accountable for identifying and escalating risks.

Expectations on risk culture are regularly communicated by senior management, reinforced through policies and training, and considered in the performance assessment and compensation processes.

The Risk function coordinates the process of monitoring and reporting risks across the Company and its subsidiaries.

Internal Audit is responsible for auditing the functions of risk management and control structures to ensure that all units charged with risk management (both first and second lines of defense) perform their roles effectively. They also test the adequacy of internal control and make appropriate recommendations where necessary.

## **RISK APPETITE**

Considering all relevant risks and its verticals, the Company's risk appetite, which the Board of Directors owns, expresses the aggregate level of risk that we are willing to assume in the context of achieving our strategic objectives.

Risk appetite is derived using both quantitative and qualitative criteria. Risk appetite concerning the major risks the Company is exposed to are regulated by limits and thresholds. These metrics aid in reaching our financial targets and guiding the Bank's profitability profile. Following the Company's risk appetite, we are firmly committed to maintaining a moderate risk profile, which has been defined and cascaded measurably. The risk profile is managed based on an integrated risk management framework. This framework identifies all types of risks to provide one integrated view of the risk profile for all the business entities.

## **RISK MANAGEMENT OBJECTIVES**

The broad risk management objectives of the Access Holdings Plc are:

- To achieve leading financial stability indicator metrics such as asset quality, capital, and liquidity ratios.
- To enhance credit ratings, as well as depositor, analyst, investor, and regulator perception.
- To protect against unforeseen losses and ensure the stability of earnings across the subsidiaries.
- To minimise adverse reputation risk issues as well as regulatory compliance issues
- To identify and manage existing and new risks in a planned and coordinated manner with minimal disruption and cost.
- To maximise earnings potential and opportunities.
- To maximise share price and stakeholder protection.
- To develop a risk culture that encourages all staff to identify risks and associated opportunities and to respond to them with cost-effective actions.

## **Scope of risks**

The Company identifies the following key risk categories within its risk management framework, among others.

- Credit Risk
- Operational Risk
- Market and Liquidity Risk
- Capital Risk Management
- Legal and Compliance Risk
- Information and Cyber Security Risk
- Environmental and Social Risk
- Reputational Risk
- Strategic Risk
- Investment Risk
- Pension Risks
- Payment System Risks
- Fraud Risk
- Settlement Risks
- Compliance Risks etc.

## **THE BOARD AND MANAGEMENT COMMITTEES**

The Board is responsible for the Company's risk organization and ensuring satisfactory internal control. It carries out its oversight function through its standing committees. Each charter clearly defines its purpose, composition, structure, frequency of meetings, duties, tenure, and reporting lines to the Board.

In line with best practice, the Chairman of the Board does not sit on any of the Committees. The Board has seven standing committees: The Board Risk Management Committee, the Board Audit Committee, the Board Remuneration Committee, the Board Governance and Nomination Committee, the Board Digital, and IT Committee, and the Board Finance and Investment Committee.

The management committees that exist in the company and its verticals include:

- Group Committee of CEOs of Subsidiaries.

- The Management Committee meeting of the corporation (MANCO).
- Group Risk Management Committee (GRMC).
- Executive Committee (EXCO) at the various subsidiaries.
- Risk committees at the various Subsidiaries.
- Management Credit Committee (MCC) and Group Asset & Liability Committee (Group ALCO) at the Banking group.
- Digital Steering Committee (DSC), Information Security Council (ISC), and Operational Risk Management Committee (ORMC) at the Banking group among others.

Without prejudice to the roles of these committees, the full Board retains ultimate responsibility for risk management.

The Company uses consistent risk terminology as best as possible to enable alignment in risk aggregation and measurement across its verticals. The Banking Group forms a major part of its risk.

The following are the risks across the company:

### **CREDIT RISK MANAGEMENT**

In Access Holdings Plc and its verticals, everyone is involved in Risk Management, with ultimate responsibility residing with the Board. We operate the three (3) lines of the defense model, which enhance the understanding of risk management and control by clarifying roles and responsibilities. The risk management process of the verticals is well fortified to mitigate and/or eliminate any risk events on their business.

The banking group took a proactive approach to protect the loan book from economic shocks leveraging scenario planning and stress test exercises. This enabled us to understand our customers' challenges and outlook and to take steps to ensure loan repayment of our borrowers and preserve the risk assets quality of the bank, working within regulatory guidance.

The Risk Management function of each vertical is encouraged to take advantage of advancement and innovation in the technology space to automate the management of risk. Credit and analytics tools are in use to enhance the credit decision-making and monitoring process in various businesses. The Risk Dashboard has been enhanced to present measurable risk metrics for ease of decision-making. These dashboards exist at the individual business and aggregate at the Company level to ensure adequate and timely tracking of risks.

### **PRINCIPAL CREDIT POLICIES**

The following are some of the principal credit policies across the relevant businesses of the Company:

**Credit Risk Management Policy:** The core objective is to enable the maximisation of returns on a risk-adjusted basis from banking book credit risk exposures that are brought under the ambit of the Credit Risk Management Policy. This is done by putting in place robust credit risk management systems consisting of risk identification, risk measurement, setting of exposure and risk limits, risk monitoring and control as well as reporting of credit risk in the banking book.

### **CREDIT PROCESS**

The credit process in the lending subsidiaries starts with portfolio planning and target market identification. Within identified target markets, credits are initiated by relationship managers. The proposed credits are subjected to review and approval by relevant credit approval authorities. Further to appropriate approvals, loans are disbursed to beneficiaries.

Both relationship management teams and the Credit Risk Management Group undertake ongoing monitoring and management of loans.

A loan request is initiated by the relationship officer and reviewed by the relationship manager/Sector Head/Group Head of the respective business teams or through a digital platform after fulfilling all the required KYC and documentation. Further detailed review is carried out by Credit Risk Management. The concurrence of Credit Risk Management must be obtained for any credit extension. If the loan application passes the detailed analysis, it is submitted to the appropriate approval authority based on the size and risk rating of the facility.

The standard credit evaluation process is based both on quantitative figures from the Financial Statements and on an array of qualitative factors such as the PESTLE analysis, SWOT analysis, Porter's five forces, etc. Information on the borrower and pertinent macroeconomic data are collected, such as an outlook for the relevant sector. These factors are assessed by the analyst and all individuals involved in the credit approval process, relying not only on quantitative factors but also on extensive knowledge of the company in question, its management, industry, the country of operation, and the impact of globalisation.

### **TRAINING / CERTIFICATION**

In line with the CBN's competency framework, members of the Company have consistently upgraded their competency level by passing necessary certification examinations like Certified Risk Manager (Risk Management Association of Nigeria), ACIB (CIBN), ICAN, ACCA, CFA, FRM, and other relevant professional certifications.

The Company has also partnered with renowned international firms like Dun and Bradstreet, KPMG, and Moody’s Analytics for training in Credit Risk Analysis and Financial Risk Management for the first and second lines of defence. These are in addition to regular internal training to enhance staff capacity in handling transactions in the dynamic business environment and ever-evolving financial services industry.

## **CREDIT RISK CONTROL AND MITIGATION**

### **AUTHORITY LIMITS ON CREDIT IN THE BANKING GROUP**

The highest credit approval authority is the Board of Directors, supported by the Board Credit Committee and followed by the Management Credit Committee in the banking group. Individuals are also assigned credit approval authorities in line with the Banking group’s criteria for such delegation set out in its Credit Risk and Portfolio Management Plan.

The credit approval limits of the principal officers of the banking group are shown in the table below:

In addition, approval and exposure limits based on internal Obligor Risk Ratings have been approved by the Board for the relevant approving authorities and credit committees as shown in the second table below:

<b>APPROVING AUTHORITY</b>	<b>APPROVED LIMIT (New Credits) Standard Grade (NGN)</b>	<b>APPROVED LIMIT (New Credits Investment Grade) NGN</b>	<b>Renewal of Existing Credits (NGN)</b>
Executive Director	200 million	250 million	300million
Executive Director African Subsidiary	200 million	250 million	300million
Deputy Managing Director	600 million	700 million	800million
Managing Director/CEO	800 million	900 million	1,000million

Access Bank Risk Rating	Exposure Limit (ORR-based LLL) (NGN)	Management Committee Approval Limit (NGN)	Credit Approval Limit (NGN)	Board Committee Approval Limit (NGN)	Board of Directors Limit
1	60 billion	40 billion		60 billion	Legal lending limit
2+	50 billion	20 billion		40 billion	
2	40 billion	10 billion		20 billion	
2-	25 billion	5 billion		15 billion	
3+	5 billion	4 billion		10 billion	
3	3 billion	3 billion		10 billion	
3-	1 billion	2 billion		5 billion	
4		Above 0.1 billion			

## OPERATIONAL RISK MANAGEMENT

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, or systems, or from external events. Our definition of operational risk excludes regulatory risks, strategic risks, and potential losses related solely to judgments about taking credit, market, interest rate, liquidity, or insurance risks.

It also includes the reputation and franchise risk associated with business practices or market conduct in which all the subsidiaries of Access Holdings Plc are involved. Operational risk is inherent in the business activities across the subsidiaries and as with other risk types, is managed through an overall framework designed to balance strong corporate oversight with well-defined independent risk management.

This framework across the company and its subsidiaries reflects:

- Recognition of risk ownership by the businesses
- Oversight by independent risk management
- Independent review by Internal Audit

Access Holdings Plc and all its subsidiaries have a Business Continuity Plan that defines how it manages incidents in case of a disaster or other disruptive incidents, and how to recover its activities within set deadlines. The purpose of the plan is to:

- Predefine the resources and specify actions required to minimise losses that might otherwise result from a business interruption irrespective of the cause
- Ensure a business-as-usual level of performance while in contingency mode
- Ensure the timely and orderly restoration of business activities across all its subsidiaries.

The Business Continuity Plan (BCP) activities carried out have also been documented in the necessary policies.

We seek to minimise exposure to operational risk, subject to cost trade-offs. Operational risk exposures are managed through a consistent set of management processes that drive risk identification, assessment, control, and monitoring. Our operational risk strategy seeks to minimise the impact that operational risk can have on stakeholder value. The strategy is to:

- Reduce the likelihood of expected events and related costs by managing the risk factors and implementing loss prevention or reduction techniques to reduce variation in earnings across the subsidiaries.
- Minimise the impact of unexpected and catastrophic events and related costs through risk financing strategies supporting long-term growth, cash flow management, and balance sheet protection.

- Eliminate inefficiencies, improve productivity, optimise capital requirements, and improve overall performance through the Company through well-designed and implemented internal controls

To create and promote a culture that emphasizes effective operational risk management and adherence to operating controls, there are three distinct levels of operational risk governance structure across the company and its subsidiaries:

Level 1 refers to the oversight function carried out by the Board of Directors, the Board Risk Management Committee, and the Executive Management. Responsibilities at this level include ensuring effective management of operational risk and adherence to the approved operational risk policies.

Level 2 refers to the management function carried out by the risk management functions in each subsidiary across the Company. It has direct responsibility for formulating and implementing the Bank's operational risk management framework including methodologies, policies, and procedures approved by the Board.

Level 3 refers to the operational risk ownership carried out by all the business units and support functions across Access Holdings Plc and its subsidiaries. These units/functions are fully responsible and accountable for the management of operational risk in their units. They work in liaison with Risk Management to define and review controls to mitigate identified risks. The Internal Audit function across the company and its subsidiaries provides an independent assessment and evaluation of the Bank's operational risk management framework. This periodic confirmation to test controls, and compliance with approved policies and procedures, assures the effectiveness of the company's operational risk management framework as well as its verticals. Some of the tools being used to assess, measure and monitor operational risks include a loss database of operational risk events; an effective risk and control self-assessment process that helps to analyse business activities and identify operational risks that could affect the achievement of business objectives; and key risk indicators which are used to monitor operational risks on an ongoing basis.

## **MARKET RISK MANAGEMENT**

The earnings and capital of the individual subsidiaries in the Company are exposed to risk due to adverse changes in market prices. Consequently, a leading market risk management framework is in place to manage exposure to adverse changes in interest rates, foreign exchange, and equity prices.

The objective is to ensure exposure to these risks through the trading and banking book positions is kept within the Company's defined risk appetite and tolerance.

### **MARKET RISK POLICY, MANAGEMENT, AND CONTROL**

Over the years, the Nigerian financial market has witnessed a dramatic expansion in the array of financial services and products. This tremendous growth in scale and scope has also generated new risks with global consequences, especially market risk, necessitating an assessment of exposures to the volatility of the underlying risk drivers. This has prompted the upgrading of the Market Risk Policy; Asset and Liability Management Policy; Liquidity Policy; and Stress Testing Policy, in the Banking Group to ensure the risks faced across business activities and on an aggregate basis are within the stipulated risk appetite of the Bank and Access Holdings Plc. These policies have been benchmarked with industry-leading practices and CBN regulations.

The banking group runs an integrated and straight-through processing treasury system to enable efficient monitoring and management of interest rate and foreign exchange risks.

Liquidity, Exchange Rate, and Interest Rate risks are managed through various approaches, viz. Liquidity Gap Analysis, Dynamic Cash Flow Analysis, Liquidity Ratios, Earnings at Risk (EaR), and Sensitivity Analysis. The primary aim of these processes is risk forecasting and impact mitigation through management action and portfolio rebalancing.

The banking group regularly conducts stress testing to monitor its vulnerability to unfavorable shocks. It monitors and controls its risk, using various internal and regulatory risk limits for the trading book and banking book which are set according to several criteria including economic scenarios, business strategy, management experience, peer analysis, and the Bank's risk appetite. The applicable stress tests are conducted for each entity and at the Company level.

## **BANKING BOOK**

Market risk management actively manages the Banking book of the banking entity to optimise its income potential. This risk arises from the mismatch between the future yield on assets and their funding cost, due to interest rate changes. The Banking subsidiaries use a variety of tools to track and manage this risk:

- Re-pricing gap analysis
- Liquidity gap analysis
- Earnings-at-Risk (EAR) using various interest rate forecasts
- Sensitivity Analysis

## **INTEREST RATE RISK**

Interest rate risk is the exposure of the Bank's earnings to adverse movements in interest rates, yield curves and credit spreads. The Company's subsidiaries are exposed to interest rate risk through the interest-earning assets and interest-bearing liabilities in its trading and banking books.

### **i. RE-PRICING AND LIQUIDITY GAP ANALYSIS**

The Banking group's objective for the management of interest rate risk in the banking book is to manage interest rate mismatch and lower interest rate risk over an interest rate cycle. This is achieved by hedging material exposures with the external market.

The Banking group's operations are subject to the risk of interest rate fluctuations to the extent that interest-earning assets and interest-bearing liabilities mature or re-price at different times or in differing amounts. In the case of floating-rated assets and liabilities, it is exposed to basis risk, which is the difference in re-pricing characteristics of the various floating rate indices, such as the savings rate and 90-day NIBOR and different types of interest.

Non-traded interest rate risk arises in the banking book of the banking group from the provision of retail and wholesale (non-traded) banking products and services, as well as from certain structural exposures within its balance sheet, mainly due to re-pricing timing differences between assets, liabilities, and equities. These risks impact both the earnings and the economic value of the Group. Overall, non-trading interest rate risk positions are managed by the Treasury, which uses investment securities, advances to banks, and deposits from banks to manage the overall position arising from the Group's non-trading activities.

### **ii. EARNINGS-AT-RISK APPROACH**

Earnings at risk is the potential change in net income due to adverse movements in interest rates over a defined period. It guides the verticals in the Company to understand the impact that a change in interest rates can make on their position and projected cash flow.

The Company's verticals have limits set for this risk measure. They are designed to monitor and control the risk to our projected earnings using various rate scenarios and assumptions. The limit is expressed as a change in projected earnings over a specified time horizon and rate scenario. Scenarios adopted include parallel and non-parallel shifts in yield.

### **iii. SENSITIVITY ANALYSIS**

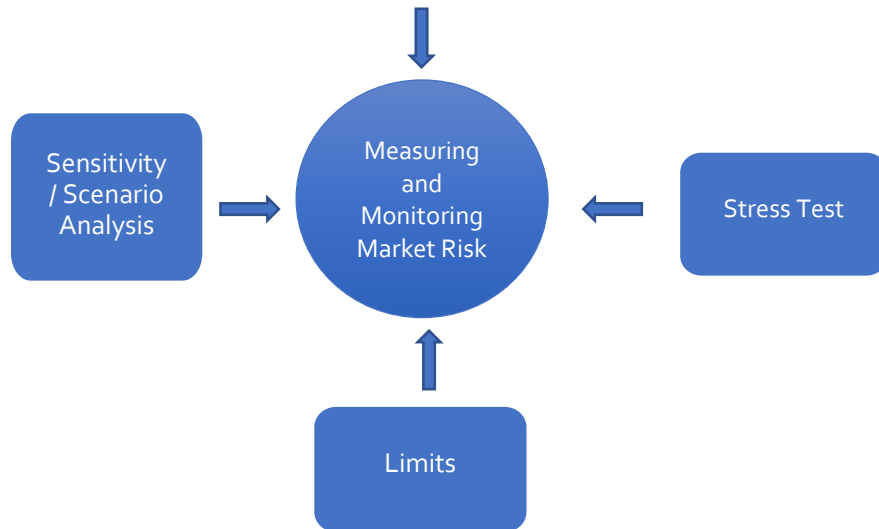

The Banking Group uses scenario and sensitivity analysis to evaluate its exposures per time. Scenario analysis is predicting the possible balance sheet impact on changes that may occur to existing variables. In contrast, sensitivity analysis studies how a decision's outcome changes due to input variations.

## **TRADING PORTFOLIO**

The measurement and control techniques used to measure, and control traded market risk (interest rate and foreign exchange risk) include daily valuation of positions, limit monitoring, gap analysis, sensitivity analysis, stress testing, etc. as summarised in the diagram below.

## LIMITS

Risk limits are used to restrict the size of investments that traders can take for proprietary and non-proprietary purposes. Limiting the size of investments is one of the primary ways to control risk and capital consumption. The following limits currently exist.

**Fixed income and FX Open Position Limits (NOPL):** The Banking group in keeping with the prudence concept, sets its policy limit for Open Positions at a level lower than the maximum NOPL approved by the regulatory authority. In setting the internal NOPL, the following considerations are imperative:

- The Regulatory NOPL
- The Bank's tolerance and appetite for FX risk
- The size and depth of the FX market in Nigeria
- The degree of volatility of traded currencies
- The Bank's desired positioning in the relevant FX market with requirements for international business support

**Management Action Trigger (MAT):** This establishes decision points to confirm the Board of Director's tolerance for accepting trading risk losses on a cumulative basis. MAT, therefore, considers actual cumulative profit/loss, as well as potential losses and the loss tolerance, is defined as a percentage of Gross Earnings.

**Stop Loss Limit:** This limit sets a maximum tolerable unrealised profit/loss to date which will trigger the closing or reduction of a position to avoid any further loss based on existing exposures.

**Dealer Limits:** This limit sets a maximum transaction limit for a dealer. It is based on the experience and knowledge of the dealer.

### Duration Limit

The verticals in the subsidiary utilise duration to measure the sensitivity of the price of assets in its portfolio to changes in interest rates. They have duration limits for the varying asset classes in their investment/trading portfolio.

## MARK TO MARKET (MTM)

The marking-to-market technique establishes the potential profit and loss by revaluing money market exposures to prevailing market prices. When no market prices are available for a specific contract period, mark-to-model is used to derive the relevant market prices. The policy requires a revaluation of all exposures categorised under the securities trading portfolio daily. As a general guide, marking to market is performed independently of the trading unit i.e. prices/rates are obtained from external sources.

## STRESS TESTING

A consistent stress testing methodology is applied to trading and non-trading books. The stress testing methodology assumes that the scope for management action would be limited during a stress event, reflecting the decrease in market liquidity that often occurs.

Stress testing is an integral part of the market risk management framework and considers both historical market events and forward-

looking scenarios. Stress testing indicates the potential size of losses that could arise in extreme but plausible conditions. It helps to identify risk concentrations across business lines and assists senior management in capital planning decisions.

#### **LIQUIDITY RISK MANAGEMENT**

Liquidity risk is the potential that the Bank may be unable to meet expected or unexpected current or future cash flows and collateral needs without affecting its daily operations or its financial condition. The Banking group preserves a high degree of liquidity so that it can meet the requirements of its customers always, including during periods of financial stress.

The Banking Group has developed a liquidity management framework based on a statistical model underpinned by conservative assumptions about cash inflows and the liquidity of liabilities. In addition, liquidity stress tests assuming extreme withdrawal scenarios are performed. These stress tests specify additional liquidity requirements to be met by holdings of liquid assets.

The liquidity has consistently been materially above the minimum liquidity ratio and the requirements of its stress tests. The Group ALCO, in conjunction with the Board and its committees, monitors the liquidity position in the Banking Group and reviews the impact of strategic decisions on liquidity. Liquidity positions are measured by calculating the Bank's net liquidity gap and by comparing selected ratios with targets as specified in the Liquidity Risk Management Manual.

#### **CAPITAL RISK MANAGEMENT**

Capital risk is the risk of possible erosion of Access Holdings Plc and its subsidiaries' capital base due to poor capital management.

##### **Capital management objectives:**

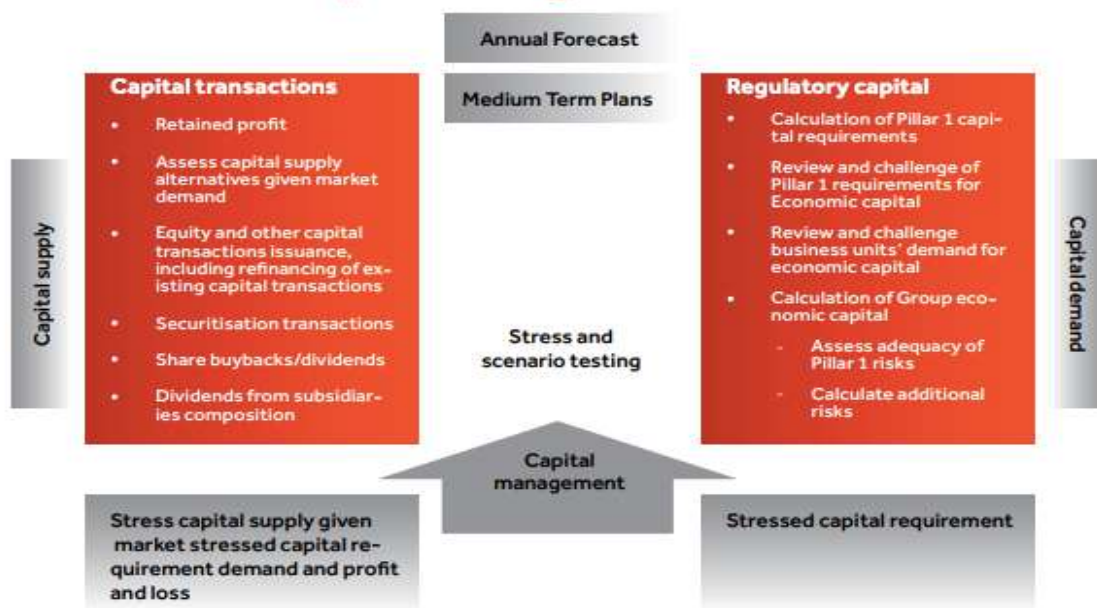

The capital management objectives include:

- To meet the capital ratios required by its regulators and the Board.
- To maintain an adequate level of available capital resources as cover for the economic capital (EC) requirements
- To generate enough capital to support asset growth.

##### **CAPITAL MANAGEMENT STRATEGY:**

The capital management strategy is focused on maximizing shareholder value by optimizing the level and mix of capital resources. Decisions on the allocation of capital resources are based on several factors including return on economic capital (EC) and regulatory capital (RC) and are part of the internal capital adequacy assessment process (ICAAP).

## Capital Management Process

### IMPORTANCE OF CAPITAL MANAGEMENT

Capital management is critical to survival. Hence, capital is managed as a board-level priority. The Board is responsible for assessing and approving the Group's capital management policy, capital target levels, and capital strategy. A capital management framework provides effective capital planning, capital issuance, alignment to the Basel accord, EC utilisation and economic profit (EP) performance measurement criteria. The diagram above illustrates the process to ensure end-to-end integration of strategy, risk management, and financial processes into the capital management process. The purpose is to ensure that capital consumption in the business divisions is planned for and reflected in their performance measurement, which in turn translates into management performance assessment, product pricing requirements, and achievement of the overall strategy within the company's risk appetite.

### COMPLIANCE RISK MANAGEMENT

The compliance function organises and sets priorities for the management of its compliance risk in a way that is consistent with low-risk management strategy and structures.

The integrated compliance function working closely with Internal Audit and Risk Management to achieve risk convergence provided the backbone for integrated assurance and higher visibility of risk management and control consciousness across the Company and its subsidiaries.

The compliance function has continued to redefine and fine-tune its approach and continue to improve on its advisory role with an intense focus on regulatory intelligence gathering, compliance monitoring, compliance testing, and closer cooperation with business units within the Bank. The Compliance function in the Banking group acts as a contact point for compliance inquiries from verticals through a shared service. The Business Unit Compliance Officers' business units and Quality Assurance desks across the business units have further strengthened and deepened the cooperation with the first line of defence.

We enhanced the monitoring to online real-time to catch up with the current digital banking environment. We receive alerts of transactions on a risk-based approach by focusing on the high-risk areas thereby spotting non-conformities on time.

### MEASUREMENT, MONITORING AND MANAGEMENT OF COMPLIANCE RISK

In the verticals and across the company, compliance is monitored by the following:

- A reference to identified metrics, incident assessments (whether affecting it or the wider industry), regulatory feedback, Compliance Testing, and the judgment of our external assessors as it relates to AML/CFT and other compliance vulnerabilities
- Monitored against our compliance risk assessments and metrics, the results of the continuous monitoring and reporting activities of the compliance function, and the results of internal and external audits and regulatory inspections
- Managed by establishing and communicating appropriate policies and procedures, training employees on them and monitoring activity to assure their observance.

The effective convergence of risk management deepens the compliance risk management philosophy through the 'Three Lines of Defence' model and all staff, are committed to high standards of integrity and fair dealing in business conduct. The Company continues to recognise its accountability to all its stakeholders under the legal and regulatory requirements applicable to its business.

## **INFORMATION AND CYBERSECURITY RISK MANAGEMENT**

The global cybersecurity threat landscape has continued to evolve with increasing dynamism since the onset of the covid-19 pandemic and its impact on social interactions has led to both increased digital collaboration between malicious threat actors and the commercialization of cybercrime. Our approach to this malaise is hinged on a proactive cyber strategy that combines a solid defensive foundation, deep threat intelligence and resilience capabilities.

Hence, as part of these strategic initiatives, the subsidiaries in the company have established a comprehensive cybersecurity framework and implemented a defence-in-depth approach to protect our information assets (most especially our crown jewels), our human capital and our business across the Company. The Security function has been expanded to cover Cybersecurity Governance, 3rd Party Risk and Application Programming Interface (API) Management, Forensic Analysis, and Incident Response. The Banking group also provides the required support through a shared service.

A key digital change in the mode of operations is reflected in our steady drive to improve incident detection and response capabilities to deliver more resiliency and prevent breaches across the subsidiaries and Access Holdings Plc.

As the Banking group continues to grow its retail base, and the payment company deepens its product offerings, close attention is paid to cybersecurity given the digital threat landscape and constant operational security challenges of our environments. Therefore, a particular initiative that our proactive and defensive measures deliver is a reduction of our attack surface to the barest minimum to ensure there is no financial loss. We are also constantly improving our visibility into potential anomalous digital interactions across the Company through our world-class 24/7 Security Operations Center (SOC).

We have also implemented global best-practice security frameworks to ensure compliance with both regulatory requirements and international standards. This is followed up with a yearly compliance reassessment of our status as part of our cyber governance across the Company and its verticals. Our human capital is a cardinal part of our strategy, and their capability is constantly being honed through user awareness training. Through this, our technical controls are well complemented by an alert workforce, whose ability to recognise the tricks of hackers with their malicious appendages is highly developed, therefore, disrupting the cyber-attack chain and improving our collective resistance to social engineering attacks.

The constant improvement and breakthroughs in technology, as well as the never-ending desire to improve services, have made Digital Banking, Fintech Integration, and cloud Adoption, key strategic objectives. Therefore, as we work towards realising these objectives, the implementation of proper risk mitigation measures will reduce the business risks inherent in these opportunities and deliver more optimal outcomes. We are committed to maintaining a "moderate overall cyber risk appetite" while driving compliance and resilience.

## **ENVIRONMENTAL AND SOCIAL RISK MANAGEMENT**

The main objective of our environmental and social ("E&S") risk management strategy is to reduce the negative impacts of climate change and harness the opportunities inherent in portfolio transition towards a near-zero economy on our business. We recognize that our customers' activities and operations can impact the environment and communities around them. We have developed, implemented, and refined our approach to working with our customers to understand and manage these issues. Our robust governance framework, policies, and procedures have ensured that we remain resilient in our E&S risk management commitments, particularly as the Banking group has acquired new markets in Africa and globally. The key to managing environmental risk is creating partnerships with our customers across the verticals in the Company aligning activities on our transition path to more sustainable environmental practices. More importantly, our Environmental, Social and Governance (ESG) systems have evolved from environmental and social risks into environmental and social opportunities. This continuous evolution has ensured that we strive towards attaining a more refined ESG risk management structure,

thus building on our E&S pedigree including embedding and automation of our E&S lending risk review processes, and pioneer corporate certified green bonds amongst others.

## **Responding to Climate Change**

We consider climate change to be one of the greatest challenges facing the world today. We are dedicated to achieving the commitments of the Paris Agreement on carbon emissions reductions, whilst ensuring that we stay focused on managing the potential environmental issues. With the increasing awareness around financed emissions and the impact of climate change potential within our portfolio, we have taken strategic steps towards understanding these potential exposures, and their implications and incorporating requisite mitigating measures to manage these risks. We have therefore taken forward-looking measures by becoming a core participating member of internationally recognised climate risk initiatives. These initiatives include:

**UNEP FI's Taskforce on Climate-related Financial Disclosures (TCFD)** was adopted by leading global financial institutions and aimed at identifying and managing the impact of climate risks in the portfolio of Financial Institutions. The banking group became a member of the working group in 2019 and has been working on aligning the emissions from both our operations and our financing activities to the Paris Goal of below two degrees of global warming.

**Partnership for Carbon Accounting Financials (PCAF)** is a global partnership aimed at harmonising the approach to accessing and disclosing greenhouse gas (GHG) emissions associated with loans and investments. The Banking group became a member of the steering group in June 2020. We have built capacity around data collection and incorporating the PCAF methodology to measure our financed emissions.

We have also further developed our climate risk strategy by expanding our portfolio of green assets. We have designed a system to identify, measure, track and report on the progress made in developing a diversified green loan portfolio. We recognise the critical role green product development plays in achieving this objective, and we are at an advanced stage in developing a bouquet of green products to catalyse more green loans into our loan portfolio. We have set targets for reducing the carbon emissions from our operations and have taken strong steps toward achieving this goal.

## **REPUTATIONAL RISK MANAGEMENT**

Reputational risk arises when the reputation of one of the Company's subsidiaries is marred by one or more reputational events from negative publicity about the organization's business practices, conduct or financial condition. Reputational Risk Management is mandated to protect the company from potential threats to its reputation. The risk management function continuously uses proactive means in minimizing the effects of reputational events, thereby averting the likelihood of major reputational crises to ultimately ensure the survival of the organisation. The company and its subsidiaries have put in place a framework to properly articulate, analyse and manage reputational risk factors.

The management of reputational risk is taken seriously because of its far-reaching implications, which are buttressed by the fact that most of the subsidiaries operate under:

- A highly regulated industry with high visibility and vulnerability to regulatory actions that may adversely impact its reputation. (e.g. corporate governance crises)
- Keen competition and largely homogeneous products and services have led customers not to perceive significant differences between financial service providers
- Given the nature of the products and services provided, the reputation risk exposure also includes third parties and clients.
- Increasing use of social media platforms for the dissemination of news, where it is difficult to manage and control negative news even if they are false.

The Company's verticals operate in a global environment; hence risks emerge from a host of different sources and locations that are difficult to keep up with and to know how best to respond if they occur. The effects of the occurrence of a reputational risk event include but are not limited to the following:

- Loss of current or future customers
- Loss of public confidence
- Loss of employees leading to an increase in hiring costs, or staff downtime
- Reduction in current or future business partners
- Increased costs of capitalization via credit or equity markets
- Regulatory sanctions
- Increased costs due to government regulations, fines, or other penalties
- Loss of licenses

The reputational risk policy provides for the preservation of reputation. Reputational risk will arise from the failure to effectively mitigate any or a combination of country, credit, liquidity, market, regulatory and operational risks. It may also arise from the failure to comply with social, environmental governance and ethical standards. All employees are responsible for the day-to-day identification and management of reputational risk.

## COMPILATION OF TRIGGER EVENTS

To assist in the identification of key reputational risk events, triggers that would set off the risk drivers are compiled through regular workshops with participants across the Company. The following table illustrates some trigger events for relevant risk drivers.

Risk Drivers	Trigger Events
Corporate Governance and Leadership	<ul style="list-style-type: none"> <li>• Corporate frauds and scandals</li> <li>• Association with dishonest and disreputable characters as directors, management</li> <li>• Association with politically exposed persons</li> <li>• Incidence of shareholders conflict and Board Instability.</li> </ul>
Regulatory Compliance	<ul style="list-style-type: none"> <li>• Non - Compliance with laws and regulation</li> <li>• Non-submission of Regulatory returns</li> </ul>
Delivering Customer Promise	<ul style="list-style-type: none"> <li>• Security Failure</li> <li>• Shortfall in quality of service/fair treatment</li> <li>• Bad behavior by employees</li> </ul>
Workplace Talent and Culture	<ul style="list-style-type: none"> <li>• Unfair employment practices</li> <li>• Not addressing employee grievances</li> <li>• Uncompetitive remuneration</li> </ul>
Corporate Social Responsibility	<ul style="list-style-type: none"> <li>• Lack of community development initiatives</li> </ul>
Corporate Culture	<ul style="list-style-type: none"> <li>• Lack of appropriate culture to support the achievement of business objectives.</li> <li>• Ineffective risk management practices.</li> <li>• Unethical behaviors on the part of staff and management.</li> <li>• Lack of appropriate structure for employees to voice their concerns</li> </ul>
Risk Management and Control Environment	<ul style="list-style-type: none"> <li>• Inadequate Risk Management and Control environment</li> <li>• Continuous violations of existing policies and procedures</li> </ul>
Financial Soundness and Business Viability	<ul style="list-style-type: none"> <li>• Consistent poor financial performance</li> <li>• Substantial losses from unsuccessful Investment</li> </ul>
Crisis Management	<ul style="list-style-type: none"> <li>• Inadequate response to a crisis or even a minor incident</li> </ul>

## APPROACH TO MANAGING REPUTATION RISK EVENTS

The approach to managing reputational events, including any relevant strategy and policies, is approved by the Board or its delegated committee and subject to periodic review and regularly updated by senior management to ensure that it remains appropriate over time. In addition, the approach is well documented and communicated to all relevant personnel.

## POST-REPUTATION EVENT REVIEWS

After a reputational event, the post-event review is conducted by Internal Audit and Risk Management Division to identify any lessons learnt, or problems and weaknesses revealed, from the event. Such reviews are useful for providing feedback and recommendations for

enhancing the reputation across the Company's reputation risk management process and are conducted on any major event affecting any of the verticals. The Board and senior management are informed of the results of any such review conducted to take appropriate actions to enhance their capacity to manage reputational risk.

## **STRATEGIC RISK MANAGEMENT**

Strategic Risk Management is defined as the process of identifying, assessing and managing risks and uncertainties affected by internal and external events or scenarios that could inhibit the ability to achieve strategic objectives to create and protect shareholder and stakeholder value. It is a primary component and necessary foundation of our Enterprise Risk Management.

Strategic risk management, therefore, is the current or prospective risk to earnings and capital arising from adverse business decisions, improper implementation of decisions, or lack of responsiveness to changes in the business environment. It can also be defined as the management of the risk associated with future business plans and strategies, including plans for entering new business lines, expanding existing services through mergers and acquisitions, and enhancing infrastructure.

The following principles govern strategic risk management across the Company:

The Board and Senior Management are responsible for Strategic Risk Management and oversee the effective functioning of the strategic risk management framework.

The functional units (i.e. the units which carry out business or operational functions) assist the Board and Senior Management in formulating and implementing strategies, providing input to the strategic planning and management processes; as well as implementing the strategic risk management framework.

The risk management function supports the Board and senior management in managing strategic risks and other related processes.

The measures and controls put in place include the following:

- Strategic plans are approved and monitored by the Board.
- Regular environmental scans, business strategy sessions, and workshops are set up to discuss business decisions and exposure to strategic risk triggers.
- Close monitoring to ensure that strategic plans are properly aligned with the business model.
- Regular performance review by Executive Management and business plans that are approved by the Board.

There is also a well-defined succession plan, proper monitoring, and well-defined structures to align its activities to international best practices.

## **ECONOMIC INTELLIGENCE**

The Economic Intelligence (EI) team provides economic, business, and financial analyses supporting the Company and its verticals through a shared service arrangement to achieve their strategic objectives. Its value propositions include assisting the Company's subsidiaries in realising respective targeted moderate risk appetite, price competitiveness, improvement to business intelligence, and brand enhancement.

Some of the Unit's roles and responsibilities include:

- Monitor and interpret current economic developments/trends globally and wherever the Company's subsidiaries are present and prepare economic outlook to aid decision-making.
- We proactively provide industry analysis, identify investment trends and opportunities, monitor, interpret, and conduct policy-relevant research.
- We are developing contact and collaborative economic/business and financial information with research institutes/ bodies within the country and outside.

## INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Access Holdings Plc

### Report on the Audit of the Consolidated and Separate Financial Statements

#### **Opinion**

We have audited the consolidated and separate financial statements of Access Holdings Plc (“the Company”) and its subsidiaries (together, “the Group”), which comprise:

- the consolidated and separate statements of financial position as at 31 December 2023;
- the consolidated and separate statements of comprehensive income;
- the consolidated and separate statements of changes in equity;
- the consolidated and separate statements of cash flows for the year then ended; and
- the notes, comprising material accounting policies and other explanatory information.

In our opinion, the accompanying consolidated and separate financial statements give a true and fair view of the consolidated and separate financial position of the Company and its subsidiaries as at 31 December 2023, and of its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards) and in the manner required by the Companies and Allied Matters Act (CAMA), 2020 and the Financial Reporting Council of Nigeria (Amendment) Act, 2023 the Banks and Other Financial Institutions Act, 2020 and relevant Central Bank of Nigeria (CBN) Guidelines and Circulars.

#### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the consolidated and separate Financial Statements* section of our report. We are independent of the Group and Company in accordance with International Ethics Standards Board for Accountants *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code) together with the ethical requirements that are relevant to our audit of the consolidated and separate financial statements in Nigeria and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated and separate financial statements of the current year. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### **Expected Credit Loss (ECL) allowance on Loans and advances to customers**

The ECL allowance on loans and advances to customers is considered to be of most significance in the audit due to the high level of subjectivity, judgment, and assumptions applied by management in determining the amount to be recognized as loss allowance on the loans and advances to customers.

KPMG Professional Services, a partnership registered in Nigeria and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

Registered in Nigeria No BN 986925

A list of partners is available for inspection at the firm's address.

The Group uses an ECL Model to determine the loss allowance for loans and advances to customers. The ECL Model requires the application of judgments, assumptions and certain financial indices (crude oil prices and prime lending rate) estimated from historical data obtained within and outside the Group as input into the model.

The loss allowance on the loans and advances is the output of the model and key judgments and assumptions include:

- Definition of default adopted by the Group;
- Determination of the criteria for assessing the significant increase in credit risk (SICR);
- Incorporation of forward-looking information based on the economic scenarios within the model;
- Determination of the 12-month and lifetime probability of default (PD) used in the ECL model;
- Estimation of the Loss Given Default (LGD) based on collateral values and other cash flows.

***How the matter was addressed in our audit***

Our audit procedures in this area included, among others:

- We evaluated the design, implementation and operating effectiveness of the key controls over the impairment assessment process such as:
  - The Board Risk Credit Committee’s review and monitoring of the performance of loans and advances to customers;
  - Management review of the model assumptions and inputs; and the resultant ECL allowance arising from the model;
  - Management review and approval of the expected credit losses arising from the model.
- We assessed the Group’s default definition and other qualitative default indicators by checking it to the requirements of the IFRS 9 *Financial Instruments*.
- We tested the appropriateness of the Group’s determination of SICR, defaults and the resultant classification of loans and advances to customers into stages on a sample basis by reviewing the Obligor Risk rating model (ORR) and customers files for the terms of the loans and account statements for due and unpaid obligations.
- For loans and advances to customers that have shown a significant increase in credit risk, we evaluated the level of past due obligations and qualitative factors such as available industry information about the obligors to determine whether the Group should make an estimate based on the losses expected to result from default events within a year or defined default events over the life of the facilities.
- Assisted by our Financial Risk Management (FRM) specialists, we evaluated the appropriateness of the key data and assumptions used in the ECL model of the Group. Our procedures on this regard included the following:
  - We challenged the appropriateness and reasonableness of the Group’s ECL methodology by considering whether it reflects unbiased and probability-weighted amounts that are determined by evaluating a range of possible outcomes, the time value of money, reasonable and supportable information at the reporting date about past events, current conditions and forecasts of future economic conditions.
  - For forward-looking assumptions comprising the Prime lending rate and Crude oil price used, we corroborated the Group’s assumptions using publicly available information from external sources and checked that they were appropriate in the Group’s circumstances.
  - For PD used in the ECL calculation, we reviewed the model used for the obligor risk rating and validated the completeness and accuracy of the data used for default and non-default

- categories for corporate and retail loans by evaluating the reasonability of the obligor risk rating model (ORR). We also checked the Group's PD methodology for reasonability given the current economic circumstance.
- We checked the calculation of the LGD used by the Group in the ECL calculations, including the appropriateness of the use of collateral, by recomputing the LGD, and assessing the haircuts applied by management on the recoverability of collateral considering the current economic conditions. On a sample basis, we analyzed the valuation of collaterals applied in the ECL computations and evaluated the competence of the valuers.
  - We independently re-performed the calculation of ECL allowance for loans and advances to customers using the Group's impairment model and validated key inputs.
- We evaluated the adequacy of the consolidated and separate financial statements disclosures, including the disclosures of key assumptions and judgements, and also assessed whether disclosures in the consolidated and separate financial statements appropriately reflect the Group and Company's exposure to credit risk in line with the requirements of the relevant accounting standards.

The accounting policy on ECL allowance for loans and advances to customers, disclosure on critical judgments and estimates, financial risk management disclosures and notes are shown in Note 3.9, 4.0, 5.1 and 23 respectively in the consolidated and separate financial statements for the year ended 31 December 2023.

### **Valuation of Derivatives**

The Group's derivative instruments comprise foreign currency swaps, non-deliverable forwards and foreign exchange forward contracts, which the Group designated as hedging and non-hedging instruments to manage foreign exchange risk. Management uses a complex valuation methodology involving multiple inputs including discount rates, forward exchange rates, and the spot rate to estimate the fair value of these derivative instruments. We focused on this area due to the significance of these derivatives and the related estimation uncertainty in the fair valuation of these derivative instruments.

### ***How the matter was addressed in our audit***

Our audit procedures in this area included, among others:

- We evaluated and tested the design, implementation and operating effectiveness of key controls over the inputs used in determining the Group and Company's valuation of derivative instruments.
- We inspected derivative contracts on a sample basis and substantiated the terms of the derivatives.
- Assisted by our Valuation specialists, we performed the following procedures:
  - We assessed whether the valuation model used by the Group and Company was in line with acceptable market practice.
  - We validated the inputs used in the valuation model such as discount rates, forward exchange rates, yields, etc. by obtaining quoted rates from relevant external sources, and other relevant markets and compared these to the mark-to-market rates used.
  - We independently developed a range estimate of the fair value of the derivatives assets and liabilities.

- We reviewed the hedge documentation in line with the requirements of IFRS 9 and checked that the hedge ratio is in line with the ratio stated in the approved hedge documentation at inception date.
- We recomputed the spot element of the derivatives to confirm the accuracy of the amount recognized by the Group.
- We evaluated the adequacy and appropriateness of the disclosures made on derivative financial instruments in the consolidated and separate financial statements.

The Group and Company's accounting policy, disclosure on critical judgments and estimates, financial risk management disclosures, and notes are shown in Note 3.22, 4.0, 5.1 and Note 21 in the consolidated and separate financial statements for the year ended 31 December 2023.

**Remeasurement of the financial statements of a subsidiary whose functional currency is the currency of a hyperinflationary economy**

Access Bank (Ghana) Plc, a subsidiary of the Company's flagship subsidiary, Access Bank Plc operated in a hyperinflation economy during the year.

In 2023, Ghana's economic environment showed characteristics which indicates the existence of hyperinflation and therefore the remeasurement of the financial statements in accordance with International Accounting Standards 29: *Financial Reporting in Hyperinflationary Economies* (IAS 29) was applied. The determination of the existence of hyperinflation is a matter of judgement based on the characteristics of the economic environment. The methodology adopted as well as the detailed calculation for the remeasurement of the non-monetary items using the consumer price index (CPI) at the reporting date is complex and requires significant judgement. We focused on this area due to the judgement required and complexity of the methodology adopted in determining the remeasured amounts, as well as the nature of disclosure required in the consolidated financial statements.

***How the matter was addressed in our audit***

Our audit procedures in this area included, among others:

- We evaluated management's assessment of the characteristics of the economic environment of Ghana in 2023 which indicates the existence of hyperinflation.
- We challenged management's assumptions and judgements applied in the selection of the general price index for the assessment of the economy by comparing to publicly available information and economic analysis.
- We evaluated management's methodology and approach to the remeasurement of the financial statements in accordance with IAS 29, by checking the appropriateness of the classification of financial statements items as monetary and non-monetary items.
- We independently evaluated the remeasurement calculations prepared and used to determine the remeasured amounts by checking the accuracy in the computations.
- We evaluated the reliability and reasonableness of the data used in the remeasurement calculations by checking the underlying historical data and publicly available information sources.
- We evaluated the adequacy and relevance of the presentation and disclosures in the financial statements as required by IAS 29.

The Group and Company's accounting policy, disclosure on critical judgments and estimates, and notes are shown in Note 3.5, 4.0, and Note 27 (d) in the consolidated and separate financial statements for the year ended 31 December 2023.

### **Accounting for Business combinations – Reassessment of Provisional Goodwill**

In December 2022, the Group acquired interests in First Guarantee Pensions Limited (FGPL) and Sigma Pensions Limited. First Guarantee Pensions Ltd and Sigma Pensions Limited merged with the surviving entity being Sigma Pensions Ltd, later renamed to Access Pensions Limited. These acquisitions gave rise to a provisional goodwill of N34.94bn in 2022. The provisional goodwill was recognized because the Directors had not concluded the Purchase Price Allocation (PPA) for the acquisitions and elected to record the acquisition-related entries as provisional as at 31 December 2022 as permitted under IFRS 3 *Business Combinations*.

During the year, the Company's purchase price allocation (PPA) for the acquisition was concluded, and the provisional goodwill of N34.94 billion previously recognized was revised to N23.63 billion. Based on the revised PPA, additional intangible assets of N11.29bn related to customer relationships and pension license were identified and recognized separately from the previously recognized Goodwill.

The PPA requires the use of judgments and assumptions in determining the fair value of the identified assets and liabilities. Some of the key judgments and assumptions include:

1. Estimation of future cashflows of the investee entities using the Multi-Period Excess- Earnings Method (MEEM).
2. Determination of the fair value of intangible assets relating to customer relationships and pension license.

### ***How the matter was addressed in our audit***

Our audit procedures in this area included, among others:

3. We were assisted by our valuation specialists to support in challenging the valuations prepared by the Group and the methodology used to identify the assets and liabilities acquired; in particular:
  - We assessed the appropriateness and reasonableness of the valuation model, the cash flow forecasts, cost approaches, and the key assumptions used in the determination of the fair value of the identified assets and liabilities of the acquired entities.
  - We evaluated the key assumptions used to determine the fair value of the intangible assets (customer relationship and pension license) identified from the business combination.
  - We evaluated the accuracy and appropriateness of the balance recognized as intangible assets.

The Group's accounting policy on Business Combinations and disclosure on critical judgments and estimates are shown in Notes 3.3, 4.0 and Note 44 respectively in the consolidated and separate financial statements for the year ended 31 December 2023.

### ***Other Matter***

The consolidated and separate financial statements for the year ended 31 December 2022 were audited by another auditor who expressed unmodified opinion on those consolidated and separate financial statements on 17 April 2023.

### ***Other Information***

The Directors are responsible for the other information. The other information comprises Corporate information, Directors' report, Customers' Complaints & feedback, Report on Fraud and Forgeries, Corporate Governance report, Statement of Directors' Responsibilities, Report of the Statutory Audit Committee, Statement of Corporate Responsibility, and Other National Disclosures, which we obtained

prior to the date of the auditor's report, but does not include the consolidated and separate financial statements and our auditor's report thereon.

Other information also include Philosophy, Geographical coverage, Business Highlights, Awards & Recognitions, Group Chairman's Statement, Group Chief Executive's Statement, Operating Companies' Performance Review, Sustainability Report, Statement of Corporate Responsibility, People and Culture, Security Dealing Policy, The Board, Management Team, Chairmen and MDs of direct subsidiaries, Chairmen and MDs of Access Bank's subsidiaries, Report of the external consultants, Enterprise-wide Risk Management, Credit Risk Management, Operational Risk Management, Market Risk Management, Liquidity Risk Management, Capital Risk Management, Compliance Risk Management, Environment & Social Risk Management, Reputational Risk Management, Strategic Risk Management, Economic Intelligence, Shareholder Engagement, Notice of the Annual General Meeting, Explanatory Notes to the Proposed Resolutions, Dividend History Information, Capital Formation, E-Dividend Mandate form, Shareholder Information Update Form, Proxy form, Investors' Enquires & Complaints Management Policy together the "outstanding reports", which are expected to be made available to us after that date.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information identified above and in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we have obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the outstanding reports, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

#### ***Responsibilities of the Directors for the Consolidated and Separate Financial Statements***

The Directors are responsible for the preparation of consolidated and separate financial statements that give a true and fair view in accordance with IFRS Accounting Standards and in the manner required by the Companies and Allied Matters Act (CAMA), 2020 and the Financial Reporting Council of Nigeria (Amendment) Act, 2023, the Banks and Other Financial Institutions Act, 2020 and relevant Central Bank of Nigeria (CBN) Guidelines and Circulars and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the Directors are responsible for assessing the Group and Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and Company or to cease operations, or have no realistic alternative but to do so.

#### ***Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements***

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group and Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group and Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Statutory Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Statutory Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Statutory Audit Committee, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### **Report on Other Legal and Regulatory Requirements**

*Compliance with the requirements of Schedule 5 of the Companies and Allied Matters Act (CAMA), 2020.*

- i. We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit.
- ii. In our opinion, proper books of account have been kept by the Company, so far as appears from our examination of those books.

- iii. The Company's statement of financial position and statement of comprehensive income are in agreement with the books of account.

*Compliance with Section 26 (3) of the Banks and Other Financial Institutions Act, 2020 and Central Bank of Nigeria circular BSD/1/2004*

- i. The Company and Group paid penalties in respect of contravention of the Banks and Other Financial Institutions Act of Nigeria and CBN Circulars during the year ended 31 December 2023. Details of penalties paid are disclosed in Note 41 to the consolidated and separate financial statements.
- ii. Related party transactions and balances are disclosed in Note 43 to the consolidated and separate financial statements in compliance with the Central Bank of Nigeria circular BSD/1/2004.

*Compliance with FRC Guidance on Assurance Engagement Report on Internal Control over Financial Reporting*

In accordance with the requirements of the Financial Reporting Council of Nigeria, we performed a limited assurance engagement and reported on management's assessment of the Company and Group's internal control over financial reporting as of December 31, 2023. The work performed was done in accordance with ISAE 3000 (Revised) *Assurance Engagements Other Than Audits or Reviews of Historical Financial Information* and the FRC Guidance on Assurance Engagement Report on Internal Control over Financial Reporting. We issued an unmodified conclusion on the effectiveness of the Company and Group's internal control over financial reporting in our report dated 27 March 2024.

## 1.0 General information

Access Holdings Plc (“the company”) is domiciled in Nigeria. The address of the company’s registered office is No 14/15, Prince Alaba Oniru Road, Oniru, Lagos (formerly Plot 999c, Danmole Street, off Adeola Odeku/Idejo Street, Victoria Island, Lagos). The consolidated and separate financial statements of the Company for the year ended 31 December 2023 comprises of the Holding Company and its subsidiaries (together referred to as “the Group” and separately referred to as “Group entities”). The Corporation’s business segments include banking, consumer lending, payment services, insurance brokerage and pension funds administration . The Company is listed on Nigerian Exchange Group.

These financial statements were approved and authorised for issue by the Board of Directors on 30 January 2024. The directors have the power to amend and reissue the financial statements.

As at the time of this report, the Banking Group, Payment services and Pension Funds Administration are in operation as a subsidiary of the Holding Company.

## 2.0 Statement of compliance with International Financial Reporting Standards

The consolidated and separate financial statements of the Group and Company respectively, have been prepared in accordance with IFRS Accounting Standards issued by the International Accounting Standards Board (IASB). Additional information required by national regulations are included where appropriate.

## 3.0 Basis of preparation

This financial statement has been prepared in accordance with the guidelines set by IFRS Accounting Standards and interpretations issued by the International Accounting Standard Board (IFRS Accounting Standards). This consolidated and separate financial statement comprise the consolidated and separate statement of comprehensive income, the consolidated and separate statement of financial position, the consolidated and separate statements of changes in equity, the consolidated and separate cash flow statement and the notes.

The financial statements have been prepared in accordance with the going concern principle under the historical cost convention, modified to include fair valuation of particular financial instruments, non current assets held for sale and investment properties to the extent required or permitted under IFRS as set out in the relevant accounting policies.

### 3.1 IFRS Accounting standard

The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all periods presented, unless otherwise stated. In addition, the company adopted Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS practice statement 2) from 1 January 2023. The amendments require the disclosure of 'material' rather than 'significant' accounting policies. Although did not result to any change in the accounting policies themselves.

#### (a) Changes in material accounting policies and disclosures

Amendments to the following standard(s) became effective in the annual year starting from 1 January, 2023. The new reporting requirements as a result of the amendments and /or clarifications have been evaluated and their impact or otherwise are noted below:

##### IFRS 17 – Insurance Contracts

The IASB issued IFRS 17 in May 2017 and applies to annual reporting years beginning on or after 1 January 2023. The new IFRS 17 standard establishes the principles for the recognition, measurement, presentation and disclosure of Insurance contracts within the scope of the Standard.

The objective of IFRS 17 is to ensure an entity provides relevant information that faithfully represents those contracts. This information gives a basis for users of financial statements to assess the effect that insurance contracts have on the entity’s financial position, financial performance and cash flows. This standard does not impact the Group in anyway as the Group and its subsidiary companies do not engage in insurance business.

This amendment did not have any impact on the amounts recognised in prior years and are not expected to significantly affect the current or future years

##### Amendments to IAS 8 – Definition of Accounting Estimates

The amended standard clarifies that the effects on an accounting estimate of a change in an input or a change in a measurement technique are changes in accounting estimates if they do not result from the correction of prior year errors. The previous definition of a change in accounting estimate specified that changes in accounting estimates may result from new information or new developments. Therefore, such changes are not corrections of errors. This aspect of the definition was retained by the Board.

This amendment did not have any impact on the amounts recognised in prior years and are not expected to significantly affect the current or future years

##### Amendments to IAS 12 – Deferred Tax related to Assets and Liabilities arising from a Single Transaction

The amendments clarify that where payments that settle a liability are deductible for tax purposes, it is a matter of judgement (having considered the applicable tax law) whether such deductions are attributable for tax purposes to the liability recognised in the financial statements (and interest expense) or to the related asset component (and interest expense).

This judgement is important in determining whether any temporary differences exist on initial recognition of the asset and liability. Under the amendments, the initial recognition exception does not apply to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. It only applies if the recognition of a lease asset and lease liability (or decommissioning liability and decommissioning asset component) give rise to taxable and deductible temporary differences that are not equal.

Nevertheless, it is possible that the resulting deferred tax assets and liabilities are not equal (e.g., if the entity is unable to benefit from the tax deductions or if different tax rates apply to the taxable and deductible temporary differences). In such cases, which the Board expects to occur infrequently, an entity would need to account for the difference between the deferred tax asset and liability in profit or loss.

The amendment does not have any material impact on the Group.

#### **Material accounting policy information**

The Group adopted Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2) from 1 January 2023. Although the amendments did not result in any changes to the accounting policies themselves, they impacted the accounting policy information disclosed in the financial statements.

The amendments require the disclosure of 'material', rather than 'significant', accounting policies. The amendments also provide guidance on the application of materiality to disclosure of accounting policies, assisting entities to provide useful, entity-specific accounting policy information that users need to understand other information in the financial statements.

Management reviewed the accounting policies and made updates to the information disclosed in Note 3.2a Material accounting policies (2022: Significant accounting policies) in certain instances in line with the amendments.

#### **(b) Standards and interpretations issued/amended but not yet effective**

The following standards have been issued or amended by the IASB but are yet to become effective for annual years beginning on 1 January 2023:

##### **Amendments to IAS 1 – Classification of Liabilities as Current or Non-current effective Jan 1, 2024**

In January 2020, the IASB issued amendment to IAS 1 to specify the requirements for classifying liabilities as current or non-current. The amendments are effective for annual reporting years beginning on or after 1 January 2024 and must be applied retrospectively. The amendment clarify:

- \* What is meant by a right to defer settlement.
- \* That a right to defer must exist at the end of the reporting year.
- \* That classification is unaffected by the likelihood that an entity will exercise its deferral right.
- \* That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification.

The Board also added two new paragraphs (Paragraph 76A and 76B) to IAS1 to clarify what is meant by “settlement” of a liability. The Board concluded that it was important to link the settlement of the liability with the outflow of resources of the entity.

The amendment is not expected to have any material impact on the Group.

##### **Amendments to IFRS 16 – Lease Liability in a Sale and Leaseback effective Jan 1, 2024**

In September 2022, the Board issued Lease Liability in a Sale and Leaseback. The amendment to IFRS 16 specifies the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains.

However, the requirements do not prevent the seller-lessee from recognizing any gain or loss arising from the partial or full termination of a lease.

The amendment is not expected to have any significant impact on the Group at the time it will take effect, as there is non-existent of such transaction as Sale and Leaseback within the Group or with external parties.

#### Amendments to IAS 7 & IFRS 7 – Supplier Finance Arrangements effective Jan 1, 2024

In May 2023, the Board issued amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments. The amendments clarify the characteristics of supplier finance arrangements. In these arrangements, one or more finance providers pay amounts an entity owes to its suppliers. The entity agrees to settle those amounts with the finance providers according to the terms and conditions of the arrangements, either at the same date or at a later date than that on which the finance providers pay the entity's suppliers.

The amendments require an entity to provide information about the impact of supplier finance arrangements on liabilities and cash flows, including terms and conditions of those arrangements, quantitative information on liabilities related to those arrangements as at the beginning and end of the reporting year and the type and effect of non-cash changes in the carrying amounts of those arrangements. The information on those arrangements is required to be aggregated unless the individual arrangements have dissimilar or unique terms and conditions.

The amendment does not have any material impact on the Group.

#### Lack of exchangeability – Amendments to IAS 21. Effective for annual periods beginning on or after 1 January 2025.

In August 2023, the Board issued Lack of Exchangeability (Amendments to IAS 21). The amendment to IAS 21 specifies how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. A currency is considered to be exchangeable into another currency when an entity is able to obtain the other currency within a time frame that allows for a normal administrative delay and through a market or exchange mechanism in which an exchange transaction would create enforceable rights and obligations.

If a currency is not exchangeable into another currency, an entity is required to estimate the spot exchange rate at the measurement date. An entity's objective in estimating the spot exchange rate is to reflect the rate at which an orderly exchange transaction would take place at the measurement date between market participants under prevailing economic conditions. The amendments note that an entity can use an observable exchange rate without adjustment or another estimation technique.

#### Disclosure requirements

When an entity estimates a spot exchange rate because a currency is not exchangeable into another currency, it discloses information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.

The amendments will be effective for annual reporting periods beginning on or after 1 January 2025. Early adoption is permitted, but will need to be disclosed. When applying the amendments, an entity cannot restate comparative information.

### 3.2 Summary of material accounting policies

The principal accounting policies applied in the preparation of these consolidated and separated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

#### (a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Naira, which is Access Holdings Plc's functional and presentation currency; except where indicated, financial information presented in Naira has been rounded to the nearest millions.

#### (b) Basis of measurement

These consolidated and separate financial statements have been prepared on the historical cost basis except for the following:

- derivative financial instruments are measured at fair value.
- non-derivative financial instruments at fair value through profit or loss are measured at fair value.
- financial instruments at fair value through OCI are measured at fair value.
- the liability for defined benefit obligations is recognised as the present value of the defined benefit obligation and related current service cost
- non-current assets held for sale measured at lower of carrying amount and fair value less costs to sell.
- share based payment at fair value or an approximation of fair value allowed by the relevant standard.
- Investment properties are measured at fair value.

#### (c) Use of estimates and judgments

The preparation of the consolidated and separate financial statements in conformity with IFRS Accounting standards requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised, if the revision affects only that year, or in the year of the revision and future years, if the revision affects both current and future years.

Information about significant areas of estimation uncertainties and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the consolidated and separate financial statements are described in note 4.

### 3-3 Basis of consolidation

#### (a) Subsidiaries

Subsidiaries are entities over which the Group exercises control.

Control is achieved when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity:

- [i] power over the investee;
- [ii] exposure, or rights, to variable returns from its involvement with the investee; and
- [iii] the ability to use its power over the investee to affect the amount of the investor's returns

The Group reassess periodically whether it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed. The existence and effect of potential voting rights are considered when assessing whether the group controls another entity.

The Group assesses existence of control where it does not have more than 50% of the voting power i.e. when it holds less than a majority of the voting rights of an investee. The group considers all relevant facts and circumstances in assessing whether or not it's voting rights are sufficient to give it power, including:

- [i] a contractual arrangement between the group and other vote holders
- [ii] rights arising from other contractual arrangements
- [iii] the group's voting rights (including voting patterns at previous shareholders' meetings)
- [iv] potential voting rights

The subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

Subsidiaries are measured at cost less impairment in the separate financial statement.

#### (b) Business combinations

The Group applies IFRS 3 *Business Combinations (revised)* in accounting for business combinations.

Business combinations are accounted for using the acquisition method as at the acquisition date, which is the date on which control is transferred to the Group. Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In determining whether a particular set of activities and asset is a business, the group assesses whether the set of assets and activities acquired includes at a minimum an input, substantive process and whether the acquired set has the ability to produce outputs

The Group measures goodwill at the acquisition date as:

- the fair value of the consideration transferred; Plus
- the recognized amount of any non-controlling interests in the acquiree; plus if the business combination is achieved in stages, the fair value of the pre-existing equity interest in the acquiree; less
- the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities assumed.

When this total is negative, a gain from bargain purchase is recognised immediately in statement of comprehensive income.

The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognised in the income statement.

Transactions costs related to the acquisition, other than those associated with the issue of debt or equity securities, that the Group incurs in connection with a business combination are expensed as incurred.

Any contingent consideration payable is measured at fair value at the acquisition date. If the contingent consideration is classified as equity, then it is not re-measured and settlement is accounted for within equity. Otherwise, subsequent changes in the fair value of the contingent consideration are recognised in the income statement.

When share-based payment awards (replacement awards) are required to be exchanged for awards held by the acquiree's employees (acquiree's awards) and relate to past services, then all or a portion of the amount of the acquirer's replacement awards is included in measuring the consideration transferred in the business combination. This determination is based on the market-based value of the replacement awards compared with the market-based value of the acquiree's awards and the extent to which the replacement awards relate to past and/or future service.

The Group elects on a transaction-by-transaction basis whether to measure non-controlling interest at its fair value, or at its proportionate share of the recognised amount of the identifiable net assets, at the acquisition date.

**(c) Loss of control**

Upon loss of control, the Group derecognises the assets and liabilities of the subsidiary, any non-controlling interests and the other components of equity related to the subsidiary. Any surplus or deficit arising on the loss of control is recognised in the income statement. If the Group retains any interest in the previous subsidiary, then such interest is measured at fair value at the date that control is lost. Subsequently it is accounted for as an equity-accounted investee or in accordance with the Group's accounting policy for financial instruments.

**(d) Disposal of subsidiaries**

When the Group ceases to have control, any retained interest in the entity is remeasured to its fair value at the date when control is lost, with the change in carrying amount recognised in income statement. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to the income statement.

The gain/loss arising from disposal of subsidiaries is included in the profit/loss of discontinued operations in the statement of comprehensive income, if the disposal subsidiary meets the criteria specified in IFRS 5.

Foreign currency translation differences become realised when the related subsidiary is disposed.

**(e) Changes in ownership interests in subsidiaries without change of control**

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions – that is, as transactions with the owners in their capacity as owners. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

**(f) Transactions eliminated on consolidation**

Inter-company transactions, balances, income and expenses on transactions between group companies are eliminated. Profits and losses resulting from intercompany transactions that are recognised in assets are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

**(g) Non controlling interest**

The group recognises non-controlling interests in an acquired entity either at fair value or at the noncontrolling interest's proportionate share of the acquired entity's net identifiable assets. This decision is made on an acquisition-by-acquisition basis.

**3.4 Segment reporting**

An operating segment is a component of the Group that engages in business activities from which it can earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components, whose operating results are reviewed regularly by the Executive Committee (being the chief operating decision maker) to make decisions about resources allocated to each segment and assess its performance, and for which discrete financial information is available.

**3.5 Foreign currency translation**

**(a) Functional and presentation currency**

Items included in the financial statements of each of the group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Naira', which is the Company's presentation currency.

The Group in the normal course of business sets up Structured Entries (SEs) for the sole purpose of raising finance in foreign jurisdictions. The SEs raises finance in the currency of their jurisdictions and pass the proceeds to the group entity that set them up. All costs and interest on the borrowing are borne by the sponsoring group entity. These SEs are deemed to be extensions of the sponsoring entity, and hence, their functional currency is the same as that of the sponsoring entity.

**(b) Transactions and balances**

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. The foreign currency gain or loss on monetary items is the difference between the amortised cost in the functional currency at the beginning of the year, adjusted for effective interest, impairment and payments during the year, and the amortised cost in the foreign currency translated at the spot exchange rate at the end of the year. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value is determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

Foreign currency differences arising on translation are generally recognised in profit or loss. However, foreign currency differences arising from the translation of the following items are recognised in OCI:

- equity investments in respect of which an election has been made to present subsequent changes in fair value in OCI;
- a financial liability designated as a hedge of the net investment in a foreign operation to the extent that the hedge is effective; and
- qualifying cash flow hedges to the extent that the hedges are effective.

**(c) Group Entities**

The results and financial position of all the group entities (Access Ghana and Access Sierra Leone have a currency of a hyper-inflationary economy (Please see) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- [i] assets and liabilities for each balance sheet presented are translated at the closing rate at the reporting date of that balance sheet;
- [ii] income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions); and
- [iii] all resulting exchange differences are recognised in other comprehensive income.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.

**(d) Hyperinflationary Accounting**

In 2023, the Group applied hyperinflationary accounting to a subsidiary operation in the country where the three-year cumulative inflation rate approached or exceeded 100% in accordance with the provisions of IAS 29 Financial Reporting in Hyperinflationary Economies (IAS 29).

This affected the Group's operations in Ghana with a functional currency of Ghana Cedis where the three years cumulative inflation has reached over 100% as evidenced by the official Consumer Price Index (CPI) that moved from 107.01 in 2021 to 200.5 in 2023. The Group adopted hyperinflation accounting from 1 January 2023 for the results and financial position of the subsidiary in Ghana.

The Group applies IAS 29 to the underlying financial information of relevant subsidiaries to restate their local currency results and financial position to be stated in terms of the measuring unit current at the end of the reporting period. Those restated results are translated into the Group's presentation currency of Naira for consolidation at the closing rate at the balance sheet date. Group comparatives are not restated for inflation. The hyperinflationary gain or loss in respect of the net monetary position of the relevant subsidiary is included in profit or loss. □

The restatement of transactions and balances for the Ghana subsidiary are as follows:

- Corresponding amounts as of, and for, the prior year ended, are restated by applying the change in the index from the end of the prior year to the end of the current year.
- Monetary assets and liabilities for the current year, are not restated because they are already stated in terms of the measuring unit current at statement of financial position date;
- Non-monetary assets and liabilities, and components of shareholders equity/funds, are restated by applying the change in index from date/month of transaction or, if applicable, from the date of their most recent revaluation to the statement of financial position date;
- Property, plant and equipment and intangible assets are restated by applying the change in the index from the date of transaction, or if applicable from the date of their most recent/last revaluation, to the statement of financial position date. Depreciation and amortisation amounts are based on the restated amounts;
- Profit or loss statement items/transactions, are restated by applying the change in index during the period to statement of financial position date;
- Consequential adjustments to the opening balance sheet in relation to hyperinflationary subsidiary are presently directly in equity
- Gains and losses arising from net monetary asset or liability positions are included in the profit or loss statement; and
- All items in the cash flow statement are expressed in terms of the measuring unit current at the statement of financial position date. □

### 3.6 Operating income

It is the Group's policy to recognise revenue from a contract when it has been approved by both parties, rights have been clearly identified, payment terms have been defined, the contract has commercial substance, and collectability has been ascertained as probable. Revenue is recognised when control of goods or services have been transferred. Control of an asset refers to the ability to direct the use of and obtain substantially all of the remaining benefits (potential cash inflows or savings in cash outflows) associated with the asset.

#### *Principal versus Agency considerations*

The Group is the principal in an arrangement where it obtains control of the goods or services of another party in advance of transferring control of those goods or services to a customer. The Group is the principal in its card services.

The Group is an agent where its performance obligation is to arrange for another party to provide the goods and services. The Group is the agent in its arrangement with mobile network providers, card vendors and insurance companies.

Where the group is acting as an agent, it recognises as revenue only the commission retained by the group (in other words, revenue is recognised net of the amounts paid to the principal). Where the group is the principal, it will recognise as revenue the gross amount paid and allocated to the performance obligation. It will also recognise an expense for the direct costs of satisfying the performance obligation.

#### **(a) Interest income and expense**

Interest income and expense for all interest-bearing financial instruments are recognised within "interest income" and "interest expense" in the consolidated and separate income statement using the effective interest method.

The Group calculates interest income by applying the Effective interest rate (EIR) to the gross carrying amount of financial assets other than credit-impaired assets

When a financial asset becomes credit-impaired and is, therefore, regarded as 'Stage 3', the Group calculates interest income by applying the effective interest rate to the net amortised cost of the financial asset. If the financial assets is no longer credit-impaired, the Group reverts to calculating interest income on a gross basis.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant year. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter year) to the net carrying amount of the financial asset or liability. When calculating the effective interest rate, the Group estimates future cash flows considering all contractual terms of the financial instruments but not future credit losses.

The calculation of the effective interest rate includes contractual fees paid or received, transaction costs, and discounts or premiums that are an integral part of the effective interest rate. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability.

Interest income and expense presented in the statement of comprehensive income include:

- interest on financial assets and financial liabilities measured at amortised cost calculated on an effective interest rate basis.
- interest on fair value through other comprehensive income investment securities calculated on an effective interest basis.

Interest income on fair value through profit or loss instruments is recognised using the contractual interest rate on investment securities.

#### **(b) Fees and commission income and expense**

Fees and commission income and expenses that are integral to the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate.

Fee and commission presented in the income statement includes:

- **Credit related fees:** This includes advisory, penal and commitment fees. These are fees charged for administration and advisory services to the customer up to the customer's acceptance of the offer letter. The advisory and commitment fees are earned at the point in time where the customer accepts the offer letter which is when the Group recognises its income. These fees are not integral to the loan, therefore, they are not considered in determining the effective interest rate. The penal fee on default also forms part of the items warehoused in this line. When a loan commitment is not expected to result in the draw-down of a loan, loan commitment fees are recognised on a straight-line basis over the commitment year.
- **Account maintenance fees:** These are fees charged to current accounts. N1 on every N1,000 in respect of all customer induced debit transactions is charged on these accounts. These fees are earned by the Group at the time of each transaction and the Group recognises its income accordingly.
- **Card maintenance fees:** The Group charges these fees to customers for maintaining their cards. The fees are earned and recognised by the Group over the validity year of the card. The Group charges the customers for this service on a monthly basis.

- Other fees and commission income, includes commission on bills and letters of credit, account handling charge, commissions on other financial services, commission on foreign currency denominated transactions, channel and other e-business income, and retail account charges. These fees and commissions are recognised as the related services are performed.

Fees and commissions expenses are fees charged for the provision of services to customers transacting on alternate channels platform of the Group and on the various debit and credit cards issued for the purpose of these payments. They are charged to the Group on services rendered on internet Grouping, mobile Grouping and online purchasing platforms. The corresponding income lines for these expenses include the income on cards (both foreign and local cards), online purchases and bill payments included in fees and commissions.

**(c) Net loss/gains on financial instruments at fair value**

Net loss/gains on financial instruments comprise of the following:

- Net gains/losses on financial instruments classified as fair value through profit or loss: This includes the gains and losses arising both on sale of trading instruments and from changes in fair value of derivatives instruments.
- Net gains on financial instruments held as Fair value through other comprehensive income: This relates to gains arising from the disposal of financial instruments held as Fair value through other comprehensive income as well as fair value changes reclassified from other comprehensive income upon disposal of debt instruments carried at fair value through other comprehensive income

**(d) Net Foreign exchange gain and losses**

Net foreign exchange gain and losses include realised and unrealised foreign exchange gains or losses on revaluation of the foreign currency denominated transactions

**(e) Other operating income**

Other operating income includes items such as dividends, gains on disposal of properties, rental income, income from asset management, brokerage and agency as well as income from other investments.

Dividend on Fair value through other comprehensive income equity securities: This is recognised when the right to receive payment is established. Dividends are reflected as a component of other operating income in the income statement.

**3.7 Income tax**

The tax expense for the year comprises current and deferred tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

**(a) Current tax**

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management yearically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities. It is recognized in the current tax liabilities caption in the statement of financial positions

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting year in the countries where the company and its subsidiaries and associates operate and generate taxable income. Management yearically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The group measures its tax balances either based on the most likely amount or the expected value, depending on which method provides a better prediction of the resolution of the uncertainty

**(b) Minimum Tax**

Based on the provisions of The Finance Act, minimum tax will be applicable at 0.25% of gross turnover less franked investment income. This is shown in note 16

**(c) Deferred tax**

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated statement of financial position. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on the reversal of relevant taxable temporary differences. If the amount of taxable temporary differences is insufficient to recognise a deferred tax asset in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on business plans for individual subsidiaries in the Group. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves. Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

**3.8 Financial assets and liabilities**

*Investments and other financial assets*

**Recognition and derecognition**

The Group initially recognizes financial instruments (including regular-way purchases and sales of financial assets) on the settlement date, which is the date that the instrument is delivered to or by the Group.

**(a) Financial assets****i Classification**

The group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI or through profit or loss), and
- those to be measured subsequently at amortised cost.

The classification for debt financial assets depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI). The group reclassifies debt investments when and only when its business model for managing those assets changes. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all the risks and rewards of ownership.

**Measurement**

At initial recognition, the group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss. Where the fair value is different from the transaction price, the resulting gain or loss is recognized in trading gains or losses on financial instruments only when the fair value is evidenced by a quoted price in an active market for an identical asset (i.e. level 1 input) or based on a valuation technique that uses only data from observable markets"

**ii Debt instruments**

Subsequent measurement of debt instruments depends on the group's business model for managing the asset and the contractual cash flow characteristics of the asset. There are three measurement categories into which the group classifies its debt instruments:

- **Amortised cost:** Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in interest income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in Net (loss)/gain on financial instruments at fair value together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the statement of profit or loss.

- **FVOCI:** Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other operating income. Interest income from these financial assets is included in interest income using the effective interest rate method. Foreign exchange gains and losses are presented in net gains/(loss) on financial instruments at fair value and impairment expenses are presented as separate line item in net impairment charge on financial assets

- **FVPL:** Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within net gains/(loss) on financial instruments at fair value in the year in which it arises.

If in a subsequent year, the fair value of an impaired fair value through other comprehensive income debt security increases and the increase can be related objectively to an event occurring after the impairment loss was recognised, then the impairment loss is reversed through the income statement; otherwise, any increase in fair value is recognised through OCI.

The Group only measures cash and balances with Groups, Loans and advances to Groups and customers and other financial investments at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

The details of these conditions are outlined below.

### iii **Equity instruments**

The group initially measures all equity investments at fair value through profit or loss. Where the group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the group's right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in net gains/(loss) on financial instrument at fair value in the statement of profit or loss as applicable.

### iv **Business model assessment**

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel.
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed.
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).
- The expected frequency, value and timing of sales are also important aspects of the Group's assessment.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

### v **The SPPI test**

As a second step of its classification process, the Group assesses the contractual terms of financial instruments to identify whether they meet the SPPI test.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the year for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL.

**(b) Financial Liabilities**

Financial liabilities that are not classified at fair value through profit or loss are measured at amortised cost using the effective interest method. Amortised cost is calculated by taking into account any discount or premium on issue funds, and costs that are an integral part of the EIR. A compound financial instrument which contains both a liability and an equity component is separated at the issue date. Interest expense is included in 'Interest expense' in the Statement of comprehensive income.

Financial liabilities that are classified at fair value through profit or loss include derivatives, financial liabilities held for trading and other financial liabilities designated as such at initial recognition. Gains and losses attributable to changes in Group's credit risk are recognised in other comprehensive income and the fair value of the liability are recognised in profit or loss.

If recognition of own credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss, all fair value gains/losses are recognised in profit or loss.

The table below reconciles classification of financial instruments to the respective IFRS 9 category.

Financial assets	Financial assets at fair value through profit or loss
	Financial assets at amortised cost
	Fair value through other comprehensive income
Financial liabilities	Financial liabilities at fair value through profit or loss
	Financial liabilities at amortised cost

**(c) Classification of financial assets****[i] Fair value through profit or loss**

This category comprises financial assets classified as hold to sell upon initial recognition.

A financial asset is classified as fair value through profit or loss if it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. Derivatives are also categorised measured at fair value through profit or loss unless they are designated and effective as hedging instruments. Financial assets held for trading consist of debt instruments, including money-market instruments, as well as financial assets with embedded derivatives. They are recognised in the consolidated statement of financial position as 'non-pledged trading assets'.

Financial assets included in this category are recognised initially at fair value; transaction costs are taken directly to the consolidated income statement. Gains and losses arising from changes in fair value are included directly in the consolidated income statement and are reported as "Net (loss)/gain on financial instruments at fair value". Interest income and expense and dividend income on financial assets held for trading are included in 'Interest income', 'Interest expense' or 'Other operating income', respectively. The instruments are derecognised when the rights to receive cash flows have expired or the Group has transferred substantially all the risks and rewards of ownership and the transfer qualifies for derecognising.

The Group is mandated to classify certain financial assets upon initial recognition as at fair value through profit or loss (fair value option) when the following conditions are met:

- The asset does not meet the solely principal and interest on the principal amount outstanding (SPPI) test
- The financial asset is held within a business model whose objective is achieved by selling financial assets.

The Group may designate certain financial assets upon initial recognition as at fair value through profit or loss (fair value option). This designation cannot subsequently be changed. The fair value option is only applied when the designation eliminates or significantly reduces an accounting mismatch which would otherwise arise.

**[ii] Amortized cost**

Amortized cost financial assets are assets that are held for collection of contractual cashflows, where those cashflows represent solely payments of principal and interest.

These are initially recognised at fair value including direct and incremental transaction costs and measured subsequently at amortised cost, using the effective interest method. Any sale or reclassification of a significant amount of amortized cost investments not close to their maturity would result in a reassessment of the Group's business model for managing the assets. However, sales and reclassifications in any of the following circumstances would not trigger a reclassification:

- Sales or reclassification that are so close to maturity that changes on the market rate of interest would not have a significant effect on the financial asset's fair value.
- Sales or reclassification after the Group has collected substantially all the asset's original principal.
- Sales or reclassification attributable to non-recurring isolated events beyond the Group's control that could not have been reasonably anticipated.

Interest on amortized cost investments is included in the consolidated income statement and reported as 'Interest income'. In the case of an impairment, the impairment loss is reported as a deduction from the carrying value of the investment and recognised in the consolidated income statement as 'net impairment loss on financial assets'. Amortised cost investments include treasury bills and bonds.

**[iv] Fair value through other comprehensive income**

Financial assets at fair value through other comprehensive income are assets that are held for the collection of contractual cashflows and selling of the financial assets where the asset's cashflow represents solely payments of principal and interest.

Unquoted equity securities that have been elected as fair value through other comprehensive and other fair value through other comprehensive income investments are carried at fair value.

Interest income is recognised in the income statement using the effective interest method. Dividend income is recognised in the income statement when the Group becomes entitled to the dividend. Foreign exchange gains or losses on such investments are recognised in the income statement.

Other fair value changes are recognised directly in other comprehensive income until the debt investment is sold or impaired whereupon the cumulative gains and losses previously recognised in other comprehensive income are recognised to the income statement as a reclassification adjustment.

Fair value through other comprehensive income instruments include investment securities and equity investments that are so elected.

**(d) Classification of financial liabilities**

The Group classifies its financial liabilities, other than financial guarantees and loan commitments, as measured at amortised cost or fair value through profit or loss.

**[i] Financial liabilities at amortised cost**

**(i) Financial liabilities at amortised cost**

Financial liabilities that are not classified as at fair value through profit or loss are measured at amortised cost using the effective interest method. Interest expense is included in 'Interest expense' in the Statement of comprehensive income.

Deposits and debt securities issued are the Group's sources of debt funding. When the Group sells a financial asset and simultaneously enters into a "repo" or "stock lending" agreement to repurchase the asset (or a similar asset) at a fixed price on a future date, the arrangement is accounted for as a deposit, and the underlying asset continues to be recognised in the Group's financial statements as pledged assets.

The Group classifies debt instruments as financial liabilities in accordance with the contractual terms of the instrument.

Deposits and debt securities issued are initially measured at fair value minus incremental direct transaction costs, and subsequently measured at their amortised cost using the effective interest method, except where the Group designates liabilities at fair value through profit or loss.

On this statement of financial position, other financial liabilities carried at amortised cost include deposit from Groups, deposit from customers, interest bearing borrowings, debt securities issued and other liabilities.

**[ii] Financial liabilities at fair value**

**(ii) Financial liabilities at fair value**

The Group may enter into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risk, including foreign exchange forward contracts, interest rate swaps and foreign currency options. Further details of derivative financial instruments are disclosed in Note 21 to the financial statements.

Derivatives are initially recognised at fair value at the date a derivative contract is entered into and are subsequently remeasured to their fair value at each balance sheet date. A derivative with a positive fair value is recognised as a financial asset whereas a derivative with a negative fair value is recognised as a financial liability. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship. Derivatives are presented as financial assets or financial liabilities.

Derivative assets and liabilities are only offset if the transactions are with the same counterparty, a legal right of offset exists and the parties intend to settle on a net basis.

**(c) Measurement of financial asset and liabilities**

**[i] Amortised cost measurement**

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

**[ii] Fair value measurement**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

When available, the Group measures the fair value of an instrument using quoted prices in an active market for that instrument. A market is regarded as active if quoted prices are readily available and represent actual and regularly occurring market transactions on an arm's length basis.

If a market for a financial instrument is not active, the Group establishes fair value using valuation techniques. Valuation techniques include using recent arm's length transactions between knowledgeable, willing parties (if available), reference to the current fair value of other instruments that are substantially the same, and discounted cash flow analysis. The chosen valuation technique makes maximum use of market inputs, relies as little as possible on estimates specific to the Group, incorporates all factors that market participants would consider in setting a price, and is consistent with accepted economic methodologies for pricing financial instruments. Inputs to valuation techniques reasonably represent market expectations and measures of the risk-return factors inherent in the financial instrument. The Group calibrates valuation techniques and tests them for validity using prices from observable current market transactions in the same instrument or based on other available observable market data.

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price – i.e. the fair value of the consideration given or received. However, in some cases, the fair value of a financial instrument on initial recognition may be different to its transaction price. If such fair value is evidenced by comparison with other observable current market transactions in the same instrument (without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets, then the difference is recognised in the income statement on initial recognition of the instrument.

In other cases the difference is not recognised in the income statement immediately but is recognised over the life of the instrument on an appropriate basis or when the instrument is redeemed, transferred or sold, or the fair value becomes observable.

Assets and long positions are measured at a bid price; liabilities and short positions are measured at an asking price. Where the Group has positions with offsetting risks, mid-market prices are used to measure the offsetting risk positions and a bid or asking price adjustment is applied only to the net open position as appropriate. Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Group entity and the counterparty where appropriate. Fair value estimates obtained from models are adjusted for any other factors, such as liquidity risk or model uncertainties, to the extent that the Group believes a third-party market participant would take them into account in pricing a transaction.

**Reclassification of financial assets and liabilities**

**(f) Reclassification of financial assets**

The Group does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Group changes its business model for managing a financial asset; the Group acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified.

The following are not changes in business model;

- a. change in intention related to particular financial assets (even in circumstances of significant changes in market conditions).
- b. the temporary disappearance of a particular market for financial assets.
- c. a transfer of financial assets between parts of the entity with different business models.

Reclassifications are made at fair value as of the reclassification date. Fair value becomes the new cost or amortised cost as applicable, and no reversals of fair value gains or losses recorded before reclassification date are subsequently made. Effective interest rates for financial assets reclassified to amortised cost categories are determined at the reclassification date. Further increases in estimates of cash flows adjust effective interest rates

prospectively.

**Reclassification date**

The first day of the first reporting year following the change in business model that results in an entity reclassifying financial assets.

A change in the objective of the Group's business model must be effected before the reclassification date. For example, if Group decides on 15 February to shut down its Corporate & investment Grouping business and hence must reclassify all affected financial assets on 1 April (i.e. the first day of the Group's next reporting year), the Group must not accept new Corporate & investment Grouping business or otherwise engage in activities consistent with its former business model after 15 February.

All reclassifications are applied prospectively from the reclassification date.

When the Group reclassifies a financial asset between the amortised cost measurement category and the fair value through other comprehensive income measurement category, the recognition of interest income is not changed and it continues to use the same effective interest rate.

However, when the Group reclassifies a financial asset out of the fair value through profit or loss measurement category, the effective interest rate is determined on the basis of the fair value of the asset at the reclassification date.

**(g) Derecognition of financial assets and liabilities**

*Derecognition due to substantial modification of terms and conditions*

*The Group derecognises a financial asset or liability, such as a loan to a customer, when the terms and conditions have been renegotiated to the extent that, substantially, it becomes a new loan, with the difference recognised as a derecognition in the statement of comprehensive income, to the extent that an impairment loss has not already been recorded. The terms and conditions have been renegotiated substantially if the discounted cash flows under the new terms are at least 10 per cent different from the discounted remaining cash flows of the original terms. The newly recognised loans are classified as Stage 1 for ECL measurement purposes, unless the new loan is deemed to be Purchased or Originated Credit Impaired (POCI).*

*When assessing whether or not to derecognise a loan to a customer, amongst others, the Group considers the following factors:*

- *Change in currency of the loan*
- *Introduction of an equity feature*
- *Change in counterparty*
- *If the modification is such that the instrument would no longer meet the SPPI criterion*

If the modification does not result in cash flows that are substantially different, the modification does not result in derecognition. Based on the change in cash flows discounted at the original EIR, the Group records a modification gain or loss, to the extent that an impairment loss has not already been recorded. This is recognized in the statement of comprehensive income.

*(i) Derecognition other than for substantial modification - Financial assets*

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when the rights to receive cash flows from the financial asset have expired. The Group also derecognises the financial asset if it has both transferred the financial asset and the transfer qualifies for derecognition.

The Group has transferred the financial asset if, and only if, either:

- The Group has transferred its contractual rights to receive cash flows from the financial asset or
- It retains the rights to the cash flows, but has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement

Pass-through arrangements are transactions whereby the Group retains the contractual rights to receive the cash flows of a financial asset (the 'original asset'), but assumes a contractual obligation to pay those cash flows to one or more entities (the 'eventual recipients'), when all of the following three conditions are met:

- The Group has no obligation to pay amounts to the eventual recipients unless it has collected equivalent amounts from the original asset, excluding short-term advances with the right to full recovery of the amount lent plus accrued interest at market rates
- The Group cannot sell or pledge the original asset other than as security to the eventual recipients
- The Group has to remit any cash flows it collects on behalf of the eventual recipients without material delay.

In addition, the Group is not entitled to reinvest such cash flows, except for investments in cash or cash equivalents including interest earned, during the year between the collection date and the date of required remittance to the eventual recipients.

A transfer only qualifies for derecognition if either:

- The Group has transferred substantially all the risks and rewards of the asset or
- The Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

The Group considers control to be transferred if and only if, the transferee has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without imposing additional restrictions on the transfer.

When the Group has neither transferred nor retained substantially all the risks and rewards and has retained control of the asset, the asset continues to be recognised only to the extent of the Group's continuing involvement, in which case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration the Group could be required to pay.

If continuing involvement takes the form of a written or purchased option (or both) on the transferred asset, the continuing involvement is measured at the value the Group would be required to pay upon repurchase. In the case of a written put option on an asset that is measured at fair value, the extent of the entity's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

*(ii) Derecognition other than for substantial modification - Financial Liabilities*

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms such as the beneficiary, tenor, principal amount or the interest rate, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in profit or loss.

**(h) Offsetting**

Financial assets and liabilities are set off and the net amount presented in the statement of financial position when, and only when, the Group has a legal enforceable right to set off the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRSs, or for gains and losses arising from a group of similar transactions such as in the Group's trading activity.

**Sale and repurchase agreements**

Securities sold subject to repurchase agreements ('repos') remain on the statement of financial position; the counterparty liability is included in amounts due to other Groups, deposits from Groups, other deposits or deposits due to customers, as appropriate. Securities purchased under agreements to resell (reverse repos') are recorded as money market placement. The difference between sale and repurchase price is treated as interest and accrued over the life of the agreements using the effective interest method.

Securities lent to counterparties are also retained in the financial statements. Securities borrowed are not recognised in the financial statements, unless these are sold to third parties, in which case the purchase and sale are recorded with the gain or loss included in Net (loss)/gain on financial instruments at fair value.

**(i) Measurement of specific financial assets**

**(i) Cash and balances with Groups**

Cash and balances with Groups include notes and coins on hand, balances held with central Groups and highly liquid financial assets with original maturities of less than three months, which are subject to insignificant risk of changes in their fair value, and are used by the Group in the management of its short-term commitments.

In the consolidated statement of cash flows, cash and cash equivalents includes cash in hand, unrestricted balances with foreign and central Groups, money market placements and other short-term highly liquid investments with original maturities of three months or less.

**(ii) Repossessed collateral**

Repossessed collateral are equities, investment properties or other investments repossessed from a customer and used to settle the outstanding obligation. Such investments are classified in accordance with the intention of the Group in the asset class which they belong and are also separately disclosed in the financial statement.

When collaterals are repossessed in satisfaction of a loan, the receivable is written down against the allowance for losses. Repossessed collaterals are included in the financial statement based on how the Group intends to realize benefit from such collateral such as "Non current assets held for sale" and carried at the lower of cost or estimated fair value less costs to sell, if the Group intends to sell or cost less accumulated depreciation, if for use in the normal course of business.

**(iii) Derivative financial instruments**

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at their fair value. Fair values are obtained from quoted market prices in active markets (for example, for exchange-traded options), including recent market transactions, and valuation techniques (for example for swaps and currency transactions), including discounted cash flow models and options pricing models, as appropriate. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative.

The Group mitigates the credit risk of derivatives by holding collateral in the form of cash. Also see Note 3.22

**(iv) Pledged assets**

Financial assets transferred to external parties that do not qualify for de-recognition are reclassified in the statement of financial position from financial assets carried at fair value through profit or loss or investment securities to assets pledged as collateral, if the transferee has received the right to sell or re-pledge them in the event of default from agreed terms.

Initial recognition of assets pledged as collateral is at fair value, whilst subsequent measurement is based on the classification of the financial asset. Assets pledged as collateral are either classified as fair value through profit or loss, Fair value through other comprehensive income or Amortized cost. Where the assets pledged as collateral are classified as fair value through profit or loss, subsequent measurement is at fair value through profit and loss, whilst assets pledged as collateral classified as Fair value through other comprehensive income are measured at fair-value through equity. Assets pledged as collateral are measured at amortized cost.

**[v] Investment under management**

Investment under management are funds entrusted to Asset management firms who acts as agents to the Company for safe keeping and management for investment purpose with returns on the underlying investments accruable to the Company, who is the principal.

The investment decision made by the Asset management is within an agreed portfolio of high quality Nigerian fixed income and money market instruments which are usually short tenured.

### 3.9 Impairment of financial assets

#### Overview of the ECL principles

The Group assesses on a forward-looking basis the expected credit losses ('ECL') associated with its debt instrument assets carried at amortised cost and FVOCI and with the exposure arising from loan commitments and financial guarantee contracts. The Group recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

#### Staging Assessment

The Group has established a policy to perform an assessment, at the end of each reporting year, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Group categorises its financial instruments into Stage 1, Stage 2, Stage 3, as described below. All POCI (Purchased or originated credit impaired) financial instruments are categorized under stage 3.

- Stage 1: When a financial instrument is first recognised, the Group recognises an allowance based on 12m Expected credit Loss. Stage 1 also includes financial instruments where the credit risk has improved (after review over a year of 90 days) and the financial instruments has been reclassified from Stage 2.
- Stage 2: When a financial instrument has shown a significant increase in credit risk since origination, the Group records an allowance for the Lifetime ECLs. Stage 2 financial instruments also include instances, where the credit risk has improved (after review over a year of 90 days) and the financial instrument has been reclassified from Stage 3.
- Stage 3: Financial instruments considered credit-impaired. The Group records an allowance for the Lifetime ECLs.

POCI: Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses.

### Measuring the Expected Credit Loss

The Expected Credit Loss (ECL) is measured on either a 12-month (12M) or Lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Exposure at Default (EAD), and Loss Given Default (LGD), defined as follows:

- The PD represents the likelihood of a borrower defaulting on its financial obligation (as per Definition of default and credit-impaired above), either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.
- EAD is based on the amounts the Group expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD). For example, for a revolving commitment, the Group includes the current drawn balance plus any further amount that is expected to be drawn up to the current contractual limit by the time of default, should it occur.
- Loss Given Default represents the Group's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, type and seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of exposure at the time of default (EAD). LGD is calculated on a 12-month or lifetime basis, where 12-month LGD is the percentage of loss expected to be made if the default occurs in the next 12 months and Lifetime LGD is the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan.

The Lifetime PD is developed by applying a maturity profile to the current 12M PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis.

The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by product type.

- For amortising products and bullet repayment loans, this is based on the contractual repayments owed by the borrower over a 12month or lifetime basis. This will also be adjusted for any expected overpayments made by a borrower. Early repayment/refinance assumptions are also incorporated into the calculation.
- For revolving products, the exposure at default is predicted by taking current drawn balance and adding a credit conversion factor which allows for the expected drawdown of the remaining limit by the time of default. These assumptions vary by product type and current limit utilisation band, based on analysis of the Group's recent default data.

When estimating the ECLs, the Group considers three scenarios (optimistic, best-estimate and downturn) and each of these is associated with different PDs and LGDs. When relevant, the assessment of multiple scenarios also incorporates how defaulted loans are expected to be recovered, including the probability that the loans will cure (i.e. be paid in full or no longer credit-impaired) and the value of collateral or the amount that might be received for selling the asset.

The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. These vary by product type.

- For secured products, this is primarily based on collateral type and projected collateral values, historical discounts to market/book values due to forced sales, time to repossession and recovery costs observed.
- For unsecured products, LGDs are typically set at product level due to the limitation in recoveries achieved across different borrower. These LGDs are influenced by collection strategies, including contracted debt sales and price.

The mechanics of the ECL method are summarised below:

- Stage 1: The 12 month ECL is calculated as the portion of Lifetime ECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Group calculates the 12 month ECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast 12 month EAD and multiplied by the expected 12 month LGD and discounted by an approximation to the original EIR. This calculation is made for each of the three scenarios, as explained above.
- Stage 2: When a loan has shown a significant increase in credit risk since origination, the Group records an allowance for the Lifetime ECLs. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.
- Stage 3: For loans considered credit-impaired, the Group recognises the lifetime expected credit losses for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.

- **POCI:** Purchase or Originated Credit Impaired (POCI) assets are financial assets that are credit impaired on initial recognition. The Group only recognises the cumulative changes in lifetime ECLs since initial recognition, based on a probability-weighting of the three scenarios, discounted by the credit adjusted EIR.
- **Loan commitments and letters of credit:** When estimating Lifetime ECLs for undrawn loan commitments, the Group estimates the expected portion of the loan commitment that will be drawn down over its expected life. The ECL is then based on the present value of the expected shortfalls in cash flows if the loan is drawn down, based on a probability-weighting of the three scenarios. The expected cash shortfalls are discounted at an approximation to the expected EIR on the loan. For credit cards and revolving facilities that include both a loan and an undrawn commitment, ECLs are calculated and presented together with the loan. For loan commitments and letters of credit, the ECL is recognised within net impairment charge on financial assets
- **Financial guarantee contracts:** The Group's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the income statement, and the ECL provision. For this purpose, the Group estimates ECLs based on the present value of the expected payments to reimburse the holder for a credit loss that it incurs. The shortfalls are discounted by the risk-adjusted interest rate relevant to the exposure. The calculation is made using a probability-weighting of the three scenarios. The ECLs related to financial guarantee contracts are recognised within net impairment charge on financial assets
- **Sovereign Debt investments at amortised cost and FVOCI** are considered to have low credit risk, and the loss allowance recognised during the year was therefore limited to 12 months' expected losses. Management considers 'low credit risk' for such instruments to be an investment grade credit rating with at least one major rating agency. Other instruments are considered to be low credit risk where they have a low risk of default and the issuer has a strong capacity to meet its contractual cash flow obligations in the near term.

#### **Significant increase in credit risk (SICR)**

The Group considers a financial instrument to have experienced a significant increase in credit risk when one or more of the following quantitative, qualitative or backstop criteria have been met:

Quantitative criteria:

The remaining Lifetime PD at the reporting date has increased, compared to the residual Lifetime PD expected at the reporting date when the exposure was first recognised.

Deterioration in the credit rating of an obligor either based on the Group's internal rating system or an international credit rating. However, the downgrade considers movement from a grade band to another e.g. Investment grade to Standard.

The group also considers accounts that meet the criteria to be put on the watchlist bucket in line with CBN prudential guidelines since they have significantly increased in credit risk.

The group continuously monitors all assets subject to ECL. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Group assesses whether there has been a significant increase in credit risk since initial recognition.

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and expert credit assessment and including forward-looking information. The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by comparing:

- The remaining lifetime PD as at the reporting date, with
- The remaining lifetime PD for this point in time that was estimated at the time of initial recognition of the exposure

The Group uses three criteria for determining whether there has been a significant increase in credit risk:

- A quantitative test based on movement in PD
- Qualitative indicators; and
- A backstop of 30 days past due for all financial assets (regardless of the change in internal credit grades)

**Qualitative criteria:**

For Retail loans, if the borrower meets one or more of the following criteria:

- In short-term forbearance
- Direct debit cancellation
- Extension to the terms granted
- Previous arrears within the last [12] months

For Corporate portfolio, if the borrower is on the watchlist and/or the instrument meets one or more of the following criteria:

- Significant increase in credit spread
- Significant adverse changes in business, financial and/or economic conditions in which the borrower operates
- Actual or expected forbearance or restructuring
- Actual or expected significant adverse change in operating results of the borrower
- Significant change in collateral value (secured facilities only) which is expected to increase risk of default
- Early signs of cash flow/liquidity problems such as delay in servicing of trade creditors/loans

The assessment of SICR incorporates forward-looking information and is performed on a quarterly basis at a portfolio level for all Retail financial instruments held by the Group. In relation to Wholesale and Treasury financial instruments, where a Watchlist is used to monitor credit risk, this assessment is performed at the counterparty level and on a yearly basis. The criteria used to identify SICR are monitored and reviewed yearly for appropriateness by the independent Credit Risk team.

For modified financial assets the Group assesses whether there has been a significant increase in credit risk of the financial instrument by comparing the risk of default occurring at the reporting date (based on the modified contractual terms) and the risk of default occurring at initial recognition (based on the original unmodified contractual terms)

**Backstop**

A backstop indicator is applied and the financial instrument is considered to have experienced a significant increase in credit risk if the borrower is more than 30 days past due and 90 days past due on its contractual payments for both stage 2 and stage 3 respectively.

**Definition of default and credit-impaired assets**

The Group defines a financial instrument as in default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria:

**Quantitative criteria**

The borrower is more than 90 days past due on its contractual payments.

**Qualitative criteria**

The borrower meets unlikeliness to pay criteria, which indicates the borrower is in significant financial difficulty. These are instances where:

- The borrower is in long-term forbearance
- The borrower is deceased
- The borrower is insolvent
- The borrower is in breach of financial covenant(s)
- An active market for that financial asset has disappeared because of financial difficulties
- Concessions have been made by the lender relating to the borrower's financial difficulty
- It is becoming probable that the borrower will enter Groupruptcy
- Financial assets are purchased or originated at a deep discount that reflects the incurred credit losses.

The criteria above have been applied to all financial instruments held by the Group and are consistent with the definition of default used for internal credit risk management purposes. The default definition has been applied consistently to model the Probability of Default (PD), Exposure at Default (EAD) and Loss given Default (LGD) throughout the Group's expected loss calculations.

### **Incorporation of forward looking information and macroeconomic factors**

In its ECL models, the Group relies on a broad range of forward looking information as economic inputs. The macroeconomic variables considered for the adjustment of the probabilities of default are listed below:

- Crude oil prices,
- Exchange rates (USD/NGN), and
- GDP growth rate

The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material.

The ECLs include forward-looking information which translates into an allowance for changes in macro-economic conditions and forecasts when estimating lifetime ECLs. It is important to understand the effect of forecasted changes in the macro-economic environment on ECLs, so that an appropriate level of provisions can be raised.

A regression model was built to explain and predict the impact of macro-economic indicators on default rates. Such regression models are usually built on a history of default rates and macro-economic variables covering at least one economic cycle, but preferable more.

Historical data on macro-economic indicators from a host of reliable sources, including the International Monetary Fund was gathered. As a proxy for default rates, the Group provided their non-performing loans as a percentage of gross loans ("NPL%") metric. The time series data extended from the first quarter of 2012 to the second quarter of 2020. Quarterly data was used to increase granularity.

The macro-economic model regressed historical NPL% (the target variable) on a list of candidate macro-economic indicators. The Group's Economic Intelligence currently monitors and forecasts certain macro-economic indicators. These indicators are GDP growth rate, crude oil prices and the foreign exchange rate. The most predictive variables that were selected in the regression model (the most predictive indicators) were determined. The logic of the relationships between the indicators and the target variable was considered and assessed to ensure indicators are not highly correlated with one another.

The model produced best-estimate, optimistic and downturn forecasts of the selected macro-economic indicators, based on trends in the indicators and macro-economic commentary. This was done through stressing the indicator GDP, which in turn stressed the other indicators based on their assumed historical correlation with GDP. The regression formula obtained was applied to the forecasted macro-economic indicators in order to predict the target variable.

The best-estimate, optimistic and downturn scalars of predicted target variables were determined. In order to remove the impact of any historical trends included in the data, the scalar denominator was adjusted based on the estimation year used to derive the PDs. The scalars calculated were applied to the lifetime PDs. This process results in forward-looking best-estimate, optimistic and downturn lifetime PD curves, which are used in the ECL calculations.

### **Collateral valuation**

To mitigate its credit risks on financial assets, the Group seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. Collateral, unless repossessed, is not recorded on the Group's statement of financial position. However, the fair value of collateral affects the calculation of ECLs. It is generally assessed, at a minimum, at inception and re-assessed on a yearly basis.

To the extent possible, the Group uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as external valuers.

### **Collateral repossessed**

The Group's policy is to determine whether a repossessed asset can be best used for its internal operations or should be sold. Assets determined to be useful for the internal operations are transferred to their relevant asset category at the lower of their repossessed value or the carrying value of the original secured asset. Assets for which selling is determined to be a better option are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date in, line with the Group's policy.

### **Write-offs**

Financial assets are written off either partially or in their entirety only when the Group has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Either the counterparty can no longer pay the obligation or proceeds from the collateral will not be sufficient to pay back the exposure. As directed by CBN guideline on write-off, board approval is required before any write-off can occur. For insider-related loans, CBN approval is required. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount to derecognize the asset. The recovery department continues with recovery efforts and any subsequent recoveries are credited to bad debt recovered under other operating income

### **Expected credit loss on loans and receivables**

The Group considers all loans and advances, financial assets at FVOCI and amortized cost investments at specific level for expected credit loss assessment.

In assessing expected credit loss, the Group uses statistical modeling of historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgment as to whether current and forecasted economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical modeling. Default rates, loss rates and the expected timing of future recoveries are regularly benchmarked against actual outcomes to ensure that they remain appropriate. The ECL on restricted deposits and other assets is calculated using the simplified model approach.

Impairment losses on assets carried at amortised cost are measured as the difference between the carrying amount of the financial assets and the present value of estimated cash flows discounted at the assets' original effective interest rate. Losses are recognised in the income statement and reflected in an allowance account against loans and advances. Interest on the impaired asset continues to be recognised through the unwinding of the discount. When a subsequent event causes the amount of impairment loss to decrease, the impairment loss is reversed through profit or loss.

### **Expected credit loss on fair value through other comprehensive income securities**

Impairment losses on fair value through other comprehensive income investment securities are recognised in profit or loss and the impairment provision is not used to reduce the carrying amount of the investment but recognised in other comprehensive income. For debt securities, the group uses the criteria referred above to assess impairment.

The Group writes off previously impaired loans and advances (and investment securities) when they are determined not to be recoverable. The Group writes off loans or investment debt securities that are impaired (either partially or in full and any related allowance for impairment losses) when the Group credit team determines that there is no realistic prospect of recovery.

## **3.10 Investment properties**

An investment property is an investment in land or buildings held primarily for generating income or capital appreciation and not occupied substantially for use in the operations of the Group. An occupation of more than 15% of the property is considered substantial. Investment properties is measured initially at cost including transaction cost and subsequently carried in the statement of financial position at their fair value and revalued yearly on a systematic basis. Investment properties are not subject to yearic charge for depreciation. Gains or losses arising from changes in the fair value of investment properties are included in the consolidated income statement in the year which it arises as: "Fair value gain/loss on investment property"

Any gain or loss on disposal of an investment property (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognised in income statement inside other operating income or other operating expenses dependent on whether a loss or gain is recognized after the measurement

When the use of a property changes such that it is reclassified as property and equipment, its fair value at the date of reclassification becomes its cost for subsequent accounting applicable to property and equipment.

### 3.11 Property and equipment

#### (a) Recognition and measurement

Items of property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset.

When significant parts of an item of property or equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

The gain or loss on disposal of an item of property and equipment is determined by comparing the proceeds from disposal with the carrying amount of property and equipment, and are recognised net within other operating income in the Income statement.

#### (b) Subsequent costs

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with the item will flow to the Group and its cost can be measured reliably. The costs of the day-to-day repairs and maintenance of property and equipment are recognised in Income statement as incurred.

#### (c) Depreciation

Depreciation is recognised in the income statement on a straight-line basis to write down the cost of items of property and equipment, to their residual values over the estimated useful lives.

Depreciation begins when an asset is available for use and ceases at the earlier of the date that the asset is derecognised or classified as held for sale in accordance with IFRS 5. A non-current asset or disposal group is not depreciated while it is classified as held for sale.

The estimated useful lives for the current and comparative years of significant items of property and equipment are as follows:

Freehold Land	Not depreciated
Leasehold improvements and building	Over the shorter of the useful life of the item or lease term
Buildings	60 years
Computer hardware	4-5 years
Furniture and fittings	6 years
Plant and Equipment	5 years
Motor vehicles	5 years

The asset's residual values and useful lives are reviewed, and adjusted if appropriate, at each date of the statement of financial position. Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

Capital work in progress is not depreciated. Upon completion it is transferred to the relevant asset category. Depreciation methods, useful lives and residual values are reassessed at each reporting date and adjusted if appropriate.

#### (d) De-recognition

An item of property and equipment is derecognised on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included within other operating income in the income statement in the year the asset is derecognised.

### 3.12 Leases

Group as the Lessee:

The Group leases several assets including buildings and land. Lease terms are negotiated on an individual basis and contain different terms and conditions, including extension options as described in the "extension and termination options header" below. The lease period ranges from 1 period to 40 periods. The lease agreements do not impose any covenants, however, leased assets may not be used as security for borrowing purposes.

Contracts may contain both lease and non-lease components. The Group has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Assets and liabilities arising from a lease are initially measured on a present value basis.

#### Lease liabilities

At commencement date of a lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate
- amounts expected to be payable by the Group under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability. The variable lease payments that do not depend on an index or a rate are recognised as expense in the year in which the event or condition that triggers the payment occurs.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, the Group's incremental borrowing rate is used, being the rate that the Group would have to pay to borrow the funds necessary to obtain an asset of similar value to the right of use asset in a similar economic environment with similar terms, security and conditions. The weighted average incremental borrowing rate applied to the lease liabilities as at 31 December 2023 was 15.79%. Where the basis for determining future lease payments changes as required by interest rate benchmark reform, the Group remeasures the lease liability by discounting the revised lease payments using the revised discount rate that reflects the change to an alternative benchmark interest rate.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each year. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

#### Right of use assets

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

#### Short-term leases and leases of low value

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered of low value (i.e. low value assets). Low-value assets are assets with lease amount of less than \$5,000 or its equivalent in Naira when new. Lease payments on short-term leases and leases of low-value assets are recognised as expense in profit or loss on a straight-line basis over the lease term.

**Extension and termination options**

Extension and termination options are included in a number of property leases. These are used to maximise operational flexibility in terms of managing the assets used in the Group's operations. The majority of extension and termination options held are exercisable only by the Group.

**A group company is the lessor;**

When assets are held subject to a finance lease, the present value of the lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income. Lease income is recognised over the term of the lease using the net investment method (before tax), which reflects a constant periodic rate of return.

**3.13 Intangible assets**

**(a) Goodwill**

Goodwill that arises upon the acquisition of subsidiaries is included in intangible assets. Subsequent to initial recognition, goodwill is measured at cost less accumulated impairment losses. Goodwill is tested annually for impairment.

Goodwill is allocated to cash-generating units or groups of cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose identified in accordance with IFRS 3.

Goodwill has an indefinite useful life and is tested annually as well as whenever a trigger event has been observed for impairment by comparing the present value of the expected future cash flows from a cash generating unit with the carrying value of its net assets, including attributable goodwill and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Intangible assets are derecognized on disposal or when no economic benefits are expected from their use or disposal.

**(b) Software**

Software acquired by the Group is stated at cost less accumulated amortisation and accumulated impairment losses. Expenditure on internally developed software is recognised as an asset when the Group is able to demonstrate its intention and ability to complete the development and use the software in a manner that will generate future economic benefits, and can reliably measure the costs to complete the development. The capitalised costs of internally developed software include all costs directly attributable to developing the software, and are amortised over its useful life. Internally developed software is stated at capitalised cost less accumulated amortisation and impairment.

Subsequent expenditure on software assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

Amortisation is recognised in the income statement on a straight-line basis over the estimated useful life of the software, from the date that it is available for use since this most closely reflects the expected pattern of consumption of future economic benefits embodied in the asset. Software has a finite useful life, the estimated useful life of software is four and half years (4.5). Amortisation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

**(c) Brand, Customer Relationships and Core Deposits**

These are intangible assets related to acquisitions. At acquisition date, they are initially recorded at their fair value and subsequently at cost less accumulated amortization. Amortization expense is recorded in amortization of intangible assets in the Consolidated Statement of Profit or Loss. Intangible assets are amortized over the period during which the Group derives economic benefits from the assets, on a straight-line basis, over a period of 10 years to 20 years.

The useful lives of the assets are reviewed annually for any changes in circumstances. The assets are tested annually for impairment or at such time where there is an impairment trigger, or changes in circumstances indicate that their carrying value may not be recoverable.

**Documentation on Final Assessment of Intangible Asset Relating to Access Pension****Valuation Guidelines**

<b>Overview</b>	<b>Explanation</b>
Introduction	<ul style="list-style-type: none"> <li>• Under the Standard, Access Holdings is required to apportion the purchase consideration between the tangible and intangible assets and liabilities (including contingent liabilities) of FGPL and Sigma Pensions.</li> <li>• The Standard provides general guidelines for assigning amounts to individual assets acquired and liabilities assumed.</li> <li>• IFRS 3 requires the application of the acquisition method for each business combination. The acquisition method requires inter alia that the acquirer is identified, the acquisition date is determined, and that the identifiable assets acquired, and that the liabilities assumed and any non-controlling interest in the acquiree are recognised and measured.</li> </ul>
Recognition principle (IFRS 3)	<ul style="list-style-type: none"> <li>• IFRS 3 states that as of the acquisition date, the acquirer shall recognise, separately from goodwill, the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree.</li> <li>• Recognition of identifiable assets acquired and liabilities assumed is subject to the conditions specified in paragraphs 11 and 12. These paragraphs state, inter alia, that the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Framework for the Preparation and Presentation of Financial Statements at the acquisition date, and that the identifiable assets acquired and liabilities assumed must be part of what the acquirer and the acquiree exchanged in the business combination transaction</li> </ul>
Definition of identifiable asset (IFRS 3)	<ul style="list-style-type: none"> <li>• IFRS 3 states that an asset is identifiable if it either:               <ol style="list-style-type: none"> <li>a) is separable, i.e. capable of being separated or divided from the entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable asset or liability, regardless of whether the entity intends to do so; or</li> <li>b) arises from contractual or other legal rights, regardless of whether those rights are transferable or separable from the entity or from other rights and obligations.</li> </ol> </li> </ul>
Measurement principle (IFRS 3)	<ul style="list-style-type: none"> <li>• The acquirer shall measure the identifiable assets acquired and the liabilities assumed at their acquisition-date Fair Values.</li> </ul>
Fair Value (IFRS 13)	<ul style="list-style-type: none"> <li>• The identifiable assets are required under IFRS 3 to be recognised at their "Fair Value". Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement</li> </ul>
Definition Intangible asset (IAS 38)	<ul style="list-style-type: none"> <li>• Intangible assets are all the elements of a business enterprise that exist in addition to working capital and tangible assets. They are the elements, after working capital and tangible assets, that make the business work and are often the primary contributors to the earning power of the enterprise. Their existence is dependent on the presence, or expectation of earnings.</li> <li>• The definition of an intangible asset under IFRS is detailed in IAS 38 as 'an identifiable non-monetary asset without physical substance.</li> </ul>
Definition of identifiable asset (IFRS 3)	<ul style="list-style-type: none"> <li>• IAS 38 (Intangible asset) defines the useful life as "the period over which an asset is expected to be available for use by an entity; or the number of production or similar units expected to be obtained from the asset by an entity".</li> <li>• Under IAS 38 the factors which should be considered in assessing the useful lives of intangible assets include:               <ol style="list-style-type: none"> <li>i. The expected use and potential use by another management team;</li> <li>ii. Typical life cycles for the product and any public information on useful lives;</li> <li>iii. Technical, technological, commercial or other types of obsolescence;</li> <li>iv. Stability of the industry in which the asset operates and changes in the market demand;</li> <li>v. Expected actions by competitors;</li> <li>vi. Level of maintenance expenditure required to obtain the future economic benefits; and</li> <li>vii. The period of control over the asset and legal or similar limits on the use of the asset.</li> </ol> </li> <li>• The estimated useful life of each identifiable asset identified will be based on the factors outlined above</li> </ul>

**Intangible assets description and methodology**

<b>Asset Considered</b>	<b>Brief Description</b>	<b>Recognition</b>	<b>Valuation</b>
Customer contracts/ customer relationship	We understand that revenue in the pension industry is mainly driven by management fees earned from AuM (Assets Under Management) which are contributions from customers. Customer related intangibles will be valued as Access pension is expected to earn fees income from existing and future contributions made by Retirement Saving Account (RSA) I-VI holders, Defined benefit schemes holders and the informal sector/unfunded customers.	According to IAS 38 customers related intangibles can be recognized if future economic benefits are expected to flow to the entity from the use of that asset, and the cost can be reliably measured.	FGPL and Sigma Pensions customers list which consist of the RSA I-VI account PIN, defined benefit scheme PIN, informal sector and unfunded PIN will be valued using the Income approach model which is one of the identifiable model for valuing intangible asset according to IAS 38.
Company Brand	Both Sigma Pensions and FGPL are part of the top 10 pension companies in Nigeria with over 990,000 PIN contributors amongst them, thus having a strong presence and brand in the market. Sigma Pensions and FGPL will be merged to form Access Pension hence, none of the brands identified (Sigma & FGPL) will be retained. Access Pensions being the product of the merger between SIGMA and FGPL, offers the advantage of a strong parent (Access Holdings) with an established African presence and a globally connected financial ecosystem. The act of rebranding the acquired entities under the parent company's name aligns with the previous M&A transactions within the Pension Industry	According to IAS 38, the brand or any trademark should be recognized distinctly from goodwill if the separability criterion is met.	Since both Sigma Pensions and FGPL will be merged to form Access Pensions we will not be valuing any of the brands. The Access Pensions brand name is relatively new in the Pension Industry and there would be no significant benefit derived from valuing the brand. As such, we believe that brand does not have to be valued.
Licenses (SIGMA and FGPL)	To operate in the pension industry, we understand that you must be granted a license of operation by PENCOM. SIGMA and FGPL both have a license and operate as a separate PFA's prior to the acquisition by Access Pension in 2022. License will be valued as an intangible asset as it is required to operate in the pension industry in Nigeria	The cost of the license can be measured reliably. The firm is only able to operate because it was licensed. Hence, there is future economic benefit probable to the firm.	The licence will be valued using the replacement cost model which is one of the identifiable model for valuing intangible asset according to IAS38

**Key valuation assumptions used in valuing customer relationships**

<b>Assumption</b>	<b>Key considerations</b>
Valuation method	We used the Multi-Period Excess Earnings Method (MEEM) under the income approach to value customer relationship. In line with IFRS 3, the value of the business attributed to earnings from new customers should remain in goodwill, and accordingly the MEEM solely uses management's forecast revenue for existing customers.
Discount rate	We used a discount rate reflecting the risks associated with customer relationships arising from the fee income. We considered a discount rate equal to the CoE plus a premium of 1% for the non-contractual customer relationships.
Attrition rate and useful life	The contributory pension scheme in Nigeria operates under a B2B2C model. Typically, employees are at liberty to choose their preferred pension fund administrators. Organisations are mandated to make periodic payment on behalf of their employees into their preferred pension scheme, thus making the employees (pension contributors) retail customers. Contributions made by individual employers and employees into the scheme are combined and unitized, while the PFA forges ahead to invest the funds into various instruments within PenCom's approved regulatory limits. In addition, the nature of the Nigerian pension industry is such that employees and individual contributors rarely have to switch from one pension fund administrator to the other. We also understand from our analysis of trends in the industry and past transactions that most existing pension contributors mostly maintain their PFA until retirement as there are no incentive for moving from one pension fund administrator to the other, hence the low attrition rate. Based on the provisions of the pension law, customers contribution period is equivalent to the number of service years which is the earlier of 35 years or 60 years of age. We have adopted a useful life of 21.5 years which is the average useful life for customer relationship from previous transactions in the pension industry. Based on the trend in the pension industry and data collated from the Markable database, we have adopted an attrition rate of 4.6% (average attrition rate for recent transactions in the pension industry), hence having a retention rate of 95.4%. We have also assumed that the retention rate will be constant over the forecast period.

Contributory asset charges and required returns To quantify the cash flows attributable solely to the subject intangible asset, Contributory Asset Charges (“CACs”) were applied to account for the use of and/or required return on those assets necessary to realise the subject intangible assets cash flows. A CAC is defined as a hypothetical lease charge which assumes that the owner of the intangible asset would have to rent all other assets contributing to cash flow. The contributory assets identified includes fixed assets (PPE and ROU), intangible assets (software and license) and restricted minimum capital required. In calculating the applicable CACs, we have utilised the Gross Lease Method, where the CAC was calculated using the return on asset methodology.  
The required rate of return on the fixed assets (PPE and ROU) was assumed to be 16.37%, a blended debt and equity rate of 80% equity and 20% debt, as fixed assets cannot be financed with 100% debt.

The required rate of return on the existing Intangible asset (software and license) was assumed to be 18.6%. This is arrived at by adding a premium of 0.5% to the CoE of 18.1%.

The required rate of return on the restricted minimum capital required was assumed to be 18.6%. This is arrived at by adding a premium of 0.5% to the CoE of 18.1%.

All CACs have been put relative to total projected fee income of Access Pensions, which has later been used to allocate these charges to different intangible assets. The allocation is provided in the accompanying valuation schedules

Tax We applied the Nigerian corporate tax rate of 32.5% to the forecast cash flows.

Tax amortisation benefit (“TAB”) Tax amortisation benefits refer to the present value of income tax savings resulting from the tax deduction generated by the amortisation of intangible assets. In valuing the customer relationships, no tax amortisation benefit was calculated. This is because there is no provision for tax amortization benefit in the Nigerian tax law.

### 3.14 Impairment of non-financial assets

The carrying amounts of the Group’s non-financial assets other than goodwill and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset’s recoverable amount is estimated. For goodwill and intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated each year at the same time.

The recoverable amount of goodwill is estimated at each reporting date. An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of cash inflows of other assets or groups of assets (the “cash-generating unit” or CGU). Subject to an operating segment ceiling test, for the purposes of goodwill impairment testing, CGUs to which goodwill has been allocated are aggregated so that the level at which impairment is tested reflects the lowest level at which goodwill is monitored for internal reporting purposes. Goodwill acquired in a business combination is allocated to the groups of CGUs that are expected to benefit from the synergies of the combination.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognised in prior years are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset’s carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

### 3.15 Discontinued operations

The Group presents discontinued operations in a separate line in the consolidated income statement if an entity or a component of an entity has been disposed of or is classified as held for sale and:

- (a) Represents a separate major line of business or geographical area of operations;
- (b) Is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations; or
- (c) Is a subsidiary acquired exclusively with a view to resale (for example, certain private equity investments).

Net profit from discontinued operations includes the net total of operating profit and loss before tax from operations, including net gain or loss on sale before tax or measurement to fair value less costs to sell and discontinued operations tax expense. A component of an entity comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the Group’s operations and cash flows. If an entity or a component of an entity is classified as a discontinued operation, the Group restates prior years in the consolidated income statement.

Non-current assets, or disposal groups comprising assets and liabilities, that are expected to be recovered primarily through sale or distribution rather than through continuing use, are classified as held for sale or distribution. Immediately before classification as held for sale or distribution, the assets, or components of a disposal group, are re-measured in accordance with the Group’s accounting policies. Thereafter generally the assets, or disposal group, are measured at the lower of their carrying amount and fair value less costs to sell. Any impairment loss on a disposal group is allocated first to goodwill, and then to the remaining assets and liabilities on pro rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets, employee benefit assets, investment property or biological assets, which continue to be measured in accordance with the Group’s accounting policies.

Impairment losses on initial classification as held for sale or distribution and subsequent gains and losses on re-measurement are recognised in the income statement. Gains are not recognised in excess of any cumulative impairment loss.

Once classified as held for sale or distribution, intangible assets and property, plant and equipment are no longer amortised or depreciated, and any equity-accounted investee is no longer equity accounted.

### **3.16 Non-current assets (or disposal groups) held for sale**

Non-current assets (or disposal groups) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction and a sale is considered highly probable. They are stated at the lower of carrying amount and fair value less costs to sell.

Investment property classified as non-current asset held for sale are measured at fair value, gain or loss arising from a change in the fair value of investment property is recognised in income statement for the year in which it arise.

### **3.17 Provisions**

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. The increase in the provision due to passage of time is recognised as interest expenses.

#### **(a) Restructuring**

A provision for restructuring is recognised when the Group has approved a detailed and formal restructuring plan, and the restructuring either has commenced or has been announced publicly. Future operating costs are not provided for.

### **3.18 Financial guarantees**

Financial guarantees which includes Letters of credit are contracts that require the Group to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument. Financial guarantee liabilities are initially recognised at their fair value, and the initial fair value is amortised over the life of the financial guarantee. The guarantee liability is subsequently carried at the higher of this amortised amount and the present value of any expected payment (when a payment under the guarantee has become probable).

Letters of credits which have been guaranteed by the Group but funded by the customer is included in other liabilities while those guaranteed and funded by the Group is included in deposit from financial institutions.

### **3.19 Employee benefits**

#### **(a) Defined contribution plans**

A defined contribution plan is a post employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognised as an expense in the income statement when they are due in respect of service rendered before the end of the reporting period.

Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available. Contributions to a defined contribution plan that are due more than 12 months after the end of the reporting year in which the employees render the service are discounted to their present value at the reporting date.

Access Holding Plc operates a funded, defined contribution pension scheme for employees. Employees and the Company contribute 8% and 10% respectively of the qualifying staff salary in line with the provisions of the Pension Reforms Act 2014.

#### **(b) Termination benefits**

Termination benefits are payable when employment is terminated by the group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The group recognises termination benefits at the earlier of the following dates: (a) when the group can no longer withdraw the offer of those benefits; and (b) when the entity recognises costs for a restructuring that is within the scope of IAS 37 and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting year are discounted to their present value.

**(c) Post employment defined benefit plan**

The Group has a non-contributory, un-funded lump sum defined benefit plan for top executive management of the Group from General Manager and above based on the number of years spent in these positions.

Depending on their grade, executive staff of the Group upon retirement are entitled to certain benefits based on their length of stay on that grade. The Group's net obligation in respect of the long term incentive scheme is calculated by estimating the amount of future benefits that eligible employees have earned in return for service in the current and prior years. That benefit is discounted to determine its present value. The rate used to discount the post employment benefit obligation is determined by reference to the yield on Nigerian Government Bonds, that have maturity dates approximating the terms of the Group's obligations.

The calculation is performed annually by a qualified actuary using the projected unit credit method. When the benefits of a plan are improved, the portion of the increased benefit relating to past service by employees is immediately recognized in the income statement. The Group recognizes all actuarial gains or losses and all expenses arising from defined benefit plan immediately in the balance sheet, with a charge or credit to other comprehensive income (OCI) in the years in which they occur. They are not recycled subsequently in the income statement.

**(d) Short-term employee benefits**

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

**(e) Share-based payment remuneration scheme**

The Group applies IFRS 2 Share Based Payments in accounting for employee remuneration in the form of shares.

Employee incentives include awards in the form of shares. The cost of the employee services received in respect of the shares or share granted is recognised in the income statement over the period that employees provide services, generally the period between the date the award is granted or notified and the vesting date of the shares. The overall cost of the award is calculated using the number of shares and options expected to vest and the fair value of the shares or options at the date of grant.

The number of shares expected to vest takes into account the likelihood that non-market vesting and service conditions included in the terms of the awards will be met. Failure to meet the non-vesting condition is treated as a forfeiture, resulting in an acceleration of recognition of the cost of the employee services.

The fair value of shares is the market price ruling on the grant date, in some cases adjusted to reflect restrictions on transferability. The cost recognised as a result of shares granted in the period has been expensed within Personnel expenses, with a corresponding increase in the liability account as the scheme is cash-settled.

**3.20 Share capital and reserves****(a) Share issue costs**

Incremental costs directly attributable to the issue of an equity instrument are deducted from the initial measurement of the equity instruments.

**(b) Additional Tier 1 Capital**

The Group classifies financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instruments. The Additional tier 1 securities issued by the Bank are not redeemable by the subscribers and bear an entitlement to coupons at the sole discretion of the board of directors of the Bank. Accordingly, they are presented within equity. Distributions thereon are recognized in Equity. Based on the Group's assessment of the terms of the AT 1 securities, the coupon payments meet the definition of dividend. Therefore, the related tax impacts are recognized in profit or loss in accordance with IAS 12. See note 38c ) for more details

**(c) Dividend on the Company's ordinary shares**

Dividends on ordinary shares are recognised in equity in the period when approved by the Group's shareholders. Dividends for the period that are declared after the end of the reporting period are disclosed in the subsequent events note.

**(d) Treasury shares**

Where the subsidiaries within the Group purchased the shares of the Company, the transaction is accounted for as cash settled, a liability is recognized in the statement of financial position and expensed as other staff benefit in the statement of comprehensive income over the course of the minimum vesting period. The liability is remeasured at each reporting date with gains and loss recognised in the statement of comprehensive income. Should any employee within the scheme leave the Group within the vesting period, the shares maybe forfeited depending on whether the staff was relieved of his/her duties by the Company or voluntarily resigned.

By the resolution of the Board and Shareholders, the Company sets aside an amount not exceeding twenty (20) percent of the aggregate emoluments of the Group's employees in each financial year to purchase shares of Access Holdings Plc's from the floor of the Nigerian Exchange Group(NGX) for the purpose of the plan. The group has also established a Structured Entity (SE) to hold shares of the Company purchased. Upon vesting, the SE transfers the shares to employees.

**(e) Earnings per share**

The Group presents basic and diluted earnings per share (EPS) for its ordinary shares. Basic EPS is calculated by dividing the profit and loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

**(f) Regulatory risk reserve**

In compliance with the Prudential Guidelines for Licensed Banks, the Group assesses qualifying financial assets using the guidance under the Prudential Guidelines. The guidelines apply objective and subjective criteria towards providing losses in risk assets. Assets are classified as performing or non-performing. Non performing assets are further classed as substandard, doubtful or lost with attendant provisions. There are no restrictions to the distribution of these reserves

<b>Classification</b>	<b>Percentage</b>	<b>Basis</b>
Substandard	10%	Interest and/or principal overdue by 90 days but less than 180 days
Doubtful	50%	Interest and/or principal overdue by 180 days but less than 365 days
Lost	100%	Interest and/or principal overdue by more than 365 days

A more accelerated provision may be done using the subjective criteria. A 2% provision is taken on all risk assets that are not specifically provisioned.

The results of the application of Prudential Guidelines and the expected credit loss determined for these assets under IFRS 9 are compared. The IFRS 9 determined impairment charge is included in the income statement.

Where the Prudential Guidelines provision is greater, the difference is appropriated from retained earnings and included in a non-distributable 'Statutory credit reserve'. Where the IFRS 9 expected credit loss is greater, no appropriation is made and the amount of IFRS 9 expected credit loss is recognised in the income statement.

Following an examination, the regulator may also require more amounts to be set aside on risk and other assets. Such additional amounts are recognised as an appropriation from retained earnings to regulatory risk reserve.

**(g) Capital reserve**

This balance represents the surplus nominal value of the reconstructed shares of the Company which was transferred from the share capital account to the capital reserve account after the share capital reconstruction in October 2006. The Shareholders approved the reconstruction of 13,956,321,723 ordinary shares of 50 kobo each of the Bank in issue to 6,978,160,860 ordinary shares of 50 kobo each by the creation of 1 ordinary shares previously held.

**(h) Fair value reserve**

The fair value reserve comprises the net cumulative change in the fair value of investments measured through other comprehensive income until the investment is derecognised or impaired.

**(i) Foreign currency translation reserve**

This balance appears only in the Group accounts and represents the foreign currency exchange difference arising from translating the results and financial position of all the group entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency.

**(j) Retained earnings**

Retained earnings are the undistributable profit carried forward recognised income net of expenses plus current year profit attributable to shareholders.

**(k) Statutory Reserves Investment**

\* Statutory Reserves Investment – The Statutory Reserve in accordance with the provision of the Pension Reform Act (s.81 of PRA 2014) is used to recognise an annual transfer of 12.5% of profit after tax from retained earnings into Statutory Reserve Fund.

\* Every Pensions Fund Administrator shall maintain a Statutory Reserve Fund as contingency fund to meet any claim for which the Pension Fund Administrator may be liable as may be determined by the Commission.

**(l) Pensions Protection Fund Investment**

\* The Pension Commission shall establish and maintain a fund to be known as the Pension Protection Fund for the benefits of eligible pensioners covered by any pension scheme established, approved or recognized under this Act.

\* The Pension Protection Fund shall consist of –

\* An annual subvention of 1% of the total monthly wage bill payable to employees in the public service of the Federation towards the funding of the minimum guaranteed pension;

\* Annual pension protection levy paid by the Commission and all licensed pension operators at a rate to be determined by the Commission from time to time

**3.21 Levies**

The Group recognizes liability to pay levies progressively if the obligating event occurs over a year. However, if the obligation is triggered on reaching a minimum threshold, the liability is recognised when that minimum threshold is reached. The Group recognizes an asset if it has paid a levy before the obligating event but does not yet have a present obligation to pay that levy. The obligating event that gives rise to a liability to pay a levy is the event identified by the legislation that triggers the obligation to pay the levy.

**3.22 Derivatives and hedging activities**

Access Holdings Plc applies hedge accounting to manage its foreign exchange risk

Derivatives are initially recognised at fair value on the date a derivative contract is entered into, and they are subsequently remeasured to their fair value at the end of each reporting year. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument and, if so, the nature of the item being hedged. The Group designates certain derivatives as hedges of the fair value of recognised liabilities (fair value hedges).

At inception of the hedge relationship, the Group documents the economic relationship between hedging instruments and hedged items, including whether changes in the fair value of the hedging instruments are expected to offset changes in the fair value of hedged items. The Group documents its risk management objective and strategy for undertaking its hedge transactions. The Group uses the actual ratio between the hedged item and hedging instruments to determine its hedge ratio.

The fair values of derivative financial instruments designated in hedge relationships are disclosed in notes to the financial statements. The full fair value of a hedging derivative is presented as a non-current asset or liability when the remaining maturity is more than 12 months; it is classified as a current asset or liability when the remaining maturity is less than 12 months. Trading derivatives are classified as a current asset or liability.

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in profit or loss, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The Group uses forward contracts to hedge the fair value changes attributable to foreign exchange risk on the hedged item. The Group generally designates only the change in fair value of the forward contract related to the spot component as the hedging instrument. The change in the forward element of the forward contract is not part of the hedging relationship and is recognised separately in the statement of profit or loss within Net gain on financial instruments at fair value through profit or loss. Gains or losses relating to the effective portion of the change in the spot component of the forward contracts are recognised in the profit or loss within Net Foreign Exchange Gain/(Loss) together with the changes in the fair value of the hedged liabilities attributable to foreign exchange risk while the gains or losses relating to the ineffective portion are recognised within Net loss on fair value hedge (Hedging ineffectiveness) in the profit or loss.

#### **Hedge effectiveness**

The Group determines hedge effectiveness at the inception of the hedge relationship, and through periodic prospective effectiveness assessments, to ensure that an economic relationship exists between the hedged item and hedging instrument. The hedge effectiveness is determined every reporting period.

#### **Derivatives that do not qualify for hedge accounting**

Certain derivative instruments are not designated for hedge accounting. Changes in the fair value of any derivative instrument that are not designated for hedge accounting are recognised immediately in profit or loss and are included in Net gain on financial instruments at fair value through profit or loss.

### **3.23 Associates**

Associates are all entities over which the group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting. Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the group's share of the post-acquisition profits or losses of the investee in profit or loss, and the group's share of movements in other comprehensive income of the investee in other comprehensive income. The group's investment in associates includes goodwill identified on acquisition. In the separate financial statements, investments in associates are carried at cost less impairment.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to the income statement where appropriate.

The Group's share of post-acquisition profit or loss is recognised in the income statement and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income with a corresponding adjustment to the carrying amount of the investment. When the group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the group does not recognise further losses unless it has incurred legal or constructive obligations or made payments on behalf of the associate. Associates are carried at cost.

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognises the amount adjacent to 'share of profit/(loss)' of associates in the income statement.

Profits and losses resulting from transactions between the Group and its associate are recognised in the Group's financial statements only to the extent of unrelated investor's interests in the associates. Unrealised losses are eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the group.

The cost of an associate acquired in stages is measured as the sum of the fair value of the interest previously held plus the cost of any additional consideration transferred as of the date when the investment became an associate. Changes in fair value of previously held interest are recognized in profit or loss.

### **3.24 Fiduciary activities**

The Group commonly engages in trust or other fiduciary activities that result in the holding or placing of assets on behalf of individuals, trusts, post-employment benefit plans and other institutions. These assets under management are disclosed in the financial statements of the Group. Also, fee income earned and fee expenses incurred by the Group relating to the Group's responsibilities from fiduciary activities are recognised in profit or loss.

#### 4.0 Use of estimates and judgements

##### • Critical judgements

These disclosures supplement the commentary on financial risk management (see note 5). Estimates where management has applied judgements are:

- i) Allowance for credit losses
- ii) Assessment of impairment on goodwill on acquired subsidiaries
- iii) Defined benefit plan
- iv) Valuation of unquoted equities
- v) Valuation of derivatives
- vi) Equity settled share-based payment
- vii) Determination of intangible assets arising on business combination
- (xiii) Determination of control over investees
- (xiv) Classification of financial assets

Management has assessed the first four estimates as having the key sources of estimation certainty, and are explained in further detail below. The other estimates have been assessed in their individual accounting policies.

##### **Economic loss impact of Ghana sovereign debt on the Group's position**

The Group took an impairment of ₦195.30Bn in (December 2022: 103.10Bn) in recognition of the economic loss impact of Ghana sovereign debt crisis (Domestic debt and Eurobonds). Whilst the economic loss on Ghana Domestic debt has been determined via a Domestic Debt Exchange Programme (DDE) with definite terms, unlike the DDE, the Ghanaian government has not yet presented restructuring terms for the Eurobonds. Though, restructuring parameters are subject to a lot of uncertainty, the possibility of further material impairment charge for this event is considered remote. The carrying value and fair value for Ghana sovereign debts in the books of the Group amounts to ₦794.75Bn (December 2022: ₦348.15Bn).

##### **Extension and termination options - Determining the lease term**

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or years after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

For leases of properties, the following factors are normally the most relevant:

- If there are significant penalties to terminate (or not extend), the Group is typically reasonably certain to extend (or not terminate).
- If any leasehold improvements are expected to have a significant remaining value, the Bank is typically reasonably certain to extend (or not terminate).
- Otherwise, the Group considers other factors including historical lease durations and the costs and business disruption required to replace the leased asset.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Group becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee. During the current financial year, the financial effect of revising lease terms to reflect the effect of exercising extension and termination options was a decrease in recognised lease liabilities and right-of-use assets of N309.19 million.

##### **Key sources of estimation uncertainty**

###### (i) **Allowances for credit losses**

Loans and advances to banks and customers are accounted for at amortised cost and are evaluated for impairment on a basis described in accounting policy (see note 3.9)

The measurement of impairment losses both under IFRS 9 across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Group's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- The Group's internal credit grading model, which assigns PDs to the individual grades
  - The Group's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a LTECL basis and the qualitative assessment
  - The segmentation of financial assets when their ECL is assessed on a collective basis
  - Development of ECL models, including the various formulas and the choice of inputs
  - Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels, exchange rates, crude oil prices, GDP and collateral values, and the effect on PDs, EADs and LGDs
  - Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models.
- It has been the Group's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

The standard requires recognition of an impairment allowance on financial instruments, based on 12 months or lifetime expected credit losses. The ECL calculations are based on the components discussed in the previous sections.

IFRS 9 requires the calculation of probability-weighted ECL impairments. Three ECL figures were therefore calculated for each scenario (optimistic, best-estimate and downturn ECLs) and probability-weighted to arrive at a single ECL impairment for each account. The likelihood of the best-estimate, downturn and optimistic scenarios were assumed to be 34.67%, 30.00% and 35.33% respectively.

The EIR, as provided by the Group, is used to discount all ECLs to the reporting date. The method followed for accounts classified as Stage 1, Stage 2 or Stage 3 are set out below; For accounts with no EIR information, the contractual rate is used as a proxy

Stage 1

Account-level ECL figures are calculated projecting monthly expected losses for the next 12-months of each account. The forward, macro-adjusted monthly PDs are applied to the applicable LGD estimate and EAD or the collateral adjusted EAD (if secured) at the start of each month.

Stage 2

Account-level ECL figures are calculated projecting monthly expected losses for the remaining lifetime of each account. The forward, macro-adjusted monthly PDs are applied to the applicable LGD estimate and the EAD or collateral adjusted EAD (if secured) at the start of each month.

Stage 3

For the purposes of this model, account-level ECL figures are calculated by applying the applicable LGD estimate to the balance as at the reporting date

The final ECL impairment is calculated as the probability-weighted average of the ECLs produced for the three macro-economic scenarios.

The Group reviews its loan portfolios to assess impairment at least on a half yearly basis. In determining whether an impairment loss should be recorded in the income statement, the Group makes judgements as to whether there is any observable data indicating a significant increase in credit risk followed by measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a bank, or national or local economic conditions that correlate with defaults on assets in the Group.

The Group makes use of estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

The specific component of the total allowances for impairment applies to financial assets evaluated individually for impairment and is based upon management's best estimate of the present value of the cash flows that are expected to be received. In estimating these cash flows, management makes judgements about a debtor's financial situation and the net realisable value of any underlying collateral. Each impaired asset is assessed on its merits, and the workout strategy and estimate of cash flows considered recoverable are independently reviewed by the Credit Risk Management Department (CRMD).

A collective component of the total allowance is established for:

- Groups of homogeneous loans that are not considered individually significant and
- Groups of assets that are individually significant but were not found to be individually impaired

Collective allowance for groups of homogeneous loans is established using statistical modelling of historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgement as to whether current economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical modelling. Default rates, loss rates and the expected timing of future recoveries are regularly benchmarked against actual outcomes to ensure that they remain appropriate.

Collective allowance for group of assets that are individually significant but that were not found to be individually impaired cover credit losses inherent in portfolios of loans and advances and held to maturity investment securities with similar credit characteristics when there is objective evidence to suggest that they contain impaired loans and advances and held to maturity investment securities, but the individual impaired items cannot yet be identified. In assessing the need for collective loan loss allowances, management considers factors such as credit quality, portfolio size, concentrations, and economic factors. In order to estimate the required allowance, assumptions are made to define the way inherent losses are modelled and to determine the required input parameters, based on historical experience and current economic conditions. The accuracy of the allowances depends on estimates of future cash flows for specific counterparty allowances and the model assumptions and parameters used in determining collective allowances are estimated.

**(ia) Sensitivity of Exposure at default - Probability of Default (PD) & Loss Given Default (LGD)****Loans and Advances To Customers**

In establishing sensitivity to ECL estimates for corporate loans, four variables (GDP growth rate, Crude Oil Price, inflation and US exchange rate were considered). Of these variables, the Group's corporate loans reflects greater responsiveness to GDP growth rate and crude oil price

**On balance Sheet Exposure**

GDP growth rate : Given the significant impact on companies performance and collateral valuations

Prime Lending Rate : Given it impacts on lending rates and potential increase in rate of default

The table below outlines the total ECL for wholesale portfolios as at 31 December 2023, if each of the key assumptions used change by plus or minus 10%. The responsiveness of the ECL estimates to variation in macroeconomic variables have been presented below while putting in perspective, interdependencies between the various economic inputs. An increase and decrease in Macroeconomic Scalars by 10% results in an increase/Decrease in Impairment of N4.51bn and N4.54bn respectively. Further increase/Decrease in the Probability of default by 10% results in an impairment increase/decrease of N4.44bn and N4.50bn respectively.

	-10%	+10%
<b>P &amp; L Impact of change in Macroeconomic variables</b>	(4,535)	4,506

	-10%	+10%
<b>P &amp; L Impact of change in Changing PD</b>	(4,502)	4,436

**Off balance Sheet Exposure**

GDP growth rate : Given the significant impact on companies performance and collateral valuations

Prime Lending Rate : Given it impact on Lending rates and potential increase in rate of default

The table below outlines the total ECL for wholesale off balance sheet exposures as at 31 December 2023, if the assumptions used to measure ECL remain as expected (amount as presented in the statement of financial position), as well as if each of the key assumptions used change by plus or minus 10%. The responsiveness of the ECL estimates to variation in macroeconomic variables have been presented below while putting in perspective, interdependencies between the various economic inputs.

	-10%	+10%
<b>P &amp; L Impact of change in Macroeconomic variables</b>	(569)	568

**Statement of prudential adjustments**

Provisions under prudential guidelines are determined using the time based provisioning regime prescribed by the Revised Central Bank of Nigeria (CBN) Prudential Guidelines. This is at variance with the expected credit loss model required by IFRS 9. As a result of the differences in the methodology/provision regime, there will be variances in the impairments allowances required under the two methodologies.

Paragraph 12.4 of the revised Prudential Guidelines for Deposit Money Banks in Nigeria stipulates that Banks would be required to make provisions for loans as prescribed in the relevant IFRS Standards when IFRS is adopted. However, Banks would be required to comply with the following:

- a) Provisions for loans recognised in the profit or loss account should be determined based on the requirements of IFRS. However, the IFRS provision should be compared with provisions determined under prudential guidelines and the expected impact/changes in general reserves should be treated as follows:
- Prudential Provisions is greater than IFRS provisions; the excess provision resulting should be transferred from the retained earnings account to a "regulatory risk reserve".
  - Prudential Provisions is less than IFRS provisions; IFRS determined provision is charged to the statement of comprehensive income. The cumulative balance in the regulatory risk reserve is thereafter reversed to the retained earnings account
- b) The non-distributable reserve should be classified under Tier 1 as part of the core capital.

Access Bank Nigeria has complied with the requirements of the prudential guidelines as follows:

<b>Statement of prudential adjustments</b>		<b>December 2023</b>	<b>December 2022</b>

Total impairment allowances on loans per IFRS		<b>250,273</b>	<b>65,403</b>
<b>Total regulatory impairment based on prudential guidelines</b>		<b>250,273</b>	<b>65,403</b>
Balance, beginning of the year		-	-
Additional transfers to/(from) regulatory risk reserve		-	-
<b>Balance, end of the year</b>		<b>-</b>	<b>-</b>

The Central Bank of Nigeria (CBN) via its circular BSD/DIR/GEN/LAB/08/052 issued on 11 November 2015, directed banks in Nigeria to increase the general provision on performing loans from 1 percent to 2 percent for prudential review of credit portfolios in order to ensure adequate buffer against unexpected loan losses.

**Assessment of impairment of goodwill on acquired subsidiaries**

(ii)

Goodwill on acquired subsidiaries were tested for impairment by comparing the value-in-use for the cash generating unit to the carrying amount of the goodwill based on cash flow projections. Projected cash flows for Kenya were discounted to present value using a discount rate of 23.77% and a cash flow terminal growth rate of 5.47%. Projected cash flows for Rwanda was discounted using a discount rate of 22.63% and terminal growth rate of 6.21%. Projected cash flows for Former Diamond Bank was discounted using a discount rate of 31.78% and terminal growth rate of 3.19%. Projected cash flows for Access Botswana was discounted using a discount rate of 8.8% and terminal growth rate of 4.16%. The Group determined the appropriate discount rate at the end of the year using the Capital Asset Pricing Model. See note 29b for further details.

**Defined benefit plan**

(iii)

The present value of the long term incentive plan depends on a number of factors that are determined in an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of obligations. The assumptions used in determining the net cost (income) for pensions include the discount rate. The Group determines the appropriate discount rate at the end of the year. In determining the appropriate discount rate, reference is made to the yield on Nigerian Government Bonds that have maturity dates approximating the terms of the related pension liability. Other key assumptions for pension obligations are based in part on current market conditions. See note 37 for the sensitivity analysis.

(iv) **Valuation technique unquoted equity:**

The investment valuation policy (IVP) of the Group provides the framework for accounting for the Group's investment in unquoted equity securities while also providing a broad valuation guideline to be adopted in valuing them. Furthermore, the IVP details how the group decides its valuation policies and procedures and analysis of changes in fair value measurements from year to year.

In accordance with IFRS 13 fair value measurement, which outlines three approaches for valuing unquoted equity instruments; market approach, the income approach and the cost approach. The Group estimated the fair value of its investment in each of the unquoted equity securities at the end of the financial year using the market approach.

The adjusted fair value comparison approach of EV/EBITDA, P/E ratios and P/Bv ratios was adopted in valuing each of these equity investments taken into cognizance the suitability of the model to each equity investment and the availability of financial information while minimizing the use of unobservable data.

**Description of valuation methodology and inputs:**

The fair value of the other unquoted equity securities were derived using the Adjusted fair value comparison technique. Adjusted fair value comparison approach of EV/EBITDA, P/E ratios and P/B ratios are used as input data .

The steps involved in estimating the fair value of the Group's investment in each of the investees (i.e. unquoted equity securities) are as follows:

**Step 1:** Identify quoted companies with similar line of business ,structure and size

**Step 2:** Obtain the EV/EBITDA or the P/B or P/E ratios of these quoted companies identified from Bloomberg, Reuters or Nigeria Stock Exchange

**Step 3:** Derive the average or median of EV/EBITDA or the P/B or P/E ratios of these identified quoted companies

**Step 4:** Apply the lower of average (mean) or median of the identified quoted companies ratios on the Book Value or Earnings of the investment company to get the value of the investment company

**Step 5:** Discount the derived value of the investment company by applying an Illiquidity discount and size adjustment/haicut to obtain the Adjusted Equity Value

**Step 6:** Multiply the adjusted equity value by the present exchange rate for foreign currency investment

**Step 7:** Compare the Adjusted Equity value with the carrying value of the investment company to arrive at a net gain or loss

**a. Enterprise Value (EV):**

Enterprise value measures the value of the ongoing operations of a company. It is calculated as the market capitalization plus debt, minority interest and preferred shares, minus total cash and cash equivalents of the company.

**b. Earnings Before Interest, Tax Depreciation and Amortization (EBITDA):**

EBITDA is earnings before interest, taxes, depreciation and amortization. EBITDA is one of the indicator's of a company's financial performance and is used as a proxy for the earning potential of a business.

EBITDA = Operating Profit + Depreciation Expense + Amortization Expense

**c. Price to Book (P/B Ratio):**

The price-to-book ratio (P/B Ratio) is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest company book value per share or by dividing the company's market capitalization by the company's total book value from its balance sheet.

**b. Price to Earning (P/E Ratio):**

The price-earnings ratio (P/E Ratio) values a company using the current share price relative to its per-share earnings.

The sources of the observable inputs used for comparable technique were gotten from Reuters, Bloomberg and the Nigeria Stock Exchange

**Valuation Assumptions :**

i. Illiquidity discount of 25% is used to discount the value of the investments that are not tradable

ii. EPS Hair cut "emerging market" discount of 40% to take care of inflation and exchange rate impact being that the comparable companies are in foreign countries

**Basis of valuation:**

The assets is being valued on a fair open market value approach. This implies that the value is based on the conservative estimates of the reasonable price that can be obtained if and when the subject asset is offered for sale under the present market conditions.

**Method of Valuation**

The comparative method of valuation is used in the valuation of the asset. This method involves the analysis of recent transaction in such asset within the same asset type and the size of the subject asset after due allowance have been made for peculiar attributes of the various asset concerned.

The key elements of the control framework for the valuation of financial instruments include model validation and independent price verification. These functions are carried out by an appropriately skilled Finance team, independent of the business area responsible for the products. The result of the valuation are reviewed quarterly by senior management.

**(b) Hyperinflationary accounting**

The restatement in respect of hyperinflationary accounting has been calculated by means of conversion factors derived from the consumer price index (CPI) published by International Monetary Fund (IMF). The conversion factors used to restate the financial statements at 31 December 2023 are as follows:

□

Entity	Index□	Conversion Factor
31 December 2023	200.50	1.00
31 December 2022	162.80	1.23
31 December 2021	107.01	1.87

**4.1 Valuation of financial instruments**

The table below analyses financial and non-financial instruments measured at fair value at the end of the financial year, by the level in the fair value hierarchy into which the fair value measurement is categorised:

#### Financial instrument measured at fair value

##### (a) Financial instruments in level 1

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in Level 1. Instruments included in Level 1 comprise primarily of government bonds, corporate bonds, treasury bills and equity investments classified as trading securities or fair value through other comprehensive income investments.

##### (b) Financial instruments in level 2

The fair value of financial instruments that are not traded in an active market are determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3. Specific valuation techniques used to value financial instruments include:

- (i) Quoted market prices or dealer quotes for similar instruments;
- (ii) The fair value of forward foreign exchange contracts is determined using forward exchange rates at the balance sheet date, with the resulting value discounted back to present value;
- (iii) Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

##### (c) Financial instruments in level 3

The Group uses widely recognised valuation models for determining the fair value of its financial assets. Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which market observable prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations. The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

For more complex instruments, the Group uses proprietary valuation models, which are usually developed from recognised valuation models. Some or all of the significant inputs into these models may not be observable in the market, and are derived from market prices or rates or are estimated based on assumptions. Examples of instruments involving significant unobservable inputs include certain investment securities for which there is no active market. Valuation models that employ significant unobservable inputs require a higher degree of management judgement and estimation in the determination of fair value. Management judgement and estimation are usually required for selection of the appropriate valuation model to be used, determination of expected future cash flows on the financial instrument being valued, determination of the probability of counterparty default and prepayments and selection of appropriate discount rates. Fair value estimates obtained from models are adjusted for any other factors, such as liquidity risk or model uncertainties, to the extent that the Group believes that a third party market participant would take them into account in pricing a transaction. Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Group entity and the counterparty where appropriate.

For level 2 assets, fair value was obtained using a recent market transaction during the year under review. Fair values of unquoted debt securities were derived by interpolating prices of quoted debt securities with similar maturity profile and characteristics.

#### Transfers between fair value hierarchy

The group's policy is to recognise transfers into and out of fair value hierarchy levels as at the end of the reporting year.

#### Determination of Control over Investees (Actis Golf) and Classification of Additional Tier 1 Capital and Equity

An investor controls an investee when the investor is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee requires a parent entity (an entity that controls one or more other entities) to present consolidated financial statements defines the principle of control, and establishes control as the basis for consolidation set out how to apply the principle of control to identify whether an investor controls an investee and therefore must consolidate the investee sets out the accounting requirements for the preparation of consolidated financial statements defines an investment entity and sets out an exception to consolidating particular subsidiaries of an investment entity\*.

**4.1. Valuation techniques used to derive Level 2 fair values**

Level 2 fair values of investments have been generally derived using the market approach. Below is a table showing sensitivity analysis of material unquoted investments categorised as Level 2 fair values.

Description	Fair value at 31 December 2023	Valuation Technique	Observable Inputs	Fair value if inputs increased by 5%	Fair value if inputs decreased by 5%	Relationship of observable inputs to fair value
Derivative financial assets	2,174,363	Forward and swap: Fair value through market rate from a quoted market Futures: Fair value through reference market rate	Market rates from quoted market	1,583,630	1,587,821	The higher the market rate, the higher the fair value of the derivative financial instrument
Derivative financial liabilities	471,821					
Investment in CSCS	7,440	The market value is obtained from the National Association Of Securities Dealers (NASD) as at the reporting year	Share price from NASD	7,812	7,142	The higher the share price, the higher the fair value
Nigerian Mortgage Refinance Company	306	The market value is obtained from the National Association Of Securities Dealers (NASD) as at the reporting year	Share price from NASD	321	290	The higher the share price, the higher the fair value

**4.1. Valuation techniques used to derive Level 3 fair values**

Level 3 fair values of investments have been generally derived using the adjusted fair value comparison approach. Quoted price per earning or price per book value, enterprise value to EBITDA ratios of comparable entities in a similar industry were obtained and adjusted for key factors to reflect estimated ratios of the investment being valued. Adjusting factors used are the Illiquidity Discount which assumes a reduced earning on a private entity in comparison to a publicly quoted entity and the Haircut adjustment which assumes a reduced earning for an entity located in Nigeria contributed by lower transaction levels in comparison to an entity in a developed or emerging market.

Description	Fair value at 31 December 2023	Valuation Technique	Observable Inputs	Fair value if inputs increased by 5%	Fair value if inputs decreased by 5%	Fair value if unobservable inputs increased by 5%	Fair value if unobservable inputs decreased by 5%	Relationship of unobservable inputs to fair value
Investment in Africa Finance Corporation	333,769	Adjusted fair value comparison approach	Median P/B multiples of comparable companies	350,457	317,081	329,360	338,178	The higher the illiquidity ratio, the control premium and the size adjustment/haircut, the higher the fair value
Investment in Unified Payment System Limited	8,247	Adjusted fair value comparison approach	Median PE ratios of comparable companies	7,893	7,142	8,138	8,356	The higher the illiquidity ratio and the size adjustment/haircut, the lower the fair value
Investment in NIBSS	36,109	Adjusted fair value comparison approach	Median P/B multiples of comparable companies	37,915	34,304	35,632	36,587	The higher the illiquidity ratio and the size adjustment/haircut, the lower the fair value
Investment in Afrexim	1,108	Adjusted fair value comparison approach	Median P/B multiples of comparable companies	1,163	1,052	1,102	1,113	The higher the illiquidity ratio and the size adjustment/haircut, the lower the fair value
Investment in FMDQ	7,783	Adjusted fair value comparison approach	Average P/B multiples of comparable companies	8,172	7,394	7,635	7,930	The higher the illiquidity ratio and the earnings per share haircut adjustment, the higher the fair value
Investment in CRC Bureau	311	Adjusted fair value comparison approach	Median P/B multiples of comparable companies	327	296	307	315	The higher the illiquidity ratio and the size adjustment/haircut, the lower the fair value
Capital Alliance Equity Fund	7,154	Adjusted fair value comparison approach	Median P/B multiples of comparable companies	7,512	6,797	7,512	6,797	The higher the illiquidity ratio and the size adjustment/haircut, the lower the fair value
NG Clearing	434	Adjusted fair value comparison approach	Median P/B multiples of comparable companies	456	412	431	437	The higher the illiquidity ratio and the size adjustment/haircut, the lower the fair value
SANEF	50	Adjusted fair value comparison approach	Fair value of transactions at settlement date	53	48	53	48	The higher the illiquidity ratio and the size adjustment/haircut, the lower the fair value

#### 4.1.5 Reconciliation of Level 3 Investments

The following tables presents the changes in Level 3 instruments for the period ended 31 December 2023

##### Financial assets at fair value through profit or loss (Equity)

	<b>Group December 2023</b>	<b>Group December 2022</b>	<b>Company December 2023</b>	<b>Company December 2022</b>
Opening balance	156,166	152,105	-	-
Acquired from business combination	-	-	-	-
Total unrealised gains in P/L	234,460	4,061	-	-
Sales	-	-	-	-

Opening balance	-	13,045	-	-
Additions	-	6,781	-	-
Reclassification	-	(19,826)	-	19,826
Balance, period end	-	-	-	<b>19,826</b>

#### 4.20 Fair value of financial assets and liabilities not carried at fair value

The fair value for financial assets and liabilities that are not carried at fair value were determined respectively as follows:

**(i) Cash**

The carrying amount of cash and balances with banks is a reasonable approximation of fair value.

**(ii) Loans and advances to banks and customers**

Loans and advances are net of charges for impairment. The estimated fair value of loans and advances represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value.

**(iii) Investment securities and pledged assets**

The fair values are based on market prices from financial market dealer price quotations. Where this information is not available, fair value is estimated using quoted market prices for securities with similar credit, maturity and yield characteristics.

The fair value comprises equity securities and debt instruments. The fair value for these assets are based on estimations using market prices and earning multiples of quoted securities with similar characteristics.

**(iv) Other assets**

The bulk of these financial assets have short maturities and the amounts is a reasonable approximation of fair value.

**(v) Deposits from banks and customers**

The estimated fair value of deposits with no stated maturity, which includes non-interest bearing deposits, is the amount repayable on demand. The estimated fair value of fixed interest-bearing deposits not quoted in an active market is based on discounted cash flows using interest rates for new debts with similar remaining maturity.

**(vi) Other liabilities**

The carrying amount of financial liabilities in other liabilities is a reasonable approximation of fair value. They comprise of short term liabilities which are available on demand to creditors with no contractual rates attached to them.

**(vii) Interest bearing borrowings**

The estimated fair value of fixed interest-bearing borrowings not quoted in an active market is based on the market rates for similar instruments for these debts over their remaining maturity.

**(viii) Debt securities issued**

The estimated fair value of floating interest rate debt securities quoted in an active market is based on the quoted market rates as listed on the irish stock exchange for these debts over their remaining maturity.

## 4.3 Financial assets and liabilities

## (a) Fair value measurement

Accounting classification measurement basis and fair values

The table below sets out the classification of each class of financial assets and liabilities, and their fair values.

	Financial assets designated as FVPL	Financial assets mandatorily measured through FVPL	Financial assets measured at amortized cost	Financial assets measured at FVOCI	Financial liabilities mandatorily measured through FVPL	Financial liabilities measured at amortised cost	Total carrying amount	Fair value

Collateral types included in others are All Asset debentures, Domiciliation, Counter Indemnity, Authority to collect, Irrevocable standing payment order, Guarantees

**Collateral held and other credit enhancements, and their financial effect**

The general creditworthiness of a customer tends to be the most relevant indicator of credit quality of a loan extended to it. However, collateral provides additional consideration in the credit process and the Group generally requests that corporate borrowers provide collateral. The Group may take collateral in the form of a first charge over real estate, floating charges over all corporate assets and other liens and guarantees. The Bank will sell or repossess a pledged collateral only in the event of a default and after exploring other means of repayment. In addition to the Group's focus on creditworthiness, the Group aligns with its Credit Policy Guide to periodically review the valuations of collaterals held against all loans to customers. This is done in line with the approved Framework for valuing various categories of collateral accepted by the Bank.

The fair values of collaterals are based upon last annual valuation undertaken by independent valuers on behalf of the bank. The valuation technique adopted for properties are based on fair values of similar properties in the neighborhood.

The fair values of non-property collaterals (such as equities, bond, treasury bills, etc.) are determined with reference to market quoted prices or market values of similar instruments.

There are no collaterals held against other financial assets. The Group obtained a property during the year by taking possession of collateral held as security against a loan. The Group's policy is to pursue timely realisation of the collateral in an orderly manner. The Group does not generally use the non-cash collateral for its own operations. Hence, the repossessed collateral has been included in assets classified as held for sale (Note 31).

### 5.1.3 Disclosure of fair value of Collateral held against loans and advances to customers by staging (g)

## 5.1.5 (a) Credit concentration

The Group's risk profile is assessed through a 'bottom-up' analytical approach covering all of the Group's major businesses and products. The risk appetite is approved by the Board and forms the basis for establishing the risk parameters within which the businesses must operate, including policies, concentration limits and business mix.

The Group monitors concentrations of credit risk by sector and by geographic location. An analysis of concentrations of net credit risk at the reporting date is shown below:

## Market risk management

## 5.2. Interest rate gap position

Repricing gap measures the difference between the Company's interest sensitive assets and liabilities within certain maturity ranges. Differences between these assets and liabilities pose as potential losses from unexpected changes in interest rate. Negative Gaps represent situations when assets are less than liabilities and the Bank is exposed to an increase in interest rates. Where assets are more than liabilities this can be described as positive gap and the Bank is exposed to decline in interest rates.

The results above shows a negative gap of N3.9billion in the 'less than 3 months' time bucket, however this is as a result of the contractual nature of Non Maturity deposits. A significant portion of this gap is as a result of the contractual nature of Non Maturing Deposits.

## A summary of the Group's interest rate gap position on financial instruments is as follows:

Group	Re-pricing year						Total
	Less than 3 months	4 - 6 months	7 - 12 months	1 - 5 periods	More than 5 periods	Non-Interest bearing

**Market risk management**

The Group trades on bonds, treasury bills and foreign currency. Market risk in trading portfolios is monitored and controlled using tools such as position limits, value at risk and present value of an assumed basis points change in yields or exchange rates coupled with concentration limits. The major measurement technique used to measure and control market risk is outlined below.

The table below sets out information on the exposure to fixed and variable interest instruments.

Derivative financial instruments include elements of interest rate differential between the applicable underlying currencies. Further details on the fair value of derivatives have been discussed in Note 21 of the financial statement.

**Interest rate risk**

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Interest margins may increase as a result of such changes but may reduce losses in the event that unexpected movements arise. The Board sets limits on the level of mismatch of interest rate repricing (note 5.2.1) that may be undertaken, which is monitored daily by Group Treasury.

**Cash flow and fair value interest rate risk**

The group's interest rate risk arises from risk assets, long-term borrowings, deposits from banks and customers. Borrowings issued at variable rates expose the group to cash flow interest rate risk.

The management of interest rate risk against interest rate gap limits is supplemented with monitoring the sensitivity of the Group's financial assets and liabilities to various scenarios.

Interest rate movement have both cash flow and fair value effect depending on whether interest rate is fixed or floating. The impact resulting from adverse or favourable movement flows from either retained earnings or OCI and ultimately ends in equity in the following manner:

(i) Retained earnings arising from increase or decrease in net interest income and the fair value changes reported in profit or loss.

(ii) Fair value reserves arising from increases or decreases in fair value through other comprehensive income financial instruments report directly in other comprehensive income.

	<b>272</b>	<b>(272)</b>

The table above sets out the impact on net interest income of a 100 basis points parallel fall or rise in all yields. A parallel increase in yields by 100 basis points would lead to an increase in net interest income while a parallel fall in yields by 100 basis points would lead to a decline in net interest income. The interest rate sensitivities are based on simplified scenarios and assumptions, including that all positions will be retained and rolled over upon maturity. The figures represent the effect of movements in net interest income based on the 100 basis point shift in interest rate and subject to the current interest rate exposures. However, the effect has not taken into account the possible risk management measures undertaken by the Bank to mitigate interest rate risk. In practice, the Assets and Liability Committee, ALCO seeks proactively to change the interest rate risk profile to minimize losses and optimise net revenues. The projections also assume that interest rates on various maturities will move within similar ranges, and therefore do not reflect any potential effect on net interest income in the event that some interest rates may change and others remain unchanged.

**Price sensitivity analysis on bonds, promissory notes and treasury bills**

The table below shows the impact of likely movement in yields on the value of bonds and treasury bills. This relates to the positions held for fair value through profit or loss and fair value through other comprehensive income. Since an increase in yields would lead to decline in market values of bonds and treasury bills, the analysis was carried out to show the likely impact of 50 and 100 basis points increase in market yields. The impact of fair value through profit or loss investments is on the income statement while the impact of fair value through other comprehensive income instruments is on the statement of other comprehensive income.

**Foreign currency sensitivity analysis**

The Group's principal foreign currency exposure is to US Dollars, as it constitutes a significant portion of the Group's foreign currency exposure as at 30 September 2023. The table below illustrates the hypothetical sensitivity of the Group and Bank's reported profit to a 5% increase in the US Dollar/Naira exchange rates at the year end, assuming all other variables remain unchanged. The sensitivity rate of 5% increase represents the directors' assessment of a reasonable possible change based on historic volatility.

The analysis assumes that exchange rate fluctuations on currency derivatives that form part of an effective fair value hedge affects the income statement and the fair value of the hedging derivatives. For foreign exchange derivatives which are not designated hedges, movements in exchange rates impact the income statement.

**Group**

	<b>Impact on statement of comprehensive income December 2022</b>
<b>In millions of naira</b>	
Naira weakens by 5%	-

The NGN/USD exchange rate applied in the conversion of balances as at period end is N756.24/USD1 (2022: N461.10/USD1). The strengthening or weakening of Naira may not produce symmetrical results depending on the proportion and nature of balance sheet and the impact of derivatives.

	December 2023	December 2022
<b>Market Risk for Hedging instruments</b>		
<i>Total exposure to foreign exchange risk</i>	<b>N'm</b>	<b>N'm</b>
Derivative assets (fair value hedge)	1,217,184	288,188
Interest bearing loans and borrowings	(1,009,384)	(633,346)
Deposits from other financial institutions	(1,799,618)	(642,951)

The Bank uses foreign currency forwards to hedge its exposure to foreign currency risk on the US dollar denominated interest bearing loans and deposits for financial institutions. Under the Bank's policy, the critical terms of the forward should align closely with the hedged items. The Bank only designates the spot component of foreign currency forwards in hedge relationships. The spot component is determined with reference to relevant spot market exchange rates. The differential between the contracted forward rate and the spot market exchange rate is defined as the forward points. The forward points are discounted and are recognised in the profit or loss.

**Liquidity risk management**

The following table shows the undiscounted cash flows on the Group's financial assets and liabilities and on the basis of their earliest possible contractual maturity. The Gross nominal inflow / (outflow) disclosed in the table is the contractual, undiscounted cash flow on the financial liability or commitment.

The amounts in the table below have been compiled as follows:

Type of financial instrument	Basis on which amounts are compiled
Non-derivative financial liabilities and financial assets	Undiscounted cash flows, which include estimated interest payments.
Issued financial guarantee contracts, and unrecognised loan commitments	Earliest possible contractual maturity. For issued financial guarantee contracts, the maximum amount of the guarantee is allocated to the earliest year in which the guarantee could be called.
Derivative financial liabilities and financial assets held for risk management purposes	Contractual undiscounted cash flows. The amounts shown are the gross nominal inflows and outflows for derivatives that have simultaneous gross settlement (e.g. forward exchange contracts and currency swaps) and the net amounts for derivatives that are net settled.
Trading derivative liabilities and assets forming part of the Group's proprietary trading operations that are expected to be closed out before contractual maturity	Fair values at the date of the statement of financial position. This is because contractual maturities are not reflective of the liquidity risk exposure arising from these positions. These fair values are disclosed in the 'less than three months' column.
Trading derivative liabilities and assets that are entered into by the Group with its customers	Contractual undiscounted cash flows. This is because these instruments are not usually closed out before contractual maturity and so the Group believes that contractual maturities are essential for understanding the timing of cash flows associated with these derivative positions.

The Group's expected cash flows on some financial assets and financial liabilities vary significantly from the contractual cash flows. For example, demand deposits from customers are expected to remain stable or increase and unrecognised loan commitments are not all expected to be drawn down immediately. As part of the management of liquidity risk arising from financial liabilities, the Group holds liquid assets comprising Cash and balances with banks and debt securities issued by federal government, which can be readily sold to meet liquidity requirements.

In addition, the Group maintains agreed lines of credit with other banks and holds unencumbered assets eligible for use as collateral.

The negative gaps in the short term maturity buckets below do indicate liquidity concerns as the behavioral analysis of the book is different from this.

**Contingency Funding Plan**

The Group maintains a contingency funding plan which sets out strategies for addressing liquidity. The Plan:

- outlines strategies, policies and plans to manage a range of stresses;
- establishes a clear allocation of roles and clear lines of management responsibility;
- is formally documented;
- includes clear invocation and escalation procedures;
- is regularly tested and the result shared with the ALCO and Board;
- outlines that Group's operational arrangements for managing a huge funding run;
- is sufficiently robust to withstand simultaneous disruptions in a range of payment and settlement;
- outlines how the Group will manage both internal communications and those with its external stakeholders; and

As part of the contingency funding plan process, the Group maintains committed credit lines that can be drawn in case of liquidity crises. These lines are renewed as at when due.

**Funding approach**

Our sources of liquidity are regularly reviewed by both the ALCO and the Treasury Group in order to avoid undue reliance on large individual depositors and to ensure that a satisfactory overall funding mix is maintained at all times. The funding strategy is geared toward ensuring effective diversification in the sources and tenor of funding. The Group however places greater emphasis on demand and savings deposits as against purchased funds in order to minimize the cost of funding.

As part of the management of liquidity risk arising from financial liabilities, the Group holds liquid assets comprising cash and cash equivalents, and debt securities issued by sovereigns, which can be readily sold to meet liquidity requirements. In addition, the Group maintains agreed lines of credit with other banks

**5.3.1 Residual contractual maturities of financial assets and liabilities**

**(a) Regulatory capital**

The regulatory capital requirement for entities within the group are as follows:

<b>Name of Entity</b>	<b>Primary Regulator</b>	<b>Regulatory Requirement</b>
Access Holdings Plc	Central Bank of Nigeria	(see note (i)below)
Access Bank Plc	Central Bank of Nigeria	50billion Naira
The Hydrogen Payment Services Company Ltd	Central Bank of Nigeria	2 billion Naira
Access Pensions Ltd	National Pensions Commission	5 billion Naira
Access Insurance Brokers	National Insurance Commission	5 milllion Naira

- (i) The Capital Requirement of Access Holdings Plc represents the sum of the minimum paid up capital of all its subsidiaries.

The Central Bank of Nigeria (CBN) on 29th August 2014 issued Guidelines for Licensing and Regulation of Financial Holding Companies in Nigeria ("Guidelines"). According to the Guidelines, a financial holding company shall have a minimum paid up capital which shall exceed the sum of the minimum paid up capital of all its subsidiaries, as may be prescribed from time to time by the sector regulators. A review of the capital level as at 31 December 2023 shows that Access Holdings Plc complies with paragraphs 7.1 and 7.3 of the regulation, which stipulates that a financial holding company should maintain a minimum paid up capital which exceeds the aggregate of the minimum paid up capital of all its subsidiaries;

<b>Entity</b>	<b>Minimum Share Capital</b>	<b>% Holding</b>	<b>Holdco Share</b>
	<b>N'm</b>		<b>N'm</b>
Access Bank Plc	50,000	100.00	50,000
The Hydrogen Payment Services Company Ltd	4,000	99.99	4,000
Access Pensions Ltd	5,000	53.76	2,688
Access Insurance Brokers	5	100	5
<b>Aggregated minimum paid up Capital of Subsidiaries</b>	<b>59,005</b>		<b>56,693</b>
Holdco Company (Share Capital and Reserves)			253,777
Surplus			<b>197,084</b>

**Capital adequacy ratio computation under Basel III guidelines**

According to the recent CBN circular on Basel III implementation guidelines for Banks in Nigeria, the recommendations contained therein will be implemented in a parallel run beginning November 2021 for a six-month period, which could be extended by another three months if supervisory expectations are achieved. According to the CBN, the Basel III Guidelines will run concurrently with the existing Basel II Guidelines during the parallel run, and the Basel III Guidelines will become completely effective after the parallel run is over.

## 7 Operating segments

The Group has six reportable segments, as described below, which are the Group's strategic business units. The strategic business units offer different products and services, and are managed separately based on the Group's management and internal reporting structure. For each of the strategic business units, the Executive Management Committee reviews internal management reports on at least a quarterly basis. The Group presents segment information to its Executive Committee, which is the Group's Chief Operating Decision Maker, based on International Financial Reporting Standards.

Based on the market segment and extent of customer turnover, the group reformed the arrangement of segments from previous years into four operational segments as described below;

- **Corporate and Investment Banking** - The division provides bespoke comprehensive banking products and a full range of services to multinationals, large domestic corporates and other institutional clients. The division focuses on customers in key industry sector with minimum annual turnover of N20Billion. It also provides innovative finance solutions to meet the short, medium and long-term financing needs for the Bank's clients as well as relationship banking services to the Bank's financial institutions customers.
- **Commercial banking** - The commercial banking division has presence in all major cities in the country. It provides commercial banking products and services to the non-institutional clients, medium and small corporate segments of the Nigerian market whose annual turnover is above N1bn. The division also provides financial services to public sector, commercial institutions and oriental corporates.
- **Retail banking** – The retail banking division is the retail arm of the bank which provides financial products and services to individuals (personal and inclusive segments) and private banking segment. This division has now been categorized into 'Retail Banking North' and 'Retail Banking South'. The private banking segment focuses on offering bespoke services to High Net worth Individuals (HNI) and Ultra High Net worth Individuals (UHNI) by handling their wealth portfolio needs both locally and abroad.
- **Access Pensions Management:** Is a Pension Fund Administrator whose services includes the management and administration of pension funds such as Retirement Savings Accounts Fund I-VI and Transitional Contributions Fund (TCF); administration of retirement savings account; administration of voluntary savings schemes and the administration of approved existing schemes.
- **Hydrogen Payment Services Company Limited ("Hydrogen")** is a FinTech company which has started breaking grounds in the industry with the seamless and reliable solutions it offers to businesses in Nigeria. Hydrogen's vision is to build Africa's most powerful business services network. Hydrogen offers a wide range of products and services, including InstantPay, Payment gateway, POS, Card, and Switch, which have been well-received by customers and the industry as a whole. Our clientele base cuts across from mid-size to large private and public sectors of the economy, targeting organizations/businesses that perform and receive payments on a day-to-day basis.
- **Access Insurance Brokers Limited:** Is an insurance broker firm providing professional insurance services for individuals, corporations, and government agencies, ensuring the arrangement of optimal coverage for all insurable risks. Our commitment is to act in the best interest of clients, securing suitable risk placements with insurance companies at no additional cost. The range of services offered includes: Insurance Audits, Risk Management Evaluation, Specialized Claims and Uninsured Loss Recoveries, Research and Market Reviews and Risk Retention Fund.

All of the Segments reported at the end of the year had its,

- Reported revenue, from both external customers and intersegment sales or transfers, 10 per cent or more of the combined revenue, internal and external, of all operating segments, or

-the absolute measure of its reported profit or loss 10 per cent or more of the greater, in absolute amount, of

- (i) the combined reported profit of all operating segments that did not report a loss and
- (ii) the combined reported loss of all operating segments that reported a loss, or

-its assets are 10% or more of the combined assets of all operating segments.

Unallocated Segments represents all other transactions than are outside the normal course of business and can not be directly related to a specific segment financial information.

Thus, in essence, unallocated segments reconcile segment balances to group balances. Material items comprising total assets and total liabilities of the unallocated segments have been outlined below;

Sales between segments are carried out at arm's length. The revenue from external parties reported to the executive committee is measured in a manner consistent with that in the income statement.

Credit related fees and commissions are fees charged to customers other than fees included in determining the effective interest rates relating to loans and advances carried at amortized cost. These fees are accounted for in accordance with the Group's revenue accounting policy. The representation of all fees and commission recognised in the year and prior year at a point in time and over a period of time is as shown below.

Included in commission on other financial services are fees relating to income earn in acting in fiduciary capacity

<b>Fee and commission income</b>	<b>Group December 2023</b>	<b>Group December 2022</b>	<b>Company December 2023</b>	<b>Company December 2022</b>
Point in Time	253,389	19,113	-	-
Over Time	24,083	178,473	-	-
	<b>277,472</b>	<b>197,586</b>	<b>-</b>	<b>-</b>

Channels and other E-business income include income from electronic channels, card products and related services.

**10 (b) Fee and commission expense**

<i>In millions of Naira</i>	<b>Group</b> <b>December 2023</b>	<b>Group</b> <b>December 2022</b>	<b>Company</b> <b>December 2023</b>	<b>Company</b> <b>December 2022</b>
Bank and electronic transfer charges	11,150	8,271	-	-

	<b>69,691</b>	<b>51,851</b>	<b>-</b>	<b>-</b>

Fees and commissions expenses are fees charged for the provision of services to customers transacting on alternate channels platform of the Group and on the various debit and credit cards issued for the purpose of these payments. They are charged to the Group on services rendered on internet banking, mobile banking and online purchasing platforms. The corresponding income lines for these expenses include the income on cards (both foreign and local cards), online purchases and bill payments included in fees and commissions. Fees and commissions expense includes the cost incurred to the group for providing alternate platforms for the purposes of internet banking, mobile banking and online purchases. It also includes expenses incurred by the Group on the various debit and credit cards issued.

**11 Net gains on financial instruments at fair value****a Net gains or (losses) financial instruments at fair value through profit or loss**

<i>In millions of Naira</i>	<b>Group</b> <b>December 2023</b>	<b>Group</b> <b>December 2022</b>	<b>Company</b> <b>December 2023</b>	<b>Company</b> <b>December 2022</b>

<b>Total</b>	<b>512,362</b>	<b>281,304</b>	<b>141,077</b>	<b>-</b>

Net gain on financial instruments includes the gains and losses arising both on the purchase and sale of trading instruments and from changes in fair value.

Fair value gain on equity investments is from investments in which the Group has interests. Based on IFRS 9, the Group measures changes in fair value of equity investments through profit or loss.

Gain on derivative instruments are from transactions to which the Group is a party in the normal course of business and are held at fair value. Derivative financial instruments consist of forward, swap and future contracts.

**12 (a) Net foreign exchange gain**

<i>In millions of Naira</i>	<b>Group</b> <b>December 2023</b>	<b>Group</b> <b>December 2022</b>	<b>Company</b> <b>December 2023</b>	<b>Company</b> <b>December 2022</b>

		N'millions	N'millions		
<b>Fair value hedge</b>					
Fair value changes in hedging instrument (forward element)	90%	1,110,074	222,816		

The following table shows the period in which the hedging contract ends:

Dec-23	3 months	6 months	12 months	5 periods	More than 5 periods
<b>Fair value hedging</b>	N'millions	N'millions	N'millions	N'millions	N'millions
Hedging assets	1,141,801	275,680	488,262	89,659	-

For hedges of foreign currency liabilities, the Group enters into hedge relationships where the critical terms of the hedging instrument are closely aligned with the terms of the hedged item. The Group therefore performs a qualitative assessment of effectiveness. Sources of ineffectiveness include timing differences between the settlement dates of the hedged item and hedging instruments, quantity or notional amount differences between the hedged item and hedging instrument and credit risk of the Group and its counterparty to the forward contract.

(a) The incorporation of Access Holding plc ("corporation") in 2022 resulted in the share of Access Bank ("the Bank") being fully acquired by Access Holding Plc which made the shareholders of Access Bank to become shareholders of the Corporation.

Consequently, the shares in RSPP previously accounted as equity settled became cash-settled because the shares being vested to the employees are shares of the ultimate parent.

Under the Restricted Share Performance Plan (RSPP), shares of the parent are awarded to employees based on their performance at no cost to them. Under the terms of the plan, the shares vest over a 3 year period from the date of award. The scheme applies to only employees of the Bank that meet the stipulated performance criteria irrespective of where they work within the Group. Some members of the Group also have a similar scheme, over the vesting period of 7 years. As the RSPP scheme are cash settled, a liability is recognized in the statement of financial position (see Note 34) and an expense is recognized in the statement of comprehensive income within staff cost over the course of the minimum vesting period. The liability is remeasured at each reporting date with gains and loss reported in the statement of comprehensive income. Should any employee within the scheme leave the Bank within the vesting period, the shares may be forfeited.

By the resolution of the Board and Shareholders, the Bank sets aside an amount not exceeding twenty (20) percent of the aggregate emoluments of the Bank's employees in each financial period to purchase shares of Access Holdings from the floor of the Nigeria Exchange Group for the purpose of the plan. The Structured Entity (SE) was transferred from bank to the Parent (Access Holdings) to hold shares purchased on behalf of employees. The shares previously held in the Structured Entity (SE) on behalf of the Bank are now recognized as a receivable from the parent. Upon vesting the shares are transferred to the employees

(i) The shares allocated to staff have a contractual vesting period of three to seven years commencing from the period of purchase/allocation to the staff. The Group has no legal or constructive obligation to repurchase or settle after the shares has vested.

(ii) The number and weighted-average exercise prices of shares has been detailed in table below;

**Group**

There has been some changes to the Company Income tax brought about by the New Finance Act. this addresses the areas of losses of a capital nature, expenses incurred for the purpose of deriving tax-exempt income, taxes or penalties borne on behalf of another person and other changes as can be seen from the standard

The computation of the Company's income tax expense and deferred tax was carried out in accordance with the Finance Act, CITA and other relevant tax laws. The changes made by the new act was incorporated in the Company tax computation and it is believed by the management of the Company that there is no uncertainty over its Income and Deferred tax treatment that relevant tax authorities may disagree with.

**The movement in the current income tax liability is as follows:**

	<u>Group</u> <u>December 2023</u>	<u>Group</u> <u>December 2022</u>	<u>Company</u> <u>December 2023</u>	<u>Company</u> <u>December 2022</u>

Derivative financial instruments consist of forward, swap and future contracts. These are held for day to day cash management rather than for trading purposes and are held at fair value. The contracts have intended settlement dates of between 30 days and a period. Derivative contracts are valued with reference to data obtained from sources such as Bloomberg and FMDQ.

The movement in fair value is as a result of a depreciation of the reporting currency of the Group (Naira) within the period and volume of transactions.

- (a) This represents the receivable from debtors to the Group that cuts across several services rendered in different capacities.

Also included in account receivable is Restricted Share Performance Plan (RSPP) investment transferred from bank to the Parent (Access Holdings) to hold shares purchased on behalf of employees.

The shares previously held in the Structured Entity (SE) on behalf of the Bank are now recognized as a receivable from the parent. Upon vesting the shares are transferred to the employees

- (b) E-banking receivables represent settlements due from other banks use of our electronic channels by their customers. The Group's payables to other banks is contained in Note 34.
- (c) Deposit for investment in AGSMEIS represents the Access Bank Nigeria's deposit as equity investment in Agri-business/Small and Medium Enterprises Investment Scheme. As approved by the Bankers' Committee on 9th February 2017, all Deposit Money Banks are required to invest 5% of prior period Profit After Tax as equity investment in the scheme.
- (d) Subscription for investment balance relates to deposits paid for the acquisition of equity investments for which shares have not been issued to the Bank.
- (e) Restricted deposits with central banks comprise the cash reserve requirements of the Central Bank of Nigeria and other central banks of jurisdictions that the Group operates in as well as the special intervention fund with the Central Bank of Nigeria of N89.58Bn introduced in January 2016 as a reduction in the cash reserve ratio with a view of channeling the reduction to financing the real sector. These balances are not available for day to day operations of the Group. Restricted deposit with Afrexim comprise of \$5m minimum balance expected to be maintained at all times for the duration of the \$300m Afrexim term loan facility granted to the company.
- (f) Inventory consists of blank debit cards, cheque leaves, computer consumables and other stationery held by the Group. Increase in prepayments resulted from services that have been paid in advance for the period for which the amortization will be over the relevant year of service. These include rents and advertisements.

In determining the ECL for other assets, the Group applies the simplified model in estimating the ECLs, adopting a provision matrix, where the receivables are grouped based on the nature of the transactions, aging of the balances and different historical loss patterns to determine the lifetime ECLs. Receivables relate to amount due for the provision of services to the Bank's customers. The provision matrix estimates ECLs on the basis of historical default rates adjusted for current and forward looking macroeconomic factors without undue cost and effort

- (g) The balance of N1,271.6Bn represents the transaction value of outstanding forward contracts entered on behalf of customers, with the Central Bank of Nigeria.

E-tranzact (ETTRAN), a fully integrated fintech platform in Africa was founded in 2003 and is one of the leading independent players in Lagos, Nigeria with a diversified license and product capabilities. The company has enjoyed continuous and consistent growth in top line revenue and subscriber base and activity for a while.

The Group holds an equity interest of 3,455,729,217 ordinary shares of 50k each in E-tranzact International Plc as at 31 December 2023, representing 37.56% equity participation in the company. No dividend income was received from ETRAN during the period. The proportion of Group's interest is the same as the proportion of voting rights. As at 31 December 2023, the fair value of Group's investment was N22.2Bn.

There are published price quotations for the associate on the Nigerian Exchange limited. There are no significant restrictions on the ability of the associates to transfer funds to the group in the form of cash dividends, or repayments of loans or advances. The associate was accounted for using the equity method at the Group level

The Group exercises significant influence in E-tranzact International Limited by virtue of its more than 20% shareholding in the entity and the representation of one director on the board of the company and significant participation in the company's operating and financial policies.

The existing investment the Group had in Etranzact was initially recognized in the books under equity instruments measured at Fair value through profit or loss. At the point of increasing the stakes of the Group in Etranzact by means of the Right issue, the existing shares were reclassified to investment in associates at their fair value.

**27(b) Investment subsidiaries (with continuing operations)****(i) Group entities**

Set out below are the group's subsidiaries as at 31 December 2023. Unless otherwise stated, the subsidiaries listed below have share capital consisting solely of ordinary shares, which are held directly by the group and the proportion of ownership interests held equals to the voting rights held by the group. The country of incorporation is also their principal place of business.

There are no significant restrictions on the Group's ability to access or use the assets and settle the liabilities of any member of the Group to the extent that regulation does not inhibit the group from having access, and in liquidation scenario, this restriction is limited to its level of investment in the entity.

There are no significant restrictions on the ability of subsidiaries to transfer funds to the Group in the form of cash dividends or repayment of loans and advances.

- (ii) Based on the contractual arrangements between the Group and the shareholders in each of the entities, the Group has the power to appoint and remove the majority of the board of Directors of each entity.

The relevant activities of each of the listed subsidiaries are determined by the Board of Directors of each entity based on simple majority shares. Therefore, the directors of the Group concluded that the Group has control over each of the above listed entities and were consolidated in the Group financial statements.

Actis Golf Nigeria Ltd is an investing entity through which the company holds controlling interest in Access Pension Ltd. Access Holding company through its defunct subsidiary First Guarantee Pension Limited (FGPL) acquired indirect holding in Actis Golf. Upon liquidation of FGPL, its asset and liabilities were taken over by Sigma Pension Limited (Now Access Pension Limited) except FGPL's investments in Actis Golf, which was not transferred to Sigma Pensions Limited but was distributed to the shareholders of FGPL, on the Terminal Date, on a pro-rata basis. This resulted to Access Holding Plc have 30% stake in Actis Golf Nigeria Limited

The share capital of the Payment Services company Limited was increased from 2billion to 4billion by the creation of additional 4 billion Ordinary shares of 50kobo each ranking Parri-passu in all respects with existing Ordinary shares of the company

\*On 29 March 2023, the Bank issued a \$300m mandatory convertible Additional Tier 1 (AT1) capital fully subscribed by Access Holdings Plc. Based on the terms of the agreement, the securities meet the definition of an equity instrument and accounted as investment in subsidiary.

All investment in subsidiaries have been classified as non current with a closing balance of N443.2Bn

- (a) Estimates of useful life and residual value, and the method of depreciation, are reviewed at a minimum at each reporting period. Any changes are accounted for prospectively as a change in estimate.
- (b) The leasehold improvements do not represent lessor's asset
- (c) There were no capitalised borrowing costs related to the acquisition of property and equipment during the year December 31 2023.
- (d) There were no restrictions on title of any property and equipment during the year December 31 2023.
- (e) There were no property and equipment pledged as security for liabilities during the year.
- (f) There were no contractual commitments for the acquisition of property and equipment during the year.
- (g) There were no impairment losses on any class of property and equipment during the year.
- (h) All items in the property and equipment are non-current.

**(a) Diamond bank:**

The recoverable amount of Goodwill as at 31 December 2023 was greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N1,515Bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred. Impairment assessment has been performed for the year and no losses on goodwill were recognized as at 31 December 2023 (31 December 2022: Nil)

Goodwill is monitored by the Group on an entity by entity basis

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. The approach is based on estimating the free cash flow to equity to determine the value in use. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 3.19%. A discount rate of 31.78% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the year are as follows:

Terminal growth rate (i)	3.19%
Discount rate (ii)	31.78%
(i) Compound annual volume growth rate in the initial five-year year.	
(i) Weighted average growth rate used to extrapolate cash flows beyond the budget year.	
(ii) Pre-tax discount rate applied to the cash flow projections.	

**Cash Flow Forecast**

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

**Discount Rate**

Pre-tax discount rate of 31.78% was applied in determining the recoverable amounts for Diamond Bank Plc. This discount rate was estimated using the Bank's beta, the risk-free rate and the equity risk premium of Access Bank.

**Terminal growth rate**

The terminal growth rate applied was based on the long term growth rate in GDP of Nigeria.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

**Sensitivity analysis of key assumptions used**

	<b>10% increase</b>	<b>10% decrease</b>
Impact of change in discount rate on value-in-use computation (increase/(decrease)	(23,262)	29,545
Impact of change in revenue growth on value-in-use computation (increase/(decrease)	921	(901)

There were no write-downs of goodwill due to impairment during the year

**(b) Access Bank Rwanda:**

The recoverable amount of Goodwill as at 31 December 2023 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N12.99bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred. Impairment assessment has been performed for the year and no losses on goodwill were recognized as at 31 December 2023 (31 December 2022: Nil)

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Rwanda.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. The approach is based on estimating the free cash flow to equity to determine the value in use. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 6.6%. A discount rate of 22.44% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the year are as follows:

Terminal growth rate (i)	6.60%
Revenue Growth	22.44%

- (i) Terminal growth rate used to extrapolate cash flows beyond the budget year.  
(ii) Pre-tax discount rate applied to the cash flow projections.

#### Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

#### Discount Rate

Pre-tax discount rate of 22.44% was applied in determining the recoverable amounts for the goodwill of Access Bank Rwanda. This discount rate was estimated using beta, risk-free rate and the equity risk premium for Rwanda.

#### Terminal growth rate

Terminal growth rate applied was based on the long term growth rate in GDP of Rwanda.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the subsidiaries (from which the goodwill arose) to decline below their carrying amount.

#### Sensitivity analysis of key assumptions used

	10% increase	10% decrease
Impact of change in discount rate on value-in-use computation (increase/(decrease))	(1,601)	2,127
Impact of change in revenue growth on value-in-use computation	204	(188)

#### (c) Access bank Kenya:

The recoverable amount of Goodwill as at 31 December 2023 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N20.71bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred. This is the first impairment assessment.

#### Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Kenya.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 5.47%. A discount rate of 23.22% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

Terminal growth rate (i)	5.47%
Discount rate (ii)	23.22%

- (i) Compound annual volume growth rate in the initial five-year year.  
(ii) Terminal growth rate used to extrapolate cash flows beyond the budget year.  
(iii) Pre-tax discount rate applied to the cash flow projections.

#### Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

#### Discount Rate

Pre-tax discount rate of 23.22% was applied in determining the recoverable amounts for the goodwill of Access Bank Kenya. This discount rate was estimated using the Bank's beta, the risk-free rate and the equity risk premium of Kenya.

#### Terminal growth rate

The terminal growth rate applied was based on the long term growth rate in GDP of Kenya.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

	10%	10%
<b>In thousands of Naira</b>	increase	decrease
Impact of change in discount rate on value-in-use computation (increase/(decrease)	(2,881)	3,797
Impact of change in growth rate on value-in-use computation (increase/(decrease)	372	(350)

There were no write-downs of goodwill due to impairment during the year.

**(d) Access bank Botswana:**

The recoverable amount of Goodwill as at 31 December 2023 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N271.73bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred. This is the first impairment assessment.

**Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Botswana .**

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 4.16%. A discount rate of 8.8% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the year are as follows:

Terminal growth rate (i)	4.16%
Discount rate (ii)	8.80%
(i) Terminal growth rate used to extrapolate cash flows beyond the budget year.	
(ii) Pre-tax discount rate applied to the cash flow projections.	

**Cash Flow Forecast**

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

**Discount Rate**

Pre-tax discount rate of 8.8% was applied in determining the recoverable amounts for the goodwill of Access Bank Botswana. This discount rate was estimated using the Bank's beta, the risk-free rate and the equity risk premium for Botswana.

**Terminal growth rate**

The terminal growth rate applied was based on the long term growth rate in GDP of Botswana.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

	10%	10%
<b>In thousands of Naira</b>	increase	decrease
Impact of change in discount rate on value-in-use computation (increase/(decrease)	(47,785)	70,391
Impact of change in growth rate on value-in-use computation (increase/(decrease)	22,461	(18,762)

There were no write-downs of goodwill due to impairment during the year.

**(e) Access Pensions Limited:**

In 2022, the Group acquired 80.23% interest in First Guarantee Pensions Ltd (FGPL) and interest of 51.5% (direct and indirect) in Sigma Pensions Ltd. A Goodwill of N34.9 billion was recognised in that year. during the year, this Goodwill was reassessed based on the updated financial information of the investee companies at the date of the execution of the Purchase Price Allocation (PPA) for the acquisition and elected to record the acquisition related acquisition-related entries as provisional as at 31 December 2022 as permitted under IFRS 3 Business Combinations.

The Company's PPA for the acquisition of First Guarantee Pensions Ltd and Sigma Pensions Ltd was concluded and executed. The Goodwill of N34.94 billion previously recognized was revised to N27.07 billion as a result of the final financial information available as at the date of execution of the PPA. The previously Recognised Goodwill of N34.9bn was separated into customer relationship of N11.29bn, Deferred Tax Impact of (N3.3bn) and Goodwill of N27.07bn.

Under the Standard, Access Holdings is required to apportion the purchase consideration between the tangible and intangible assets and liabilities (including contingent liabilities) of FGPL and Sigma Pensions.

- The Standard provides general guidelines for assigning amounts to individual assets acquired and liabilities assumed.
- IFRS 3 requires the application of the acquisition method for each business combination. The acquisition method requires inter alia that the acquirer is identified, the acquisition date is determined, and that the identifiable assets acquired, and that the liabilities assumed and any non-controlling interest in the acquiree are recognised and measured.

IFRS 3 states that as of the acquisition date, the acquirer shall recognise, separately from goodwill, the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree.

- Recognition of identifiable assets acquired and liabilities assumed is subject to the conditions specified in paragraphs 11 and 12. These paragraphs state, inter alia, that the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Framework for the Preparation and Presentation of Financial Statements at the acquisition date, and that the identifiable assets acquired and liabilities assumed must be part of what the acquirer and the acquiree exchanged in the business combination transaction

IFRS 3 states that an asset is identifiable if it either:

- a) is separable, i.e., capable of being separated or divided from the entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable asset or liability, regardless of whether the entity intends to do so; or
- b) arises from contractual or other legal rights, regardless of whether those rights are transferable or separable from the entity or from other rights and obligations.

The acquirer shall measure the identifiable assets acquired and the liabilities assumed at their acquisition-date Fair Values. The identifiable assets are required under IFRS 3 to be recognised at their "Fair Value". Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Revenue in the pension industry is mainly driven by management fees earned from AuM (Assets Under Management) which are contributions from customers.

Customer related intangibles will be valued as Access pension is expected to earn fees income from existing and future contributions made by Retirement Saving Account (RSA) I-VI holders, Defined benefit schemes holders and the informal sector/unfunded customers.

According to IAS 38 customers related intangibles can be recognized if future economic benefits are expected to flow to the entity from the use of that asset, and the cost can be reliably measured. FGPL and Sigma Pensions customers list which consist of the RSA I-VI account PIN, defined benefit scheme PIN, informal sector and unfunded PIN will be valued using the Income approach model which is one of the identifiable model for valuing intangible asset according to IAS 38.

Both Sigma Pensions and FGPL are part of the top 10 pension companies in Nigeria with over 990,000 PIN contributors amongst them, thus having a strong presence and brand in the market.

Sigma Pensions and FGPL will be merged to form Access Pension hence, none of the brands identified (Sigma & FGPL) will be retained. Access Pensions being the product of the merger between SIGMA and FGPL, offers the advantage of a strong parent (Access Holdings) with an established African presence and a globally connected financial ecosystem. The act of rebranding the acquired entities under the parent company's name aligns with the previous M&A transactions within the Pension Industry.

To operate in the pension industry, a license of operation must be granted by PENCOM. SIGMA and FGPL both have a license and operate as a separate PFA's prior to the acquisition by Access Pension in 2022. License will be valued as an intangible asset as it is required to operate in the pension industry in Nigeria

**30 Deferred tax assets and liabilities****(a) Group**

The following items gave rise to temporary differences during the year. Deferred tax assets and liabilities are attributable to the following items below:

*In millions of Naira*

	December 2023			December 2022		
	Assets	Liabilities	Net	Assets	Liabilities	Net
Property and equipment, and software	59,300	(1,143)	58,157	32,952	(2,468)	30,484

<b>Total Deferred Tax</b>	<b>35,669</b>	<b>18,223</b>	<b>15,095</b>	<b>1,796</b>

Temporary difference relating to the Group's Investment in subsidiaries as at December 31 2023 is N233.82billion (Dec 2022: N42.94bn). As the Group exercises control over the subsidiaries, it has the power to control the timing of the reversals of the temporary difference arising from its investments in them. The Group has determined that the subsidiaries' profits and reserves will not be distributed in the foreseeable future and that the subsidiaries will not be disposed of. Hence, the deferred tax arising from the temporary differences above will not be recognised.

**Deferred tax asset not recognised**

The Group's deferred tax asset which typically arises from unutilized losses, unclaimed capital allowance and ECL allowance on not credit impaired financial instruments is N210.23billion as at 31 Dec 2023. (2022: N29.64Bn ). The Group has assessed based on its profit forecast, the extent to which there will be future taxable profits against which the deferred tax assets recognised, can be utilised. The value of unrecognized deferred tax asset as at 31 Dec 2023 is N210.23billion (2022: N29.64Bn).

The amount of unrecognised deferred tax asset as at December 31, 2023 is N73mn (December 31: N45.91bn)

Investment property of N217 million for the Group, represents the value of landed properties which are carried and measured at fair value. There was no rental income from such properties during the year and no restrictions on the realisability of the property.

Valuation technique used for fair valuation of investment properties

Investment properties are stated at fair value, which has been determined based on valuations performed by various Estate Surveyors and Valuers. The valuers are industry specialists in valuing these types of investment properties. The fair value is supported by market evidence and represents the amount that would be received to sell the properties in an orderly transaction between market participants at the measurement date in the principal market to which the Group has access at the date of valuation, in accordance with standard issued by the International Valuation Standards Committee. Valuations are performed on an annual basis and the fair value gains and losses are reported in valuation gain on investment properties under other operating income (see note 13). The profits or losses on disposal are also reported in the profit or loss as they occur.

The professional valuers engaged for the preparation of the valuation reports is Paul Osaji and Company (FRC/2013/000000001098)

All investment properties have been classified as non current with a carrying amount of N217 million for Group and Nil for Company

(a) E-banking payables represent settlements due to other banks use of their electronic channels by the Group's customers. The Group's Receivables from other banks is contained in Note 26.

(b) Collections are balances held in trust on behalf of customers for various transactions. These include escrows, collection for remittances, payments, etc.

(c) Customer deposits for foreign exchange represents deposits that customers have made to fulfil foreign currency obligations. The Group's process requires that customers with foreign currency obligations deposit foreign currency to back the transactions. The corresponding balance is in Other deposits with central banks - Cash and balances with banks.

(d) Unclaimed dividend is the balance of dividend declared by the Company but yet to be claimed by shareholders. The amount relates to the portion that has been transferred to the Company by the Registrar in accordance with Securities and Exchange Commission guidelines on Return of Unclaimed Dividends (See Note 19) for the corresponding assets with Asset Managers. The amount is payable on demand to shareholders.

(di) The contribution to the Industrial training fund scheme is being shown as a separate line under other liabilities. The amount here represents 1% of the personnel cost of the employer according to the ITF amendment ACT 2011, Act No 19 section 6, subsection 1.

**(i) Post employment benefit plan**

The Group operates a non-contributory, unfunded lump sum defined benefit post employment benefit plan for top executive management of the Group from General Manager and above based on the number of periods spent in these positions. The scheme is also aimed at rewarding executive directors and other senior executives for the contributions to achieving the Group's long-term growth objectives.

There is no funding arrangement with a trustee for the Post employment benefit plan as the Group pays for all obligations from its current year profit as such obligations fall due. Depending on their grade, executive staff of the Group upon retirement are entitled to certain benefits based on their length of stay on that grade.

Balance, end of period	<u>8,480</u>	<u>3,244</u>	-	-

Expense recognised in income statement:

Current service cost	211	317	-	-
Interest on obligation	475	19	-	-
Total expense recognised in profit and loss (see Note 14)	<u>686</u>	<u>337</u>	-	-

Gross actuarial gain on retirement benefit obligations	<u>4,669</u>	<u>1,658</u>	-	-
--	--------------	--------------	---	---

All retired benefit obligations have been classified as non current with a closing amount of N8.48 billion for both Group and Company

The weighted average duration of the defined benefit obligation is 4 years. The information on the maturity profile of the defined benefit plan includes the maturity analysis and the distribution of the timing of payment.

**Risk exposure**

Through its defined benefit pension plan, the group is exposed to a number of risks, the most significant of which are detailed below:

i) Changes in bond yields - A decrease in government bond yields will increase plan liabilities, although this will be partially offset by an increase in the value of the plans' bond holdings.

ii) Inflation risks - Some of the group's pension obligations are linked to salary inflation, and higher inflation will lead to higher liabilities.

iii) Life expectancy - The majority of the plans' obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plans' liabilities

The sensitivities below relates to Group and Company.

<b>Impact on defined benefit obligation</b>		
<b>Increase in assumption by 1%</b>	<b>Liability changes to</b>	<b>Total comprehensive income</b>
Decrease in liability by 4.6%	-	-
Increase in the liability by 5.0%	-	-
Increase in the liability by 0.2%	-	-

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the year) has been applied as when calculating the pension liability recognised within the statement of financial position. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

**Actuarial assumptions:**

Principal actuarial assumptions at the reporting date (expressed as weighted averages):  
The most recent valuation was performed by Alexander Forbes as at 31 December 2023.

	<b>December 2023</b>	<b>December 2022</b>
Discount rate	15.00%	14.00%
Future salary increases	5.00%	5.00%
Retirement age for both male and female	60 years	60 years
Retirement rate: 50 – 59 (average rate)	1.89%	1.70%
Withdrawal rate: 18 – 29	4.50%	4.50%
Withdrawal rate: 30 – 44	6.00%	6.00%
Withdrawal rate: 45 – 50	5.00%	5.00%
Withdrawal rate: 51 – 59 (average rate)	1.67%	1.70%

Assumptions regarding future mortality before retirement are based on A49/52 ultimate table published by the Institute of Actuaries of United Kingdom. The rate used to discount post employment benefit obligations has been determined by reference to the yield on Nigerian Government bonds of medium duration. This converts into an effective yield of 14.3% as at 31 December 2023. For members in active service as at the valuation date, the projected unit credit method of valuation as required under the IFRS has been adopted.

	<u>936,416</u>	<u>341,715</u>	<u>-</u>	<u>-</u>

**(i) Other reserves****Other regulatory reserves****Statutory reserves**

Nigerian banking regulations require Access Bank Nigeria to make an annual appropriation to a statutory reserve. As stipulated by S.16(1) of the Banks and Other Financial Institution Act of Nigeria, an appropriation of 30% of profit after tax is made if the statutory reserve is less than paid-up share capital and 15% of profit after tax if the statutory reserve is greater than the paid up share capital.

**SMEEIS Reserves**

The Small and Medium Enterprises Equity Investment Scheme (SMEEIS) reserve is maintained to comply with the Central Bank of Nigeria (CBN)/ Banker's committee's requirement that all licensed deposit money banks in Nigeria set aside a portion of the profit after tax in a fund to be used to finance equity investment in qualifying small and medium scale enterprises. Under the terms of the guideline (amended by a CBN letter dated 11 July 2006), the contributions will be 10% of profit after tax and shall continue after the first 5 years but banks' contribution shall thereafter reduce to 5% of profit after tax

However, this is no longer mandatory. Therefore, no additional appropriation has been done during the year.

The small and medium scale industries equity investment scheme reserves are non-distributable.

**i(a)**

**(ii) Share scheme reserve**

This represents the total expenses incurred in providing the Company's shares to its qualifying staff members under the RSPP scheme.

**(iii) Treasury shares**

This represents the shares held by the new RSPP scheme which have not yet been allocated to staff based on the pre-determined vesting conditions.

**(iv) Capital reserve**

This balance represents the surplus nominal value of the reconstructed shares of the Company which was transferred from the share capital account to the capital reserve account after the share capital reconstruction in October 2006. The Shareholders approved the reconstruction of 13,956,321,723 ordinary shares of 50 kobo each of the company in issue to 6,978,160,860 ordinary shares of 50 kobo each by the creation of 1 ordinary shares previously held.

**(v) Fair value reserve**

The fair value reserve comprises the net cumulative change in the fair value of investments measured through other comprehensive income until the investment is derecognised or impaired.

**(vi) Foreign currency translation reserve**

This balance appears only in the Group accounts and represents the foreign currency exchange difference arising from translating the results and financial position of all the group entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency.

**(vii) Regulatory risk reserve**

The regulatory risk reserves warehouses the difference between the allowance for impairment losses on balance on loans and advances based on Central Bank of Nigeria prudential guidelines and Central Bank of the foreign subsidiaries regulations, compared with the loss incurred model used in calculating the impairment under IFRS.

**(viii) Retained earnings**

Retained earnings are the carried forward recognised income net of expenses plus current year profit attributable to shareholders.

**F Non-controlling interest**

This represents the Non-controlling interest's (NCI) portion of the net assets of the Group

### 39 Contingencies

#### Claims and litigation

The Group is a party to numerous legal actions arising out of its normal business operations. The Directors believe that, based on currently available information and advice of counsel, none of the outcomes that result from such proceedings will have a material adverse effect on the financial position of the Group, either individually or in the aggregate. N3.46Bn provision has been made as at 31 Dec 2023.

The Company, in its ordinary course of business, is presently involved in 2 cases as a defendant and 265. The total amount claimed in the cases against the Company is estimated at N11.3 Trillion.

#### Contingent liability and commitments

In common with other banks, Group conducts business involving acceptances, performance bonds and indemnities. The majority of these facilities are offset by corresponding obligations of third parties. Contingent liabilities and commitments comprise acceptances, endorsements, guarantees and letters of credit.

#### Nature of instruments

An acceptance is undertaken by a bank to pay a bill of exchange drawn on a customer. The Group expects most acceptances to be presented, but reimbursement by the customer is normally immediate. Endorsements are residual liabilities of the Group in respect of bills of exchange, which have been paid and subsequently rediscounted.

Guarantees and letters of credit are given as security to support the performance of a customer to third parties. As the Group will only be required to meet these obligations in the event of the customer's default, the cash requirements of these instruments are expected to be considerably below their nominal amounts.

Other contingent liabilities include transaction related custom and performance bonds and are generally short term commitments to third parties which are not directly dependent on the customer's credit worthiness. Commitments to lend are agreements to lend to a customer in the future, subject to certain conditions. Such commitments are either made for a fixed year, or have no specific maturity dates but are cancellable by the lender subject to notice requirements. Documentary credits commit the Group to make payments to third parties, on production of documents, which are usually reimbursed immediately by customers.

The table below summarises the fair value amount of contingent liabilities and commitments off-financial position risk: Acceptances, bonds, guarantees and other obligations for the account of customers:

#### a. These comprise:

	<b>Group</b> <b>December 2023</b>	<b>Group</b> <b>December 2022</b>	<b>Company</b> <b>December 2023</b>	<b>Company</b> <b>December 2022</b>
<i>In millions of Naira</i>				
<b>Contingent liabilities:</b>				
Transaction related bonds and guarantees	744,454	693,915	-	-
<b>Commitments:</b>				
Clean line facilities for letters of credit, unconfirmed letters of credit and other commitments	1,645,678	842,563	-	-
	<b>2,390,132</b>	<b>1,536,476</b>	<b>-</b>	<b>-</b>

The Group granted clean line facilities for letters of credit during the year to guarantee the performance of customers to third parties. Contractual capital commitments undertaken by the group during the year amounted to N18.32Bn (31 Dec 2022: N1.5Bn)

#### b. Third party funds under management and funds under administration

A subsidiary of the Group provide non-discretionary investment management services to institutional and private contributors. Commissions and fees earned in respect of pension funds and management activities performed are included in profit or loss. Assets managed and funds administrated on behalf of third parties include:

	<b>Group</b> <b>December 2023</b>	<b>Group</b> <b>December 2022</b>
<i>In millions of Naira</i>		
Pension funds	1,108,694	896,541
	<b>1,108,693</b>	<b>1,536,476</b>

**42 Events after reporting date**

Subsequent to the end of the financial year, the following events occurred:

On 29th January 2024, the Board of Directors proposed final dividend of N1.80k each payable to shareholders on register of shareholding at the closure date.

On the 17th of January 2024, Access Bank entered into a definitive agreement with Finance Trust Bank Uganda to acquire 80.88% shareholding in the Ugandan entity.

On the 5 of Jan 2024, Access Bank Zambia, a subsidiary of Access Bank Plc, completed the acquisition of African Banking Corporation Zambia Limited, trading as Atlas Mara Zambia. Atlas Mara Zambia is now a wholly owned subsidiary of Access Zambia.

On the 20 March 2024, Access Bank Plc entered into a binding agreement with Kenyan-based KCB Group Plc ("KCB") for the acquisition of the entire issued share capital of National Bank of Kenya Limited ("NBK") from KCB. KCB is also the holding company of KCB Bank Ltd, Kenya's largest commercial bank

**Access Holdings announced the change of name of its subsidiary, Megatech Insurance Broker Limited**

On 23 February 2024, Access Holdings announced the change in the name of the Company's insurance brokerage subsidiary "Megatech Insurance Brokers Limited" to "Access Insurance Brokers Limited" following the receipt of required regulatory approvals. The name change is meant to align the subsidiary's identity with the Access brand and drive optimisation of business opportunities. The subsidiary will continue to operate within the regulatory framework set by the National Insurance Commission.

**CBN approval in principle for the acquisition of Oxygen X finance company Limited**

Access Holdings Plc has obtained the Central Bank of Nigeria's approval-in-principle to establish a consumer lending subsidiary to be known as Oxygen X Finance Company Limited. The proposed subsidiary will commence operation upon obtaining final operating licence from the Central Bank of Nigeria.

Other than the above mentioned, there were no other events after reporting date requiring adjustment of, or disclosure in, these consolidated and separate financial statements.

**43 Related Party Transactions**

Parties are considered to be related if one party has the ability to control the other party or exercise influence over the other party in making financial and operational decisions, or one other party controls both. The definition includes subsidiaries, associates, joint ventures and the Group's pension schemes, as well as key management personnel.

**Transactions with key management personnel**

The Group's key management personnel, and persons connected with them, are also considered to be related parties. The definition of key management includes the close members of family of key personnel and any entity over which key management exercise control. The key management personnel have been identified as the executive and non-executive directors of the Group. Close members of family are those family members who may be expected to influence, or be influenced by that individual in their dealings with Access Holdings PLC and its subsidiaries.

**Parent**

The parent company, which is also the ultimate parent company, is Access Holdings PLC.

**(a) Loans and advances to related parties**

The Group granted various credit facilities to its subsidiary companies and key management personnel. Key Management Personnel is defined as members of the Board of Directors of the bank, including their close members of family and any entity over which they exercise control. Close member of family are those who may be expected to influence or be influenced by that individual in dealings with the bank. The rates and terms agreed are comparable to other facilities being held in the bank's portfolio. Details of these are described below:

year ended 31 December 2023	Directors and other key management personnel (and close family members)	Subsidiaries	Associate	Total
<i>In millions of Naira</i>				
Balance, beginning of year	1,354	256,049	403	257,806
Net movement during the year	918	651,566	(55)	652,429
Balance, end of year	2,272	907,615	348	910,235
Interest income earned	213	42	29	284
ECL due from related parties expense	-	-	-	-

The loans issued to directors and other key management personnel (and close family members) as at 31 December is N2.272million and they are repayable in various cycles ranging from monthly to annually over the tenor. The transactions were carried out at arms length and have an average tenor of 4 years. The loans are collateralised by a combination of lien on shares of quoted companies, fixed and floating debentures, corporate guarantee, negative pledge, domiciliation of proceeds of company's receivables, legal mortgages and cash.

The loan to subsidiaries relates to a foreign interbank placements of USD167M granted during the year. It is a non-collateralised placement advanced at an average interest rate of 4.83% and an average tenor of 11.7 months. This loan has been eliminated on consolidation and does not form part of the reported Group loans and advances balance.

The loan granted to associate as at 31 December 2022 is N363m at an average interest rate of 8% and an average tenor of 4.46years.

No impairment losses have been recorded against balances outstanding during the year with key management personnel, and no specific allowance has been made for impairment losses on balances with key management personnel and their immediate relatives during the year.

**(b) Deposits from related parties**

year ended 31 December 2023	Directors (and close family members and related entities)	Subsidiaries	Associate	Total
<i>In millions of Naira</i>				
Balance, beginning of year	4,596	219,043	3,402	227,041
Net movement during the year	(572)	284,987	6,655	291,070
Balance, end of year	4,024	504,030	10,057	518,111
Interest expenses on deposits	8	20,636	61	20,704

The deposits are majorly term deposit with an average interest rate and tenor of approximately 5.9% and 3.7 months for directors, 12.6% and 12months for Associate and 4% and 4 months for subsidiaries.

**44 Business Combination****(a) Business Combination with Finibanco Angola**

Access Bank Plc recently acquired Finibanco Bank in Angola on the 30th of June 2023 as agreed between both parties. The bank however obtained control of the entity on 5th September 2023 by virtue of its ability to meet the control requirement of ownership of up to 66% as stipulated in the agreement. The acquisition involved the Bank acquiring 99.2% of the issued share capital of Finibanco in exchange for cash of N31,546,835,859 (Thirty one billion, five hundred and forty six million, eight hundred and thirty five thousand, eight hundred and fifty nine naira) used to pay off the shareholders of former Finibanco.

The goodwill has been computed by comparing the fair value of the net asset of former Finibanco to the cash consideration paid for the acquisition. The goodwill computation is provisional at the time of this report.

#### 45 Director-related exposures

The Group has some exposures that are related to its Directors. It however follows a strict process before granting such credits to its Directors. The requirements for creating and managing this category of risk assets include the following amongst others:

- a. Complete adherence to the requirements for granting insider-related exposure as stated in the Bank's Credit Policy Guidelines, the Insider-related Policy as well as the Bank's duly approved Standard Operating Procedure for managing insider-related exposures.
- b. Full compliance with the relevant CBN policies on insider-related lending.
- c. All affected Directors are precluded from taking part in the approval process of credit request wherein they have interest.
- d. The related Director is required to execute a document authorizing the Group to use their accruable dividends to defray any related-obligor's delinquent exposures.
- e. The Directors are required to execute documents for the transfer of their shares to the Group's nominated broker to ensure effective control as required by the CBN policy to enhance the bank's Corporate Governance structure.
- f. Section 89 of the Bank's Article of Association also reiterated that "a related Director shall vacate office or cease to be a Director, if the Director directly or indirectly enjoys a facility from the Bank that remains non-performing for a year of more than 12months."

The Group's principal exposure to all its directors as at 31 December 2023 is N646million. However, the relevant obligors under this category also have credit balances and deposits maintained in their bank accounts which mitigate the risks to the Group.

Below is a schedule showing the details of the Holding's director-related lending:

<b>December 2023</b>							
S/N	Name of borrower	Relationship to reporting institution	Name of related Directors	Facility type	Outstanding Principal	Status	Nature of security
					N'millions		
1	Herbert Wigwe	Group Chief Executive Office	Herbert Wigwe	Mortgage	253	Performing	Mortgage

<b>Balance, end of year</b>					<b>469</b>		

**46 Non-audit services**

During the year, the Group's auditor, KPMG, were paid for the following services

**i) Non-audit services required by regulators**

<b>Service</b>	<b>Description</b>	<b>Sum N'ooo</b>
1 Internal Control Over Financial Reporting (ICFR)	KPMG was engaged to review the Group's internal control over it financial reporting activities.	120,000

**ii) Other non-audit services**

<b>Service</b>	<b>Description</b>	<b>Sum N'ooo</b>
1 Market Assessment	KPMG was engaged to assist with reviewing and assessing digital lending opportunities and to articulate a go-to-market plan for the Group's digital bank subsidiary	43,781
2 Recommendation of a HR Operating Model	KPMG was engaged to review and make recommendations on People Strategy & HR Operating Model across the Group's diversified businesses.	41,997
3 Quality Assurance review	KPMG was engaged to provide a Quality assurance review on the Group's Microsoft Dynamics 365 implementation	97,750
4 Crisis Management Training & Exercising	KPMG was engaged to provide a crisis management training and exercise to the bank	22,763
5 Security Operations Centre strategy study	KPMG was engaged to perform a SOC strategy study of leading global financial services institutions	1,927
6 Quality assurance review	KPMG was engaged to provide a Quality Assurance Review on the bank's Treasury management solution implementation	42,687
8 Process review	KPMG was engaged to perform a review of High Impact processes for the Banking operations	1,703
9 Due Dilligence	KPMG was engaged to perform due dilligence services for the bank's proposed acquisitions	2,817
10 CRS Compliance Services	KPMG was engaged to provide Common Reporting Standard (CRS) Compliance Services	7,000
11 AML/CFT/CPF training	KPMG was engaged to provide a AML/CFT/CPF training for Senior Management and Board Members	2,500
12 Quality Assurance review	KPMG was engaged to provide a Quality Assurance Review on the bank's Treasury management solution implementation	89,000

In the Company's opinion, the provision of this service to the group did not impair the independence and objectivity of the external auditor.
